Salus University Receives ASHA Approved Continuing Education (CE) Provider Recognition

ASHA Approved CE Provider Status Demonstrates Commitment to High-Quality CE Programming for Audiologists and Speech Language Pathologists

Elkins Park, Pa. – Salus University has recently been approved by the Continuing Education Board (CEB) of the American Speech-Language-Hearing Association (ASHA) to offer continuing education courses for audiologists and speech-language pathologists. ASHA approved CE providers are the only organizations approved to offer continuing education courses for ASHA Continuing Education Units.

In order to achieve ASHA Approved CE Provider status, Salus completed a rigorous application process and successfully demonstrated adherence to the ASHA CEB standards, which focus on the design, development, administration and evaluation of its continuing education courses offered for audiologists and speech language pathologists.

Dr. Melissa Vitek, director of International and Continuing Education for Salus said, “We are pleased to have achieved designation as an ASHA continuing education provider which will allow us to expand our discipline-specific and interprofessional continuing education offerings.”

“We are pleased to welcome Salus University as our newest ASHA Approved CE Provider,” stated Dr. Jaynee A. Handelsman, president of ASHA and director of pediatric audiology at C.S. Mott Children’s Hospital and a clinical assistant professor in the Department of Otolaryngology – Head and Neck Surgery in the University of Michigan Health System. “Salus joins 532 organizations around the world that have had their organizational process and courses reviewed by our experts in continuing education to ensure the highest possible standards are met.”

About Salus University

Salus University, founded as the Pennsylvania College of Optometry in 1919, today is a diversified, globally recognized professional academic center of learning that offers a wide range of degree programs in the professions of Optometry, Audiology, Physician Assistant, Public Health, Education and Rehabilitation for the Blind and Visually Impaired, Biomedicine, Occupational Therapy and Speech-Language Pathology. Salus operates four clinical facilities in the Philadelphia area that provide highly specialized vision, hearing and balance, and speech-language pathology services. The University has more than 1,100 students, including PhD candidates, and more than 12,500 alumni worldwide. For more information, please visit www.salus.edu.

About the American Speech-Language-Hearing Association (ASHA)

ASHA is the national professional, scientific, and credentialing association for more than 182,000 audiologists, speech-language pathologists, and speech, language, and hearing scientists. Audiologists specialize in preventing and assessing hearing and balance disorders as well as providing audiologic treatment including hearing aids. Speech-language pathologists identify, assess, and treat speech and language problems, including swallowing disorders. For more information, please visit www.asha.org.
