

Osborne Audiology at Drexel University, Elkins Park Campus, welcomes inquiries by prospective students. For more information, contact **1.800.2.DREXEL** or **enroll@drexel.edu**.

## DISTANCE EDUCATION PROGRAMS

Osborne Audiology at Drexel University offers several degree and non-degree programs via distance education. The purpose of our distance education programs is to offer practicing audiologists the opportunity to refine their knowledge and skills, stay abreast of developments in science and clinical practice, and expand their professional expertise. With courses taught by subject matter experts, the curricula are infused with the University's core philosophy of combining advances in science and evidence-based practice to deliver audiological services of the highest quality. Our programs prepare audiologists to compete in today's complex and dynamic health care environments.

### Doctor of Audiology (AuD) Bridge Program

This two-year degree program is for audiologists with a Master's degree in Audiology (or a related field) who have at least three years of relevant work experience. It can be completed entirely online, with optional in-person workshops if desired.

### Master of Science in Clinical Audiology (MSCA) Program

This two-year degree program is for audiologists with a Bachelor's degree in Audiology (or a related field) who have at least two years of relevant work experience. The hybrid program involves online courses, in-person workshops and supervised clinical training.

### Advanced Studies Certificate Programs

These six-month non-degree programs are open to anyone holding a college-level degree in Audiology (or a related field) who want to gain or expand expertise in a specialized area. We offer certificates in **Cochlear Implants**, **Tinnitus & Sound Sensitivity Disorders** and **Vestibular Sciences & Disorders**. They can be completed entirely online, with optional in-person workshops if desired.
