

The College of Health Sciences, Education and Rehabilitation's post-professional Doctor of Occupational Therapy (OTD) program uniquely positions you as a future leader, advanced content expert or academic with an emphasis on inter-professional collaboration. Choose a specialty track that meets your needs and interests, including Remedial Vision Rehabilitation, Low Vision Rehabilitation, and Health and Wellness.

OCCUPATIONAL THERAPY (OTD)

POST-PROFESSIONAL DOCTORATE & SPECIALTY TRACK CERTIFICATES

What We Offer:

Learn online: All but two courses are online using interactive, computer-based technology

Learn didactically and experientially: Come twice to our beautiful campus in suburban Philadelphia to study face-to-face with our faculty and engage in dynamic hands-on learning activities and community-based experiences during two five-day on-campus courses. Each consists of one weekend and the three days preceding or following it

Flexible Learning Options: Complete in as little as 16 months or as long as six years

Total Credit Hours: 30

Cohort begins every January

***September start also available**

WHY SALUS?

- Emphasis on clinical management and life-long learning strategies
- Distinguished, highly dedicated faculty
- Three cutting-edge Specialty Track options (as part of the OTD or as a stand-alone 12-credit Specialty Certificate)
- Hands-on learning in on-campus clinical facilities
- Competitively priced

Choose One Specialty Track:

A) Low Vision Rehabilitation: This track prepares occupational therapists to specialize in working with persons with severe visual impairment via state-of-the-art training from an internationally recognized faculty of experts in the field of low vision. Courses concentrate on low vision assessment and intervention techniques to enhance participation in occupations and daily living skills for clients for whom vision impacts their independence and quality of life.

B) Remedial Vision Rehabilitation - Pediatrics and Acquired Brain Injury: This track is designed to enable occupational therapists to gain a comprehensive understanding of vision problems prevalent in acquired brain injury and pediatric populations. Students will learn how to screen for the most commonly occurring problems and perform remedial vision rehabilitation for clients with these problems in an ongoing collaboration with an optometrist.

C) Health and Wellness*: This track is designed to enable occupational therapists from any area of clinical practice to develop advanced/evidence-based expertise in holistic and innovative healthcare skills to assist individuals, groups or populations with or at-risk for chronic illness or disability. Students will be exposed to health assessment and health promotion activities across the life span, global and cultural perspectives, community initiatives, and primary care.

* Including Special Focus in Women's Health
