

*Osborne Audiology at Drexel University, Elkins Park Campus, offers distance education and international degree programs with online education for working audiologists.*

# Distance Education Programs

## **AuD Degree (Bridge) Program**

The primary goal of this program is to prepare practicing audiologists in the U.S. and other countries to gain a professional doctorate degree in Audiology (AuD) by giving them the opportunity to enhance their professional and clinical capabilities and stay abreast of advances in theoretical, diagnostic and rehabilitation issues in auditory science and audiology.

The AuD Bridge Program is designed to enhance the students' current level of experience in various areas of audiology, while focusing on the core competencies in the areas of Biomedical Sciences, Diagnostic Sciences, and Remedial Sciences and Professional Issues. These core competencies are based upon Osborne Audiology's core philosophy in preparing an audiologist to compete in today's dynamic and competitive health care services.

## **International MSc in Clinical Audiology Program**

The primary goal of the program is to offer international audiology practitioners the chance to advance their knowledge and skills in audiologic care and to experience specialized fellowship training within a specific content area. This degree program features biomedical and audiologic sciences, clinical sciences, research design and application, and small group learning experiences, delivered in 51 semester hour credits over a 24-month period. This is a hybrid program with both face-to-face learning supplemented by online content, hands-on workshops and supervised clinical training.

## **Advanced Studies Certificate Programs**

Taught entirely online, the Advanced Studies Certificate Programs prepare audiologists to become experts in a specialized area. Each curriculum is designed to expand students' knowledge, provide needed skills and expertise, build confidence in the delivery of clinical services and present the latest on the state-of science in each specialty area's technology and treatment, with special emphasis on current research and evidence.

### **CERTIFICATE PROGRAMS**

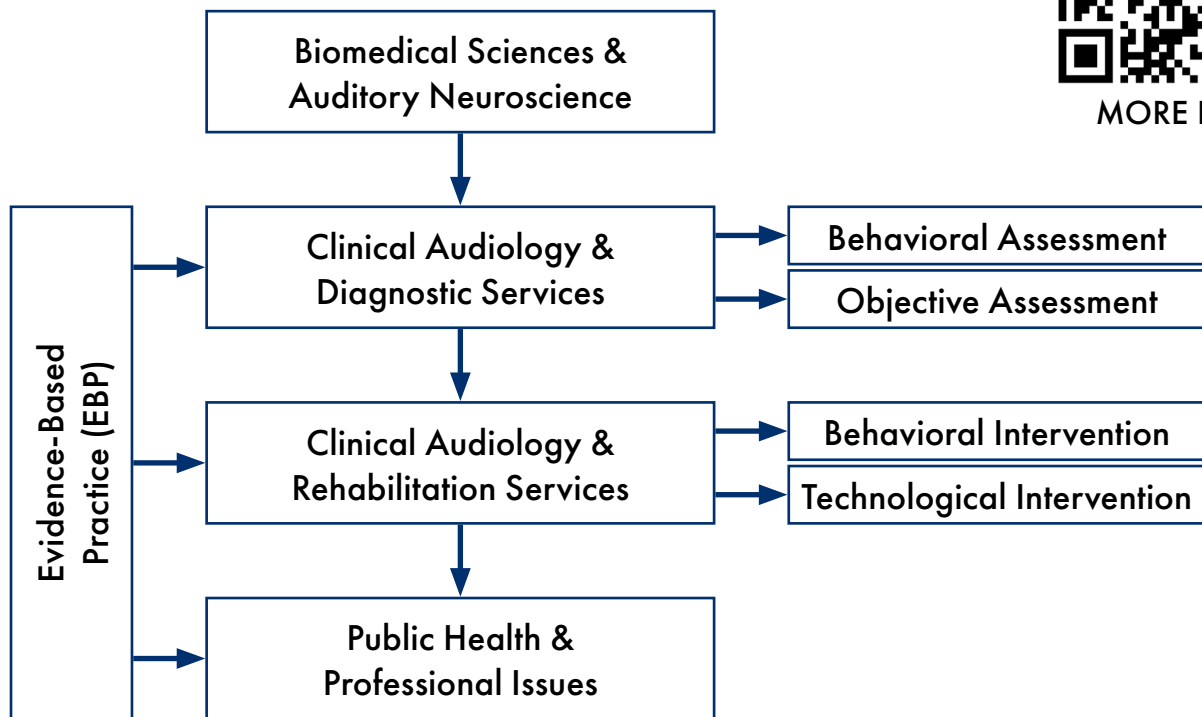

- Advanced Studies Cochlear Implants.
- Advanced Studies Vestibular Sciences and Disorders.
- Advanced Studies Tinnitus and Hyperacusis.
