Department of Speech-Language Pathology

8360 OLD YORK ROAD
ELKINS PARK, PA 19027-1516
Phone: 215.780.3107
Fax: 215.780.1357

Effective: Fall, 2019
Mission of the Department:

The mission of the Department of Speech-Language Pathology is to educate and train graduate-level students to become exemplary professionals in speech-language pathology who provide excellence in service delivery to individuals with communication and swallowing disorders, and who engage in and promote interprofessional education and practice, lifelong learning and prevention of communication and swallowing disorders.

Mission of the College:

The mission of the College of Education and Rehabilitation is to develop and offer graduate programs preparing highly qualified professionals to support individuals who have, or are at risk for, disabilities, by creating an interprofessional environment of practitioners committed to lifelong learning, critical thinking, and dedication to the individuals and communities they serve.

Mission of the University:

Advancing integrated health care through innovative education, research and clinical services.
This handbook, required as a text for the student enrolled in the program, is intended to serve as a guide concerning the policies and procedures of the program in Speech-Language Pathology within the College of Education and Rehabilitation at Salus University. Explanations and examples of requirements, formats, and information pertinent to the student’s successful completion of the program are included. If, at any time, a student is uncertain about policies or procedures, or finds requirements unclear, he/she is strongly encouraged to seek clarification from the program director, the clinical director, faculty, or clinical supervisors.

Should any change or update in this handbook be required, the program director will provide it as an addendum.

Welcome to the Department of Speech-Language Pathology

The faculty and staff of the Department of Speech-Language Pathology in the College of Education and Rehabilitation at Salus University are excited that you will be joining us for your graduate studies! We will make every effort to provide you with a high-quality learning experience that exposes you to the depth and breadth of the profession across a variety of settings.

The purpose of the handbook is to support student learning during your education in the Master’s program. The faculty has developed this handbook as a resource containing the guidelines relevant to the program as well as the Speech-Language Institute (SLI) and beyond. You will find information about the policies and procedures associated with the program, along with some details about what you need to do to prepare for professional practice after you graduate.

So, please look through the handbook carefully and become familiar with its content.

When you have questions about the program, we encourage you to consult the handbook first – there’s a very good chance that you’ll find the answers to your questions right here! Of course, if the answers aren’t evident, just let us know. We’ll be happy to assist you in achieving the goal to provide a quality experience for our students.
Supervised clinical practice is an integral part of the graduate program in the Department of Speech-Language Pathology within the College of Education and Rehabilitation at Salus University. Supervision provides the student with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders.

The primary goal of clinical education is to prepare speech-language pathologists who will demonstrate general competence across the scope of practice in nine communication disorders areas from infancy to geriatrics of culturally and linguistically diverse populations. Clinical experiences (400 clock hours) are required in each of the following areas:

- **Articulation**, including production of phonemes, strategies to improve motor speech production, production of multisyllabic word forms.
- **Fluency**, including stuttering behaviors, cluttering and rate of production.
- **Voice and resonance**, including respiration and phonation, loudness levels, pitch and intonation variations.
- **Receptive and expressive language** (morphology, phonology, syntax, semantics, and pragmatics) in speaking, listening, reading, writing and manual modalities, including increased length and complexity of utterances, expanding expressive/receptive vocabulary, measurements/treatment of phonological use.
- **Hearing**, and its impact on speech and language and aural (re)habilitation, including hearing aid trouble shooting, hearing screening, speech reading skills, speech/voice production as influenced by hearing impairment, language deficits as influenced by hearing impairment.
- **Swallowing disorders**, including oral, pharyngeal, esophageal, and related functions as well as oral function for feeding; may include modified barium swallow measures, fiber optic evaluation of swallowing, and strategies to decrease aspiration.
- **Cognitive aspects of communication** (attention, memory, sequencing, problem-solving and executive functioning), including cognitive notebook use to improve access of long-term memory about family and word retrieval strategies.
- **Social aspects of communication** for challenging behavior, ineffective social skills, and lack of communicative opportunities, including behavior management techniques and developing more effective peer interaction patterns.
- **Communication modalities**, including oral, manual, augmentative and alternative communication (AAC) techniques and assistive technology, identifying appropriate AAC device and strategies, increasing use of effectiveness of AAC techniques (e.g., PECS, picture notebook).

Through sequenced clinical experiences and assignments, the student will learn to:

- Analyze, synthesize and evaluate an extensive body of knowledge in communication sciences and disorders.
- Use evidence-based practices in the selection of evaluation and treatment protocols.
- Achieve high levels of competency in prevention, screening, diagnosis, and treatment of clients with varied communication disorders.
- Communicate effectively and professionally, orally and in writing.
- Demonstrate ethical and responsible professional conduct.

The ultimate goal of clinical education is to provide the student with the knowledge and skills to practice as a speech-language pathologist in diverse educational, healthcare, and rehabilitation settings.
ROLES AND RESPONSIBILITIES IN CLINICAL EDUCATION

**Student Responsibilities**
The student is expected to conform to the policies and procedures of the site at which the practicum takes place. Essentially, the student learns the role of the professional by following the model of the supervisor. The rules and expectations will be discussed at the beginning of the assignment and will vary depending on the site. The student will:

- Assist the supervisor in selecting and administering the appropriate diagnostic tools
- Set realistic and appropriate therapy objectives
- Select techniques and materials for implementing the therapy objectives
- Manage client behavior
- Motivate clients
- Document session with professional notes/reports
- Counsel clients and parents/caregivers
- Implement suggestions made by supervisors in a timely fashion
- Act as a member of the profession

**Clinical Educator Responsibilities**
The clinical educator will discuss the expectations for the student as early as possible in the practicum. This will allow students time to address any concerns regarding supervision approach, methods of feedback, and administrative matters. In order to assure that the student is competent, the clinical supervisor will:

- Observe assessment and therapy sessions as required by CFCC guidelines
- Provide feedback (both written and oral) about assessment protocols, treatment plans, therapy sessions and documentation in real-time and during weekly meetings
- Demonstrate techniques to facilitate student learning
- Suggest alternatives for achieving goals
- Participate in counseling sessions
- Give the student support and direction while allowing the student independence to plan and problem solve
- Assist the clinical director in formalizing mid-term and final grades

Recommendations regarding care of the client or to the parent/caregiver are the responsibility of the clinical educator.

**Academic Advisor Responsibilities**
The academic advisor will be responsible for advising the student in both didactic and clinical education. The advisor will provide support to the student, the clinical educator and other supervisors during the student’s practicum experience.

**Clinical Director Responsibilities**
The clinical director will be responsible for coordinating all clinical activities for the students, both on and off-campus. The clinical director or designee will observe sessions to determine the effectiveness of the practicum for both the student and the supervisor and make suggestions for any adjustment to the practicum. The clinical director will submit grades for all practicum courses.

**Program Director Responsibilities**
The program director will be responsible for overseeing the entirety of your program and guiding the students towards meeting the requirements for graduation.
Amount of Supervision

According to Standard V-E of the 2014 Standards and Implementation Procedures for the Certificate of Clinical Competence in Speech-Language Pathology:

Supervision must be provided by individuals who hold the Certificate of Clinical Competence in the appropriate profession. The amount of direct supervision must be commensurate with the student's knowledge, skills, and experience, must not be less than 25% of the student's total contact with each client/patient, and must take place periodically throughout the practicum. Supervision must be sufficient to ensure the welfare of the client/patient.

Direct supervision must be in real time. A supervisor must be available to consult with a student providing clinical services to the supervisor's client. Supervision of clinical practicum is intended to provide guidance and feedback and to facilitate the student's acquisition of essential clinical skills. The 25% supervision standard is a minimum requirement and should be adjusted upward whenever the student's level of knowledge, skills, and experience warrants. (ASHA, 2014)

THE CLINICAL PRACTICUM

Throughout the course of studies, the student must complete a minimum of 400 clinical hours. The student completes at least 25 hours of observation and at least 375 hours of direct client contact. These clinical hours are to be achieved through a variety of practice settings with a diversity of clients. For all students, clinical supervisors will determine when students are able to move from supervised observation into supervised clinical service delivery. This decision will differ depending upon the knowledge and abilities of the student and the specific clinical procedures performed. Typically, coursework related to a procedure should be concurrent or completed prior to clinical participation involving that procedure. All students will rotate through placements in the on-campus clinic and formally approved off-campus sites. Students may only attend sites that are approved by the clinical director, for which a current affiliation agreement is in place.

When a student enrolls in clinical practicum, it is expected that the student will participate through the end of the designated clinical assignment (i.e., one semester).

Throughout the program, students will meet with the clinical director, the academic advisor and the supervisor(s) to discuss on-campus and off-campus clinical placements. Determination of the clinical placements will depend on knowledge, skills, abilities, and schedule. Students may expect to be placed in the on-campus clinic for three semesters before consideration of off-campus placements. The clinical director will make the initial contact to inquire if an off-campus site is willing to supervise a student extern. Once the site has indicated willingness to supervise a student and the clinical director has verified that a signed agreement is in place, the student will be offered the name and contact information so that he or she may further discuss the placement and set up any needed preliminary interview or site visit.

Clinical Supervisors

All supervisors will hold the American Speech-Language Hearing Association (ASHA) Certificate of Clinical Competence. ASHA certification will be verified by the program's administrative assistant, working closely with the clinical director, through the ASHA website. Verification will occur prior to the first placement of students with a supervisor and then occur on an annual basis, on or about January 1.
All supervisors of students will also be required to maintain state licensure and/or certification, as applicable, in the state where the practicum occurs. This too will be verified by the program’s administrative assistant, working closely with the clinical director. Verification will occur prior to the first placement of students with a supervisor and then occur annually, on or about July 1.

Supervisors will also be asked to provide a signed declaration that they have and will maintain ASHA certification and state licensure and/or certification while supervising as well as abide by the ASHA Code of Ethics and Scope of Practice within their specialty(ies) and clinical setting. Any changes to certification and/or licensure during the student’s placement must be brought to the clinical director’s attention immediately.

Finally, supervisors’ contact information and credentialing will be placed in CALIPSO (see below), and updated regularly.

**Practicum Assignments**

Students will follow the sequence of learning practicum assignments outlined by the program, in the order specified. Practicum assignments will be sent via email to the student, the supervisor and the program chair two to four weeks before the new semester. The clinical director will maintain regular contact with the student throughout the semester to ensure onsite supervision and clinical caseload is appropriate for each level.

Different disorders may be encountered at different rotation settings each semester depending on the clients/students/patients served. It is noted that depending on the type of setting, vocabulary and terminology will vary, and the student is expected to know and use the terminology of the setting. For example, in a medical setting, those receiving services are referred to as patients, but in a school setting, they are referred to as students, and in a private practice or clinic setting, those receiving services are referred to as clients.

**Clinic Time Expectations**

Enrollment in clinic practicum and externships will place significant time demands on students during the week. It is mandatory for students to remain in the clinic for the duration of the assignment block. For each assignment, students should be prepared to devote approximately 15 to 20 hours per week during internship and up to 40 hours per week during externship to planning, implementing, and evaluating the clinical experiences.

**Mandatory Meetings/Orientation**

Many clinical practicum sites require meetings prior to beginning or at the onset of the assignment, including an interview, shadowing hours, and site orientation. If a student misses the required meetings, then it is at the discretion of the clinical director whether to allow the student into the practicum. Students are responsible for attending all meetings as part of their clinical education.

**Clinical Clock Hour Requirements**

The Department of Speech-Language Pathology abides by the practicum requirements as prescribed by ASHA for the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP), as well as requirements for state licensure and certification. Thus, students will need to meet the following minimal requirements for clinical practicum hours:
Total Patient/Client Contact  400 hours  
Supervised Clinical Observation  25 hours  
Patient/Client Contact  375 hours  

Please note that other states may require a minimum number of clinical clock hours in evaluation and treatment of children and adults.

**Transfer of Clinical Clock Hours**

Salus University does not accept the transfer of clinical hours earned at the undergraduate level.

**Clinical Clock Hour Records**

The Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) defines 1 clinical practicum hour as equal to 60 minutes. When counting clinical practicum hours for purposes of ASHA certification, experiences/sessions that total less than 60 minutes (e.g., 45 minutes or 50 minutes) cannot be rounded up to count as 1 hour.

Students may count only those hours for which they have provided direct client care.

*Activities that count as clock hours include:* Only direct contact with the client or the client's family in assessment, management, and/or counseling can be counted toward the practicum requirement.

*Activities that do not count as clock hours:* Time spent on documentation, preparing for a session, preparing material, scoring and analyzing tests, calling client/family to make appointments, conferencing on client with the supervisor, team meetings, or in rounds, observing a session or an IEP/IFSP meeting.

At the end of each semester, clinical clock hours will be verified by the supervisor and the clinical director and signed off by the department chair. Students should maintain a paper/hard copy of their signed clinical hours for their personal records.

The student’s failure to submit clinical hours within the assigned time frame will result in a failure (F) for the clinical practicum course.

**CALIPSO**

The Department of Speech-Language Pathology has adopted the Clinical Assessment of Learning Inventory of Performance Streamlined Office Operations (CALIPSO), a competency based application that manages student clinical learning. To access Salus’ CALIPSO website, go to the CALIPSO login page.

**Registration**

To gain access to the CALIPSO system, the student will be emailed a one-time PIN number by the clinical director. With the PIN number, the student will receive step-by-step instructions for using the system.
Instructions for CALIPSO

Students will find instructions for approving clock hours and submitting students’ midterm and final evaluations on the CALIPSO website. All clock hours should be approved prior to the end of each semester.

CALIPSO Scoring

CALIPSO scoring is a competency-based program and adheres to the standards set forth by the Council on Academic Accreditation (CAA), and the Council for Clinical Certification (CFCC). This means that students have to demonstrate specified clinical competencies in order to qualify for graduation. Competencies on a standard are met when a student’s average on the standard reaches the minimum score as outlined in the course syllabus.

   Competency-Based Scores:

   1. Absent – supervisor modeling and intervention needed
   2. Emerging – supervisor intervention needed
   3. Evident – with supervisor support and feedback
   4. Independent – given occasional feedback
   5. Clinical Fellowship (CF)-ready – consultation with supervisor

The purpose of the rating system is to provide feedback on specific clinical competency areas and guide decisions in which students need practice or support. The supervisor will evaluate and grade the practicum or externship student’s performance at midterm and at the end of the placement.

A pass in a practicum course indicates that the student has met at least minimum requirements to count clinical clock hours. Students will be evaluated across three major domains: (1) Evaluation, (2) Intervention and (3) Preparedness, Interaction and Personal Qualities. In order to receive a passing grade for the practicum, the student must have a minimum average competency in each domain as outlined in the course syllabus. Students may not count clinical hours towards the minimum required hours for graduation during a term when a failing grade is received.

PRACTICUM GRADING

Satisfactory clinical performance is an integral part of the Department's expectation of students. Each student must enroll in clinical practicum each semester. Only the clinical director or department chair can waive this requirement.

As part of the assessment process, students will be required to reflect on and write about their clinical experiences, including their self-perceived strengths and areas for improvement. These reflections will be discussed with the clinical supervisor. The student’s assessments will be compared with the supervisor’s rating scale at mid-term and within the final two or three weeks of their clinical placement. The self-reflections will also be discussed during formal advising sessions. The clinical supervisor and academic advisor will communicate as needed regarding the student’s performance.

At the midterm point of the semester, the clinical supervisor may provide formal assessment to strengthen or improve observed areas of weakness and reinforce the student’s strengths.
At the close of the semester, the supervisor provides summative assessment information to improve observed areas of weakness and reinforce the student’s strengths. This exchange occurs during the final conference between the student and the clinical supervisor. Clinical educators recommend a grade for the student’s work during the semester. The Clinical Director, in consultation with the student’s supervisors, assigns the final grade.

Satisfactory clinical performance (i.e., direct client care) is an integral part of the Department's expectation of students. Students who receive a practicum grade below B in any clinical assignment will be placed on clinical probation and a remediation plan will be developed. Failure in clinical performance will result in failure of the course.

Again, clinical hours obtained during an unsuccessful clinical experience will not count toward the minimum required clock hours for graduation.

**SEQUENCING OF COURSE CONTENT AND CLINICAL EXPERIENCES**

Each supervisor is informed of the courses and clinical experiences the student has had in speech-language pathology. This will ensure that the supervisor knows each student’s background and will allow the supervisor to provide the requisite level of supervision (see FERPA Memorandum).

In general, students are assigned clinical cases once they have completed or are concurrently taking the appropriate course work. However, since undergraduate preparation is diverse, it is the practice of the clinic to provide the following support to all students:

- Students will be provided with individual teaching, clinical modeling, and/or co-treatment with the supervisor.
- Peer-mentoring may occur. Experiences may include an opportunity to observe, ask questions of students working with specific clients and review prior semester’s recording of therapy.
- Students will be directed to resources to determine and implement evidence-based practice.
- When appropriate, students will be encouraged to collaborate with the expert(s) in the area of treatment.
- Readings (such as articles and book chapters addressing various diagnoses, treatment strategies, etc.) will be provided/recommended by the supervisor for specific areas of need.
- Grand Round presentations will be required in order to increase students’ exposure to different client profiles, current treatment strategies, evidence-based practice and problem solving for additional treatment strategies and approaches to clinical questions.

In summary, supervision of each student is based upon his/her knowledge and skills. Greater amounts of supervision will be provided to the new clinicians and gradually decreased as appropriate. Weekly meetings between clinical supervisors and students will allow for discussion, evaluation of progress and further development of clinical critical thinking skills.
ACADEMIC AND CLINICAL PERFORMANCE AND STUDENT RESPONSIBILITIES

The program makes every effort to support students academically and clinically. The following sections outline academic and clinical performance and student responsibilities.

**Grades**

All courses, didactic and clinical, are taken for a letter grade. Courses in which a student has earned a grade of C+ or lower will not be counted towards completion of program requirements and must be repeated for appropriate credit. Note that these performance standards differ from the general standards specified in the College of Education and Rehabilitation (CER) academic policies. Please refer to the CER handbook for information regarding academic standing and academic probation.

**Program Review and Remediation Plans**

All students are reviewed each semester at mid-semester and semester’s end by the faculty at large during a formal faculty meeting. Following this review, if a student fails to achieve Course Competencies, Program Learning Outcomes, or CAA Standards as measured in his or her clinical and academic coursework, the student will be provided with a written remediation plan outlining specific expectations for his or her successful completion of the standards or learning outcomes. Remediation plans are implemented when a student earns a grade of B- or below in any didactic course or clinical assignment.

If a student requires remediation there are several steps that will be followed: 1.) The instructor will inform the student that he or she did not meet a Course Competency, Program Learning Outcome, or CAA Standard. 2.) The instructor and student will meet to discuss the plan for remediation and a written remediation plan will be created. The plan will identify areas of weakness, specific expectations for improved performance, and a specific timeline for completion of improvements. 3.) The Program Director, student, instructor, and/or advisor will meet to discuss the remediation plan and will each sign a copy of the remediation plan. 4.) A copy of the remediation plan will be provided to the student and the signed original will be placed in the student’s file. 5.) Successful completion of the remediation plan will indicate that the student has met Course Competency, Program Learning Outcome, or CAA Standard. Successful completion will be documented in the student’s file.

If the student does not successfully complete the remediation plan or the student elects not to complete the remediation plan, then the student will not be recommended for continuation in the program, graduation from the program, or ASHA certification as a speech-language pathologist.

**Academic Remediation Plans**

If a student has difficulty achieving Course Competencies, Program Learning Outcomes, or CAA Standards, the instructor, program director, and/or advisor will formally meet with the student to identify the area of knowledge or skill that is deficient. The instructor, in consultation with the student, and supported by the program director or advisor will design a written remediation plan with specific tasks, outcomes, and timelines. The student’s knowledge and/or skills will be re-evaluated at the completion of the remediation plan by the instructor as needed. If necessary, the student’s final grade may be deferred until competency is demonstrated. (Refer to the Program Plan for Student Remediation found in Appendix I.)
Examples of academic remediation may include one or more of the following:

- opportunities to repeat assignments or exams
- additional readings or written assignments
- faculty advisement on subject matter
- other activities as determined by the course instructor

Selection of the above activities will be individualized to the needs of the students and determined by the instructor to guide the student to successful completion of the plan. The remediation plan will be written, approved and signed by the student and program director and copied for the student’s file. Regular meetings between the instructor and student will be held to evaluate student progress until (a) the remediation plan is successfully completed and the student functions under the program’s expectation or (b) during the course of the plan it is determined that the only action is to have the student repeat the course.

If the student does not successfully complete the remediation plan or the student elects not to complete the remediation plan, then the student will not be recommended for continuation in the program, graduation from the program, or ASHA certification as a speech-language pathologist.

Clinical Remediation Plans

If a student has difficulty achieving Clinical Competencies, Program Learning Outcomes, or CAA Standards, the clinical educator, clinical director, and/or Program Director will formally meet with the student to identify the area of knowledge or skill that is deficient. The supervisor, in consultation with the student, and supported by the clinical director will design a written remediation plan with specific tasks, outcomes, and timelines. The student’s knowledge and/or skills will be re-evaluated at the completion of the remediation plan by the supervisor and clinical director as needed. If necessary, the students final grade may be deferred until competency is demonstrated. (Refer to the Program Plan for Student Remediation found in Appendix I.)

Plans for clinical remediation may include one or more of the following:

- opportunities to observe clinical sessions
- additional readings or written assignments
- faculty advisement on subject matter
- role-playing with peers/actors
- computer simulation
- review and evaluation of recorded sessions
- co-treatment with supervisor and/or clinical director
- other activities as determined by the supervisor and/or clinical director

Selection of the above activities will be individualized to the needs of the students and determined by the supervisor and the clinical director to guide the student to successful completion of the plan. The remediation plan will be written, approved and signed by the student, clinical director and/or department chair and copied for the student’s file. Regular meetings with the supervisor and student, facilitated by the clinical director or designee, will be held to evaluate student progress until (a) the remediation plan is successfully completed and the student functions under the practicum’s expectation or (b) during the course of the plan it is determined that the only action is to dismiss the student from the site and then having the student repeat the practicum before continuing with more advanced clinical placements.
Students who do not successfully complete a remediation plan will be required to repeat the clinical experience during the following semester. Students who elect not to repeat the practicum will not be recommended for continuation in the program, graduation from the program, or ASHA certification as a speech-language pathologist.

**Faculty Review**

The program chair and faculty will periodically review all remediation plans to ensure that the plans are applied across students for fairness, appropriateness and consistency. The faculty will consider the plan in the context of the consistency of requirements, timeline, and outcomes of previous student remediation plans.

Every effort is made to identify students who are struggling during the semester so that instructors or clinical supervisors can work with the student to assure successful completion of the semester. However, if successful semester completion of a course and/or clinical experience is not possible, the student may be expected to repeat a course and/or clinical experience. In this case, the student is placed on a modified plan of study and his/her graduation date may be delayed.

University-wide student support services (e.g., the Center for Personal and Professional Development) are also reviewed with any student who is assigned a remediation plan in order to be certain that the student is aware of and can take advantage of services available and is receiving the support that he/she needs to be successful.

**PROTOCOLS FOR SERVICES**

The following protocols were established as a general guideline for procedures associated with assessment and treatment of clients at the clinic. Supervisor-specific requirements or those that are adapted to meet the needs of individual clients will be discussed during clinic orientation or the planning stages of the session.

**Scheduling and Pre-Evaluation Information:**

Evaluations are generally scheduled week days between 8:00 a.m. and 6:00 p.m. and Saturdays between 8:00 a.m. and 12:00 p.m.

The office manager will schedule and assign supervisors and students with incoming clients. The office manager or the student will confirm the date and time of the assessment session two-three days prior to the scheduled appointment.

The client will have completed all required forms before the evaluation begins.

**Procedures Prior to the Evaluation Session:**

The student will:

- Review all available information concerning the client.
- Look up any professional or medical terminology used with which he/she is unfamiliar.
- Determine if additional information is needed prior to the evaluation session (e.g., results of previous testing, teacher consultation, etc.) and discuss with the supervisor during the
planning session.

- Estimate approximate levels of functioning in the various areas covered on the written case history form.
- Determine the reason for the referral and determine the testing that will need to be completed.
- Devise and outline, in writing, a plan for the evaluation session including information to be obtained, tests to be administered and testing priorities. Alternative plans should be formulated and may be implemented based on client responses during the evaluation session. Areas typically screened or assessed during an evaluation include:
  - Hearing
  - Oral-motor structure and function
  - Receptive language
  - Expressive language
  - Speech
  - Fluency
  - Voice

- Other areas, which may be screened or assessed, might include:
  - Literacy (reading/writing)
  - Augmentative/Alternative communication
  - Swallowing
  - Cognition

- Discuss the outlined plans with the clinical educator during the evaluation planning session.
- Reserve all testing materials needed by writing the names of the tests, date, and time needed, and the student clinician’s name in the Schedule Book.
- Review and thoroughly prepare for the administration and scoring of all testing materials to be used during the evaluation.

**Procedures on the Day of the Evaluation:**

The student will check out all testing materials and take them to the testing closet prior to the evaluation. The student should obtain the diagnostic protocols from the diagnostic closet.

The student will have a working penlight, personal protective equipment and reinforcement materials set up in the testing room.

The student should meet the client and the parent/caregiver (if applicable) in the waiting room and escort the client to the treatment room for a brief explanation of the procedures and appointment length. The parent/caregiver may be asked to accompany a client to the testing room or to remain in the waiting room. Parent/caregivers of children under sixteen or of adults who require assistance of any kind must be told that they may not leave the building during the session.

**Procedures during the Evaluation:**

The student will interview the client and/or the parent/caregiver during the evaluation session. In addition to discussing general case history information, an interview scale may be administered.
Questions generic to most evaluations would involve information regarding:

- Birth, developmental, and medical histories
- Environmental, educational and/or employment background
- Behavioral considerations
- Results of previous speech/language, hearing, educational, medical, psychological or career testing.

The student should reiterate the reason for the assessment with the client and/or the parent/caregiver. Additionally, the student should understand what the client and/or parent/caregiver expects to learn from the assessment session.

The student should never leave a child or a dependent adult in the testing room alone. At no time should a child or a dependent adult be away from the student’s line of vision.

Tests should be administered in the same order established prior to the evaluation. Flexibility is important, however, in re-ordering priorities or following alternative plans depending upon client’s responses during the evaluation and input from the supervisor. All tests should be administered and scored according to the standardized procedures described in the test manual. The student should record all items (correct and incorrect) for analysis purposes. The clinical supervisor will observe the evaluation and be available for consultation at all times.

When the evaluation has been completed, the student will escort the client back to the waiting room. The student may request that the client and/or parent/caregiver wait to discuss the findings and recommendations from the evaluation, or offer a time to schedule a follow-up visit.

The student will score the tests administered, review the behaviors observed and information obtained during the interview, formulate his/her diagnostic impressions and determine recommendations. The findings, conclusions and recommendations must then be discussed with the supervisor prior to any discussion with the client and/or parent/caregiver.

The student should complete the documentation and coding in the EHR.

The student and/or supervisor will provide feedback to the client and/or caregiver concerning the findings, conclusions and recommendations from the evaluation. If treatment is recommended, specifically state the frequency and duration of treatment recommended. During the initial portion of students’ training both a clinical supervisor and the student will give feedback. Later in training, the student will be expected to give feedback without the clinical supervisor’s physical presence. The supervisor, however, will be observing and will be available at all times if problems should arise or if additional consultation is needed.

**Procedures Following the Evaluation:**

Immediately following the evaluation, all materials used during the evaluation should be returned to the appropriate storage locations.

The student will:

- re-check the scoring of all testing and complete the identifying information (i.e., client’s name, date of birth, date of evaluation, graduate student’s name) on every test form paper used.
• transcribe the language sample (if appropriate) and complete the language analysis specified by the supervisor.
• submit the report by hard copy, based on the supervisor’s instructions and submit all test forms and papers, and any recordings to the supervisor within two working days of the evaluation.

Typically, a report will include:

• the client’s identifying information.
• an introductory paragraph, including the referral question.
• a description of the client’s behavior during the testing session.
• a listing of formal tests administered, including the expected Standard Scores or percentiles for each test, and the client’s actual scores.
• an interpretation of the client’s performance in the specific areas assessed, substantiating the clinical impressions with formal test data and clinical observations.
• an assessment summary of the client’s overall performance and prognostic statement.
• specific recommendations, including goals if referred for therapy and client education.

The student will make an appointment as needed with the supervisor to discuss the development of clinical and professional skills. These discussions may take place during planning sessions for future evaluations.

**Scheduling for Treatment Sessions:**

As recommended, the office manager will schedule the client for sessions. Students may be assigned to clients at any point during the semester. The office manager will document the client’s schedule using the clinic’s EHR and ensure the accuracy of the client’s personal information.

Schedule changes are to be made only when absolutely necessary and must have prior approval by the Clinical Director or designee. If a scheduling change is approved, the new date(s) and time(s) must be reported to the office manager and recorded in the EHR.

**Preparation:**

The student will:

• identify the client’s communication deficit and prioritize the areas to be addressed in writing prior to meeting with the supervisor or seeing the client.
• formulate plans for treatment sessions in writing prior to meeting with the supervisor or seeing the client.
• review course notes, professional journals and current research data for information regarding the client’s disorder.

**Procedures Prior to the Treatment Session:**

The student will:

• prepare a daily treatment plan on the appropriate form.
• place all stimulus, reinforcement and personal protective equipment in the treatment room prior to meeting the client.
• secure the supervisor's approval in advance for the administration of any formal tests during a treatment session.

**Procedures during the Treatment Session:**

The student will:

• be punctual in meeting the client and in terminating the session.
• meet the client in the front waiting area, introduce him/herself. The student will walk the client (and parent/caregiver) to treatment room and briefly explain what will be occurring during the session. The student should continue this process throughout the semester.
• ensure that parent/caregivers of a child or an adult client who requires significant assistance not leave the clinic and remain in the waiting room.
• never leave a child or dependent adult in the treatment room alone. If there is an emergency and the student must leave the treatment room, the client will go with the student. At no time will a child or dependent adult be away from the student’s line of vision.

Parents/caregivers may observe sessions and participate in a treatment session as directed by the supervisor. To avoid the possibility of allergic reactions, the student will not give children edible reinforcement without prior permission from the parent/caregiver. Additionally, the student will not provide foods or liquids to clients diagnosed as presenting dysphagia without prior permission from the supervisor.

The student should maintain open lines of communication with parent/caregivers by providing information regarding the client’s progress, home practice activities, etc. only as pre-approved by the supervisor.

**Procedures Following the Treatment Session:**

The student will:

• clean all materials and surfaces of the room
• immediately return all materials to the appropriate cabinets
• calculate percentages from logs and write summary comments
• complete SOAP notes
• review video recording and any written evaluation forms from the supervisor
• schedule an appointment with the supervisor prior to the next scheduled client session to review any areas of need
• complete session reflection paper, as directed.

**Formal Treatment Reports:**

After the session with the client, or on a date otherwise designated by the supervisor, the student will submit a hard copy of the therapy plan to the supervisor. A typical therapy plan will include:

• the client’s identifying information
• a summary of the client’s original diagnosis
• a summary of the client’s current level of functioning
• a list of the specific objectives, the condition, the criterion level, and procedure to be used.
The supervisor will make corrections and return to the student. The student will adjust the plan according to supervisory input and submit the revised report and enter into the EHR, as directed by the supervisor.

One week prior to the completion of the semester, on a date otherwise designated by the supervisor, or one-week following a client’s discharge, the student will submit a hard copy of the progress report/discharge summary to the supervisor. The supervisor will make corrections and return the progress report. A typical progress report/discharge summary will include the following:

- the client’s identifying information
- quantitative report of progress on the specific objectives indicated on the long-term treatment plan
- summary of client’s overall improvement in communication
- number of sessions attended over number of sessions scheduled (graduate student cancellations or holidays are not considered to be scheduled sessions)
- specific recommendations

**CLINIC APPROPRIATE ACTIVITIES**

When not providing direct client care, or in the preparation, debrief or documentation of sessions, students may engage in the following activities:

**Related to Direct Client Care:**

- Practice with the Electronic Health Record (HER)
- Plan ahead for upcoming sessions with clients – i.e. preparing home programs or other therapy activities.
- Verify all of the documentation in the client's file is accurate and complete.
  - Fix anything that is not accurate.
- Meet with supervisor to discuss upcoming sessions
- Contact other SLP professionals to obtain more information about clients
- Write SOAP notes directly after appointments
- Learn about the client’s country of origin and associated cultures and any potential impact to client care
- Summarize ASHA's position statement on client's disorder
- Go to the literature and pull studies and/or reports on 1-2 clinical issues dealt with in the sessions and be prepared to discuss with the supervisor and/or write a 2-page review
- Investigate one of the other student clinician's clients and provide a brief synopsis/possible activity/goal that could be attempted with that client; give constructive criticism and make suggestions
- Identify additional Evidenced-Based Practice (EBP) resources/references

**Related to Clinical Education:**

- Practice real-life language sampling
  - Watch another student’s session or go back and watch previous sessions
- Create core vocabularies for games and activities based on the materials
  - Come up with words that practice certain speech sound combinations
  - Write them down and keep with the activity
• Practice giving diagnostic tests
  o Understand what the test purports to diagnose
  o Understand scoring according to the guidelines of the test manual.
• Prepare a case presentation of one of their clients at a meeting timed to take place towards the end of their clinic block
• Learn about low-incidence cases that they may not have an opportunity to see very often, such as stuttering, Childhood Apraxia of Speech, etc.
  o Use subscriptions to SpeechPathology.com or SimuCase or access journal articles and learn more about some of these diagnoses
  o Find the best evidence for treatment approaches for various disorders
• Become familiar with the ASHA website and tools that are available (including the Student Portal)
• Read up on motor speech and feeding disorders, treatment theories, and practices
• Investigate a diagnosis that the supervisor provides to broaden knowledge base
• Create a database of workbooks: organize by category
• Inventory tests and supplies
• Create a database of test descriptions that can be utilized in evaluation reports:
  o Ex: “The Goldman-Fristoe 3 assesses a student's ability to correctly articulate sounds in single words in the initial, medial, and final positions....the average standard score is 100 with a standard deviation of 15. The average standard score range is 85-115” etc.
• Review speech websites: organize by material sources vs informative/educational websites
• Research and organize an app database by disorder
• The supervisors can create a mock chart for a pretend client for the students to do a chart review in order to utilize some of the medical terminology, etc. to triage a patient and find a starting point for evaluation and therapy
• Create general education materials

FRONT DESK ASSIGNMENTS

Students should have a general understanding of how the clinic operates from an administrative aspect.

Students should be able to:

• Greet and check in clients
  o Clients should be greeted as they walk into the clinic.
    ▪ Example:
    ▪  “Good morning/afternoon. May I ask your name to check you in?” OR
    ▪  “Good morning/afternoon. May I ask which student you work with so that I can let them know you’re here?”

• Answer the clinic phone
  o The clinic phone should be answered in a professional manner each time it rings.
  o Example: “Thank you for calling the Speech-Language Institute at Salus University, this is [name] speaking, how may I help you?”
Check the clinic voicemail
  o If the red light on the top right corner of the phone is lit, there is a voicemail that needs to be checked. Pick up the phone and press “VM”. When prompted, enter the clinic access code. Next, press “4” for messages, and “1” for new messages. After writing down the message, press “6” to delete the message. If necessary, alert the appropriate clinical educator and student.

Complete a client intake sheet for a new client evaluation
  o See client intake sheet.

Confirm, cancel, or reschedule client appointments and alert the appropriate clinical educator
  o Dial 2-1 (area code) (phone number) to call a client. If a passcode is needed (you will hear a long “beep”) press 0-8-5-6. When client answers, identify yourself as “Hi, this is [name], calling from the Speech-Language Institute at Salus University”.

Locate client forms including client handbook, case history, and consent forms
  o Clients need to complete case history and consent forms if they arrive to their evaluation appointment without them completed. They are located to the left of the front desk in a clear three-tier file.

**QUALITY ASSURANCE**

The Department of Speech-Language Pathology at Salus University is committed to maintaining the highest level of professionalism and has developed a quality assurance program to ensure that we are meeting or exceeding all requirements. The Speech-Language Institute utilizes various analytical tools to ensure client satisfaction and functional outcomes such as:

- **Surveys:** The Department will collect and analyze client satisfaction data to ensure the services provided are meeting the needs of the client. Surveys are distributed following an evaluation and/or at the conclusion of each semester. Data is reported back to the clinical educators, students and staff and performance improvement plans are implemented, as indicated.

- **Continuing Education:** All supervisors participate in ongoing continuing education to maintain clinical skills and to support evidence-based practice.

Our goal is to stay at the forefront of Speech-Language Pathology services. We uphold this standard by requiring high level continuing education, focusing on therapeutic outcomes and investing in our staff through mentoring programs for professional development and advancement.

**COUNCIL ON ACADEMIC ACCREDITATION CONTACT**

Concerns and questions relative to the academic and clinical training issues of the Department of Speech-Language Pathology’s accredited program should be directed to the Department Chair. Students may also contact the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA).
Criteria
Complaints about programs must meet all of the following criteria:

- Be against an accredited graduate education program or program in candidacy status in audiology or speech-language pathology
- Relate to the Standards for Accreditation of Entry-Level Graduate Education Programs in Audiology and Speech-Language Pathology in effect at the time that the conduct for the complaint occurred, including the relationship of the complaint to the accreditation standards
- Be clearly described, including the specific nature of the charge and the data to support the charge
- Be within the timelines specified below:
  - If the complaint is being filed by a graduate or former student, or a former faculty or staff member, the complaint must be filed within one year of separation* from the program, even if the conduct occurred more than 4 years prior to the date of filing the complaint
  - If the complaint is being filed by a current student or faculty member, the complaint must be filed as soon as possible, but no longer than 4 years after the date the conduct occurred
  - If the complaint is being filed by other complainants, the conduct must have occurred at least in part within 4 years prior to the date the complaint is filed

Submission Requirements
- Complaints against a program must be filed in writing using the CAA’s official Complaint Form found on the CAA website. The Complaint Form must be completed in its entirety. The CAA does not accept complaints over the phone.
- The complainant’s name, address, and telephone contact information and the complainant’s relationship to the program must be included in order for the Accreditation Office staff to verify the source of the information. The CAA does not accept anonymous complaints.
- The complaint must include verification, if the complaint is from a student or faculty/staff member, that the complainant exhausted all pertinent institutional grievance and review mechanisms before submitting a complaint to the CAA.
- Documented evidence in support of the complaint must be appended, including as appropriate relevant policies/procedures, relevant correspondence (including email), timelines of referenced events, etc. Do not enclose entire documents, such as a handbook or catalog; only the specific pages should be included that present content germane to the complaint. Page numbers to these appendices should be referenced in the complaint. Materials may be returned to the complainant if not properly organized to support the complaint.
- All complaints and supporting evidence must be submitted in English, consistent with the business practices of the CAA.
- The complaint form must be signed and submitted with any relevant appendices via U.S. mail, overnight courier, or hand delivery—not via e-mail or as a facsimile—to:

  Chair, Council on Academic Accreditation in Audiology and Speech-Language Pathology
  American Speech-Language-Hearing Association
  2200 Research Boulevard, #310
  Rockville, MD 20850

The complainant’s burden of proof is a preponderance, or greater weight, of the evidence. It is expected that the complaint includes all relevant documentation at the time of submission.
Copies of the CAA’s complaint procedures, relevant Standards for Accreditation, and the Complaint Form are available in paper form by contacting the Accreditation Office at accreditation@asha.org or 800-498-2071. All complaint materials (completed and signed complaint form and relevant appendices) must be typewritten or printed from a computer.

**ACADEMIC RULES AND STUDENT ACADEMIC INTEGRITY**

Please refer to the description in the *Salus University Student Handbook*, found on the Student Affairs page within MySalus:

https://my.salus.edu/ICS/icsfs/Academic_Rules_-_Integrity_SHBFall19.pdf?target=5197d47d-9b31-4ea2-9dcc-27023cf81200

**NON- HARASSMENT ANTI-DISCRIMINATION POLICY**

Please refer to the description in the Salus University Student Handbook, found on the Student Affairs page within MySalus:

**SUSPECTED ABUSE/NEGLECT**

Should any student or supervisor suspect that a client is either being abused and/or neglected, the student or supervisor should report this directly to the Clinical Director and take steps to appropriately report suspected abuse/neglect to the authorities and any outside agency.

**CHILD PROTECTIVE SERVICES, OFFICE OF CHILDREN AND YOUTH**

- Montgomery County: 610-278-5800, 8 a.m. - 4:30 p.m. on weekdays
- Montgomery County: 610-275-1222, evenings, weekends and holidays
- ChildLine: 800-932-0313

**ADULT PROTECTIVE SERVICES, OFFICE OF AGING AND ADULT SERVICES**

- Central Office:  610-278-3601
- Protective Services Hotline:  800-734-2020

**CONFIDENTIALITY**

1. All information concerning clients is confidential. Instruction in specific guidelines regarding Protected Health Information (PHI) as it relates to the Health Insurance Portability and Accountability Act of 1996 (HIPAA) will occur during orientation and throughout the graduate education.
2. Clients may be discussed with supervisors, faculty members, and fellow students only when such discussions serve a clinical or educational purpose.

3. Clients are not to be identified or discussed with friends, roommates, or any other person outside of the clinic or academic settings.

4. Extreme care should be taken when having conversations in SLI and other clinical placements as clients and families/caregivers are likely to be within hearing distance. Please follow confidentiality guidelines.

5. Information in the client’s record may never be taken from the designated/appropriate areas or left unattended.

6. Materials from a client’s record MAY NOT BE PHOTOCOPIED.

7. Written drafts of reports and other client information must be destroyed. Take these items to the front office for proper disposal.

8. Student clinicians are not to exchange information regarding clients with other agencies without verbal and/or written permission from the supervisor and a signed release from the client/parent/caregiver.

9. At no time should student clinicians be engaging in speech/language-related discussion about and/or regarding clients outside of the clinical setting, nor should suggestions/materials be provided to the client or family unless done so under the direction of the supervisor during the time therapy services are being provided at the clinic.

**HIPAA Overview & Training**

The HIPAA overview and training takes place in several forms. The HIPAA policies are reviewed during the fall clinic orientation sessions. It is also introduced in clinical and didactic coursework. Externship sites may require additional HIPAA training. Finally, students and faculty are directed to participate in University’s training and review, with documentation of participation to be submitted to the clinical director. All faculty and students participating in a clinical activity are required to complete the HIPAA training and refresher courses on an annual basis.

Additional information on Health Information Privacy may be found at:

[https://www.hhs.gov/hipaa/index.html](https://www.hhs.gov/hipaa/index.html)

as well as

**FERPA Memorandum**

According to the Family Education Rights and Privacy Act of 1974 (FERPA), information on student coursework and/or performance may not be shared with individuals other than faculty members with a legitimate educational interest. This means that information related to the coursework and/or performance can be shared with other faculty supervisors. Student clinicians will be asked to sign a FERPA permission form to allow the Clinical Director to discuss the coursework and/or performance with off-campus supervisors. The purpose of that type of communication is to allow off-campus supervisors to determine whether students have the skills
and knowledge to succeed at the site and the determine types of clinical activities in which students might participate. Failure to permit this information exchange could result in a supervisor refusing training at the clinical site. Further information may be found on the Student Affairs page within MySalus:

WHISTLEBLOWER POLICY

Please refer to the description in the Salus University Student Handbook, found on the Student Affairs page within MySalus:

DRUG AND ALCOHOL FREE UNIVERSITY POLICY

Please refer to the description in the Salus University Student Handbook, found on the Student Affairs page within MySalus:

SMOKE-FREE CAMPUS POLICY

Please refer to the description in the Salus University Student Handbook, found on the Student Affairs page within MySalus:

DEPENDABILITY

The student should adequately prepare for all meetings with the supervisor and for all diagnostic and treatment sessions with clients. The student will notify supervisors of any anticipated absence in writing from clinical responsibilities or change of schedule or location. In the case of an unanticipated absence (i.e., clinician illness, car problems), notify the supervisor, among others. Later, the student will discuss arrangements for scheduling make-up sessions.

Learning to adhere to clinic schedules is an important part of professional development. The student should begin and end clinical sessions within the appropriate time frame (usually 60 minutes) and allow time for clean-up and for the next clinician to set up in the room.
ATTENDANCE

Attendance is mandatory for all scheduled activities for the practicum courses. Student absences must be reported to the clinical educator or site supervisor and the clinical director. Please refer to the Academic Policy for the College of Education and Rehabilitation regarding attendance at the following link:

Absentee Procedure for Clinic

In additional to the procedures required by Student Affairs, when a student is required to be absent from a clinical assignment, the student must:

- Notify the Office Manager, in addition to the clinical educator and Clinic Director.
- Identify a substitute student clinician as directed by the clinical educator or Office Manager.
  - Provide summary and plan for session(s)
- Complete a Clinic Absence Form. (see Office Manager for form)
  - Requires a signature and make-up assignment from the clinical educator
  - Requires a signature from the Clinic Director

Lateness Procedure for Clinic

In additional to the procedures required by Student Affairs, when a student is late arriving to a scheduled clinical assignment, the student must:

- Notify the Office Manager, in addition to the clinical educator and Clinic Director.
- Complete a Clinic Absence Form. (see Office Manager for form)
  - Requires a signature and make-up assignment from the clinical educator
  - Requires a signature from the Clinic Director

Early Departure Procedure for Clinic

In additional to the procedures required by Student Affairs, when a student is required to be absent from a clinical assignment, the student must:

- Meet prior to the event with clinical educator and/or Clinic Direct for approval (on a case-by-case basis)
  - Events such as student government meetings or other extracurricular activities scheduled at the same time as a clinical assignment are RARELY, if ever, granted approval.
  - Events such as illness or medical appointments require excused absences, as outlined above.

Supervisor Absences

Supervisors, because of illness or other responsibilities, occasionally must be absent for all or a part of a session. In these instances, another supervisor may be designated to be responsible for the student and the clients. If additional supervisors are not available, sessions will be cancelled.
CLINIC CLOSINGS/CANCELLATIONS

Please refer to the *Salus University Student Handbook* for attendance policy related to weather, found on the Student Affairs page within MySalus:

*Salus Time*

Salus Time is an institution wide time when faculty and students are encouraged to come together to do scholarly functions, schedule campus group meetings, or provide a forum for the exchange of information. Currently Salus Time occurs the first Friday of the month, from 1:00 p.m. to 3:00 p.m. Although classes are not scheduled during Salus Time, students are expected to attend scheduled clinic sessions.

*Semester Break*

Students may be expected to attend clinic sessions during spring, summer, and winter breaks, on a voluntary basis.

*Jury Duty*

Students will be allowed absences for jury duty. The student must provide the official documentation to the clinical director and/or program director in a timely manner. Every effort will be made to assist the student in making up clinic hours after jury duty is complete.

*Holidays*

1. When the University is closed and/or classes are canceled for a holiday (i.e., Thanksgiving), students are not expected to attend clinic sessions.

2. When the University is open and classes are scheduled during a holiday (i.e., President’s Day), students are expected to attend clinic sessions.

3. Students who may need to reschedule a clinic session due to cultural or religious observance should meet with the Clinical Director at least four weeks prior to the anticipated absence.

Announcements and holiday calendar also appear on Salus University’s website:

http://www.salus.edu/Life/University-Calendar/Holiday-Closings.aspx

**DRESS CODE**

The purpose of the dress code is to ensure that professional standards are consistently adhered to in the clinic. This will ensure that the public the clinic serves is not offended. The dress code does not necessarily reflect the personal taste of students, but rather reflects expected professionalism within the field. The dress code applies to apparel to be worn while conducting any on- and off-
campus clinical business, activities and interactions. Identification badges must be worn at all times when involved in any clinical activity (direct or observation).

Students will adhere to the following:

- Closed-toed shoes must be worn. No flip-flops, tennis shoes, or combat/work boots are allowed.
- Dress shirts are desirable. Knit shirts and sweaters can be worn. Shoulders, cleavage, midriff, navel, small of back, and/or bottom must be covered at all times (T-shirts, halter tops, tank tops, tube tops, strapless tops/dresses, and off-the-shoulder attire are not appropriate).
- Blue or other denim jeans, pants with patches, frayed or raveled edges, excessively worn spots, holes or cut-off edges are not permissible.
- Shorts, sweats and/or yoga pants, and pajama bottoms are not appropriate.
- Hats are not acceptable.
- Facial or intra-oral piercing/jewelry must be removed.
- Facial hair, if worn, must be neat and not obstruct the view of the mouth.
- Tattoos should be covered.
- Excessive jewelry is not permissible.
- Fragrances should be minimal.

All students involved in practicum should exercise discretion in the amount and type of jewelry and body rings worn while providing clinical services. Students should consult the supervisor or clinical director with any questions regarding proper attire.

Off-campus assignments may have dress codes that differ; some sites may have required dress such as scrubs or a white lab coat. Students will be required to follow the off-campus site’s particular dress code.

**IDENTIFICATION BADGE**

Students are required to wear a Salus University identification badge. Badges are issued to students who have completed their required clearances. Some sites require a facility-specific identification badge, which is an acceptable substitute, at that site. More information may be found on the Safety & Security page of the Salus website, at:

**FORMS OF ADDRESS**

Students are expected to act in a respectful, professional manner using appropriate titles (i.e., Mr., Mrs., or another professional title) when addressing clients, their family members and clinical supervisors and faculty.
SLP Student Handbook

IMMUNIZATION RECORDS

The on-campus clinic and nearly all clinical placement sites require that students comply with the facility’s immunization policies and procedures. Students may be required to provide copies of records of Hepatitis B, Tuberculosis (2-step or Chest X-Ray), MMR (Measles/Mumps/Rubella), Varicella, Tdap (Tetanus/Diphtheria/Pertussis) immunizations and titers upon entry to the University. The cost of obtaining required immunizations will be borne by the student.

CRIMINAL BACKGROUND CHECK

The on-campus clinic and most clinical placement sites require that students comply with the facility’s employee screening/criminal background check policies and procedures. Therefore, students will be required to submit to a criminal background check, child abuse clearance, and/or the Department of Health and Human Services Office of Inspector General (OIG) Exclusion review. The cost of the check(s) will be borne by the student.

DRUG TESTING

The on-campus clinic and some clinical sites require drug testing prior to placement at the facility. Each facility will provide the clinical director with the requirements (number of drug panels) to be completed. The cost of the testing will be borne by the student.

CARDIOPULMONARY RESUSCITATION (CPR) TRAINING

Students are required to complete CPR training as prescribed by the American Heart Association. Training must be completed prior to start of the clinical practicum courses and must remain valid throughout the student’s program of study. Certification courses will be offered during student orientation. The cost of the training will be borne by the student.

LIABILITY INSURANCE

In order for students to do practicum at both on- and off-campus sites, they must be covered by liability insurance. Currently Salus University provides coverage to students under the Salus University policy.

HEALTH INSURANCE

All students enrolled in the Department of Speech-Language Pathology must be enrolled in, or have proof of health insurance coverage, as a condition of enrollment at the University. The Office of Student Affairs is available to assist students in accessing information for health coverage if necessary.

Dept. of SLP/Salus University/2019-2020
TRANSPORTATION

It is the responsibility of the student to provide his/her transportation to and from all clinical sites. Students must provide proof of automobile insurance (i.e., declaration page). Due to potential lawsuits, the student may not transport clients.

GIFTS/GRATUITIES

In appreciation for services rendered, clients sometimes offer to give money or other gifts to students. Students should not receive monetary gratuities. The student should inform clients wishing to show appreciation for services received to make donations directly to the clinic. Such donations are tax deductible. Please see the clinical director for details and procedures. The clinic also welcomes donations of children’s toys or books that may be used in the provision of therapy.

CELL PHONE USAGE

Cell phones are not permitted while clients are being treated. Students should turn cell phones off when seeing clients. Cell phone usage in the Video Viewing Room is also not permitted. In the event that students wish to use their phones for therapeutic or communication purposes during a session (i.e., to access email or for apps use), the supervisor will give permission at that time.

ELECTRONIC COMMUNICATION AND SOCIAL MEDIA

All students have a Salus University e-mail address since that is the official means through which the University communicates with students. Faculty and staff of the College of Education and Rehabilitation communicate with the students via their Salus e-mail account. Salus e-mail addresses will be used for all correspondence. Information regarding registration, clinic and class communications, etc., is sent to this e-mail address. It is the students’ responsibility to check their email accounts on a frequent basis.

Students may not use modes of social media to contact or connect with clients and/or parents/caregivers during the clinical practicum.

Mimecast

The University uses Mimecast to enhance our email security. In addition to acting as a spam filter, Mimecast provides Salus many other features designed to protect the university from phishing and other cyber related email attacks. Any and all Patient Health Data and Personal Identifiable Information that is communicated through email to an outside email address (not Salus email) must be encrypted with Mimecast.

In order to send a message using Mimecast's secure message service, you will need to type SECURE in the email subject. Once the message is sent, you will receive a confirmation email from Mimecast notifying you that your message has been sent secure. The email recipient will receive an email stating that they have received a secure message from Salus University. The recipient should follow the instructions listed in the email. Once they have logged into the secure
message, they will be able to read the email.

Please note that this process will only apply to emails being sent externally, meaning from a Salus.edu email address to a non Salus email address. Secure messages will no longer be required for internal emails as Mimecast automatically encrypts all emails. If you have any questions or concerns please contact the Help Desk at 214-780-1444 or e-mail helpdesk@salus.edu.

BLACKBOARD

Blackboard website enables students to access documents, handbooks, forms, previews of forthcoming events and guest speakers, as well as information pertaining to credentialing and/or the degree program. Many of the SLP courses will also have web based activities. The student’s Blackboard site can be accessed through the portal, which is accessed through the main webpage. The student should go to the Salus University website and click “MySalus,” enter the appropriate username and password (obtained with the assistance of the Help Desk), and then select the appropriate link.

PHOTOCOPIER PROCEDURES

In general, the copier may not be used to copy anything from a client’s file that is of a confidential nature. Copies may be made for the client, if directed by a supervisor. Approved copies could include client homework assignments, copies of reports, etc. Materials for class assignments are not to be copied in the clinic. Materials for use in therapy may be copied. Request assistance from staff as needed.

VIDEO RECORDINGS

As the clinic is a training facility, SLI depends on various supervisory tools, including audio/video recordings and observations. All sessions may be recorded and observed. These recordings are used for supervision and training purposes and are only viewed by the student, his/her supervisor, and other graduate students in training. All students are bound by the same level of privacy and confidentiality as the supervisors and other professionals. The videos will be stored in a student’s vault on Blackboard, and will be stored for a maximum of three semesters before they will be deleted.

DISABILITY STATEMENT

In accordance with the University policy, if a student has a documented disability and requires accommodations to obtain access in clinical practicum, the student should contact the Office for Academic Success. Information regarding disability resources may be found on the Student Affairs page within MySalus, at:

http://www.salus.edu/Life/Student-Services/OAS.aspx
STUDENTS WHO SPEAK ENGLISH WITH ACCENTS AND NON-STANDARD DIALECTS

In compliance with ASHA Code of Ethics, the Salus University’s Department of Speech-Language Pathology does not discriminate against students who speak English with an accent or non-standard dialect. It is expected that the student will be able to provide modeling of target phonemes, grammatical features, and any other aspect of speech and language that is essential in the treatment of a client. Per ASHA recommendations, writing requirements and other competencies will not be altered for students who speak with a dialect or accent. Faculty carefully adheres to the ASHA 1998 Position Statement on Students and Professionals Who Speak English with Accents and Nonstandard Dialects: Issues and Recommendations, at: https://www.asha.org/policy/TR1998-00154/

STUDENT ORGANIZATION

Salus University has a chapter of the National Student Speech-Language-Hearing Association (NSSLHA). Students are encouraged to become actively involved with the various fundraisers and volunteer opportunities provided through this organization. If a student maintains a membership with NSSLHA for two years, ASHA fees (i.e., when applying for national certification) will be discounted. More information may be found at: https://www.nsslha.org/

SAFETY AND SECURITY

The safety and security of the University’s students, faculty, patients, clients, staff and visitors is of paramount importance. For that reason, the University’s trained security staff stands ready to assist everyone on our campuses and at our clinical facilities whenever there might be a problem or concern. Please contact security or the Office of Safety and Security if there are questions, concerns or in need of assistance.

Any immediate threat to life and/or property that requires an immediate response from police, fire or ambulance personnel constitutes an emergency call to 911. All Salus University faculty, staff and students, Hafter Student Community Center staff, Breyer Office Park tenants, and visitors to any building on campus are authorized to phone 911 in the event of an emergency.

The Office of Safety and Security should also be contacted, allowing for the most efficient emergency response due to multiple building locations. (Please note: all notifications are treated anonymously and confidentiality is respected). The Office of Safety and Security contact is:

On-campus from a University phone extension: **Dial 1401**
On or off-campus from a non-University phone: **215-780-1401**
Department of Safety and Security email - **security@salus.edu**

Salus University’s Emergency Guidebook was created by the institution to share our emergency protocols. Students will be provided with education during orientation. Hard copies are found at the administrative assistant’s desk, in the student room and the faculty office. Students are encouraged to continually familiarize themselves with this and other procedures at:

EMERGENCY TEXT MESSAGING SYSTEM

Salus University students are required to register to be part of the University’s Emergency Text Messaging System, which enables a limited number of campus administrators to send urgent text messages to subscribers’ cell phones in the event of an emergency. To subscribe, log into https://www.getrave.com/login/salus

PARKING

Parking on campus for University’s students and faculty is limited to designated areas. Please refer to the campus map for locations:

http://www.salus.edu/getattachment/About/University-Policies/University-Policies/Parking_Policy-1-link.pdf.aspx

All vehicles must be registered with the Department of Safety and Security and affixed with a parking decal. Please complete the form located here:

INFECTION CONTROL PROCEDURES

The purpose of infection control procedures is to prevent the spread of infectious diseases by clients and clinic personnel as the result of direct contact with blood or other body fluids and/or articles contaminated by these materials.

The following infection control procedures are organized by two sources of contamination: Environmental and Human.

Environmental Infection Control & Basic Housekeeping Practices

Surface Disinfection:

Surface disinfection is a two-step process. The general policy is first to clean to remove gross contamination, then disinfecting to kill the germs. Disinfectant towelettes may be used for both cleaning and disinfecting. This protocol will be used on:

- Table tops and chairs in therapy rooms, between each client.
- The reception counter, in the morning and after closing.
- Headphones used with computers, delayed auditory feedback machines, and portable audiometers, between clients.
- Any equipment routinely handled or manipulated by client, after each client.
- Laminated or sealed therapy materials (i.e., score sheets and picture cards), after each client.
- Objects used by clients (game pieces, toys, computer keyboards, pens, pencils, or microphones) during a session, after each client.
Toys or objects used by clients in the waiting room will be disinfected, after closing. Waiting room tables, chairs, and doorknobs, in the morning and after closing.

Surface disinfection will incorporate the following steps:
1. Always wear gloves while handling or disinfecting contaminated objects or surfaces.
2. Wipe away all gross contamination using a paper towel, or coarse brush if necessary.
3. Wipe with disinfectant towelette.
4. Allow surface to dry for several minutes before placing objects back on surface.

Controlling the Human Source of Infection

Hand Washing:

Hands will be thoroughly cleaned before and after each client. When water is not available, a no-rinse antibacterial hand disinfectant will be used. When water is available anti-bacterial soap will be used.

The hand washing procedure to be followed is:

1. Remove rings and push clothing away from hands.
2. Start the water and wet hands.
3. Lather the soap, scrubbing palms, the backs of hands, between fingers, under fingernails, over the wrists, and onto the forearms, for at least 20 seconds.
4. Rinse the soap off with running water, from the wrists down to the fingers.
5. Dry hands using a paper towel.
6. Finally, turn off the water using the damp towel, not clean hands.

Hands will be washed after removing gloves, applying cosmetics or lip balm, smoking, using the toilet, and routine cleaning. Hands will also be washed before and after providing services to each client, eating, adjusting contact lenses, and handling waiting room toys.

Personal Protective Equipment (Gloves, Gowns and Masks):

Gloves
Gloves will be worn when any therapy or evaluation procedure may create exposure to bodily substances, including oral-motor exam, and hearing screenings. Gloves will also be worn cleaning up spills of infectious material (e.g., blood, vomit, urine). Gloves will be worn when treating clients known to be infected with HIV or hepatitis B. Gloves will be available in the sizes appropriate for each student or supervisor who requires them. Facilities will be called immediately to clean up bodily fluid spilled on floors. The student and client will evacuate the contaminated room and complete the therapy session or evaluation in another area.

Use the following procedure to safely remove gloves, making sure that the hands do not make contact with potentially infectious material on the surface of the glove. First, peel off one glove from wrist to fingertip and then grasp it in the gloved hand. Next, using the bared hand, peel off the second glove from the inside, tucking the first glove inside the second glove as it is removed. Wash hands thoroughly when completed.

Gowns
Gowns are to be worn over clothes when exposure to bodily fluids is expected during diagnostic or treatment procedures. Following the procedure, all materials should be discarded.
Masks/Eye Protection
Masks for the eyes and face should be worn when exposure to bodily fluids is expected during diagnostic or treatment procedures. Following the procedure, materials should be discarded or cleaned and stored.

First Aid Kit:
SLI has a first aid kit mounted on the wall in the hallway, to be used for minor cuts, etc. Clients requiring first aid should be referred to their family physician/pediatrician for follow-up care. Students should seek medical attention as needed.

Eye Wash Station:
SLI has an eye wash station mounted on the wall in the hallway should someone’s eyes be exposed to chemicals and/or bodily fluids. After rendering care, student or client should seek medical attention.

Spill Clean Up:
SLI has a spill clean-up kit available should potential infectious materials be required to be cleaned. Please follow the specific instructions included in the clean-up kit. Students and/or faculty should contact the university’s facilities department for disposal.

Material Safety Data Sheet (MSDS):
Material safety data sheets (MSDS) are available to students and staff for potentially harmful substances handled in the clinic under the Hazard Communication regulation. The MSDS provides students and faculty with procedures for handling or working with that substance in a safe manner, and includes information such as physical data (melting point, boiling point, flash point, etc.), toxicity, health effects, first aid, reactivity, storage, disposal, protective equipment, and spill-handling procedures. Hard copies are located at the administrative assistant’s desk, student room and faculty office.

CLIENT ACCIDENT/ILLNESS RESPONSE PROCEDURE

If a client or student becomes ill or has an accident while at SLI, respond as follows:

- Assess the seriousness of the illness of injury to determine the need for first aid or the need for instituting an emergency response (911).
- If first aid can be offered, proceed as appropriate.
- If an emergency response is required (i.e., 911):
  - DO NOT leave the client; instead, open the door and shout, “Supervisor needed in room X.” Repeat the call until confirmation from another student, faculty or staff person that help is on the way.
  - Call 911, and then notify the Office of Safety and Security.
  - Stay with the client until emergency help arrives.
- Report the incident to the Clinical Educator and to the Clinical Director.
- Complete the appropriate paperwork describing the incident, as provided by the Office of Safety and Security.
CRISIS SERVICES

Crisis is not simply the moment when things become intolerable. Crises build over time, and often can be recognized and managed in advance.

Montgomery County Mobile Crisis provides not only immediate support for crisis situations, but also assistance with managing recurring or future crises. Support is available 24 hours a day, 7 days a week at 1-855-634-HOPE (4673). This service is available to anyone in Montgomery County, including children, teens, adults, and families.

STAGES OF CRISIS MANAGEMENT

Before a crisis...
When you start to recognize the stressors that you or a loved one have felt during previous crises, please call Montgomery County’s peer support talk line at (855) 715-8255. It is available, free of charge, 7 days a week, 1:00pm to 9:00pm. Montgomery County also has a Teen Talk Line that can be reached by calling 866-825-5856 or texting 215-703-8411. It is available Monday through Friday, 3:00pm to 9:00pm.

During a crisis...
When you or a loved one are experiencing a crisis, Mobile Crisis is available to help. Just call (855) 634-HOPE (4673). The line is open 24 hours per day, 7 days per week.

After a crisis...
Mobile Crisis would like to help you develop ways to help reduce future crisis situations and create a crisis plan as part of your (or your child’s, or your family’s) recovery and wellness goals.

SERVICES
Montgomery County Mobile Crisis Support is provided by Access Services, and includes the following services:

- 24 hour telephone counseling
- Services provided in the individual’s home
- Assistance with developing strategies for reducing recurring crisis
- Support for drug/alcohol use or addiction
- Helping with past traumatic experiences
- Emergency respite
- Peer support
- Assistance connecting to local community resources

WHAT IF MOBILE CRISIS SUPPORTS ARE NOT ENOUGH?
Crisis Residential Services are short term residences for adults who are experiencing psychiatric crisis. If you support someone who requires emergency assistance due to imminent risk of harm to him/herself or others, please call Magellan Health Services at: (877) 769-9782. For TTY users, please call (87) 769-9783. The line is open 24 hours a day and seven days a week.
CLINICAL MATERIALS

Diagnostic and therapy materials are stored in the closets and cabinets within the clinic. Tests and materials are checked out by students prior to their scheduled session using a sign-out sheet. This sheet is mounted in the diagnostic closet.

When checking out an item, list the item(s), student name and the date/time checked out. When finished with the item(s) go the binder and enter the date/time returned. Do not give the test or materials to another student without changing the name on the binder. The student who checked out the materials last will be held responsible if it is not returned.

Tests may be checked out at the end of the day for overnight use. Use the same checkout procedure noted above. Test protocols are kept with the Office Manager, in order to track use and maintain threshold quantities. Staff will assist students to select the correct protocol.

Materials may be used in the planning and execution of therapy. Therapy materials are not to be taken out of the clinic, as other clinicians may need them. Picture cards must be put back in the box in the proper order and category. Care should be taken to return toys, games, and puzzles in the same condition, and to the same place they were found. Books, worksheets and therapy aids should be returned in the same condition they were found. Do not mark on the materials or allow a client to color or mark in them. Do not use original worksheets. If authorized, make copies to use in therapy.

Therapy materials and tests may not be taken to off-campus placements. Occasionally, an off-campus clinical supervisor may request to preview an item or a student may wish to use it for a short period of time. To make such a request, a letter or email requesting the item should be sent to the Clinical Director. The letter or email must be written on the appropriate agency letterhead or email system.

If a student is late returning a test or program on two occasions, then a conference with the Clinical Director is scheduled. A third offense may result in the suspension of checkout privileges. Tests and materials not returned to the office or damaged during careless use must be replaced by the person who checked them out. Every effort will be made to locate the lost test or program before the person is charged for a new copy.

OTHER CAMPUS RESOURCES

The following resources are helpful when creating therapy lessons, writing papers for class, or needing assistance with other academic areas:

Technology and Library Services (TLS)

Salus University has a full-time team housed under the auspices of Technology and Library Services (TLS) that respond to technology needs of the on- and off-campus university community.

Broadly, the TLS provides services in two areas: Client services that are responsible for assisting administrators, faculty, staff and students with technological services needed primarily through a Centralized Help Desk environment. Such services rendered to the aforementioned constituents may include, but are not limited to the following:
Support of the Blackboard Learning Environment
- Telephone and e-mail technological support and problem solving
- Equipment repair (computer, laboratory and clinical)
- Support for professional presentations (development of Power Point Slides, Scientific Poster Printing services)
- Information Processing including preparation of graphs and figures for scientific manuscripts submitted for publication, document scanning and grant writing support and formatting in preparation for electronic and mailed submission
- Scantron services including machine-generated student exams grading support and individual as well as cohort/group grading outcomes report generation
- Room-to-room (Point to Point) videoconferencing capability, preparation and management
- Webinar technological support (individual and group format)
- Purchase and preparation of laptop computer and iPad/iPhone hardware and software for course instruction with/or enrolled students (including uniformity with presence of course syllabi, electronic books (e-books) and journal articles, course examinations, providing external hard drives for information back-up by students)
- Wireless environment support
- Desktop computer problem solving and technical support

The second major service provided by TLS is networking support including problem solving, maintenance and network security. All of these services are readily available for students, part-time and full-time faculty and staff who are/will be involved with the program.

The Learning Resource Center

The Salus University library staff consists of full-time individuals who are academically trained in library sciences. The library facilities are located on the main campus and host a broad collection of items. The library includes computers which allow for easy access to information databases for student coursework and student/faculty research projects.

Utilizing Blackboard Learning System and MySalus, students will have access to a very broad array of learning resources. A Library Website has been published at: http://www.salus.edu/Academics/Gerard-Cottet-Library/Library-Catalog.aspx. A proxy service, running in Blackboard, enables any Salus student, faculty member, staffer, or distance education student to access all of our web-based resources from remote locations. A once-per-session login to the Blackboard system enables remote access. Numerous online resources are linked in the Library website pages.

The University has made available to faculty and students a package of commercially produced databases as an enhancement to our academic resources. Included in the package are several full text databases and the Cochrane Collection, which can be searched through a single search engine interface.

Alcon Lab

The design and purpose of the Alcon Lab promotes the interaction of students with the material being presented. Equipped with 42 computers, all connected to the instructor’s master computer, the lab offers students an interactive learning experience. This format lends itself to physiology, histology and anatomy courses, as the class is able to manipulate images and slides with the instructor’s feedback, input and direction. Group dynamics plus instructor interaction also allow for individual active learning, a critical component of any education. Available to students when not in...
use, the Alcon Lab becomes a study tool for students who want to review study and develop their base of knowledge.

**Bennett Career Services Center**

The Bennett Career Services Center currently provides educational programs and support services to students and alumni at Salus University.

Additional information may be found at: [http://www.salus.edu/Life/Student-Services/career-services.aspx](http://www.salus.edu/Life/Student-Services/career-services.aspx)

**Other Support Services**

Other student support services currently existent at Salus University include the Office of Admissions, the Registrar, and Office of Student Affairs (who deals with matters related to registration, student counseling, tutoring and student life on campus), Student Financial Aid, and the Center for Personal and Professional Development. Additionally, each student is assigned an academic advisor within their respective program who facilitates directing students to the appropriate support resources or facilities.

Additional information may be found at: [http://www.salus.edu/Life/Student-Services.aspx](http://www.salus.edu/Life/Student-Services.aspx)

**CERTIFICATION/LICENSURE**

If a student wishes to work as a professional in the field of speech-language pathology, he or she will find it very difficult to obtain a position unless he or she holds the ASHA Certificate of Clinical Competence (CCC). In most states, students will also have to obtain a state license and special certification to work in the schools.

**ASHA Certification**

Any student who completes the program of the Department of Speech-Language Pathology with a Master’s degree is eligible to apply for ASHA Certification (CCC- SLP). To do so, he or she must complete the following:

- Graduate coursework
- Supervised clinical practicum
- National Examination in Speech-Language Pathology (PRAXIS)
- Clinical Fellowship Year (CF)

The first two requirements are discussed throughout the SLP Student Handbook. The other two will be discussed briefly here. More details may be found by consulting the ASHA website at: [http://www.asha.org/](http://www.asha.org/).

*As previously mentioned, it is the student’s responsibility to assure that he or she fulfills all ASHA Certification requirements.*
National Examination

All master’s degree students should plan to take the examination at or near the completion of their coursework. Students may make arrangements to take this at specific times during the year. If students fail the examination, it may be repeated, but a passing score must be received before ASHA certification. Advisors or the department’s administrative assistant can provide registration materials the semester before the examination. More details may be found by consulting the PRAXIS website at: https://www.ets.org/praxis.

Clinical Fellowship Year

The Clinical Fellowship (CF) is completed after the master’s degree is granted. It may be completed during the first year of employment as a clinician, or it may be accomplished in certain settings as a 9 to 18 month special position. The CF must be supervised by a professional who holds the CCCs in the area of specialization (i.e., speech-language pathology) sought by the student. Specific requirements for the CF can be obtained from ASHA or from the Clinical Director or advisor.

School Certification

In some states, special licensure must be obtained by those who wish to work in the schools. In addition to meeting the ASHA requirements for certification mentioned above, students must take a practicum in a qualified setting (i.e., school) because many states require this for school-based practice and licensure. Please see the Clinical Director or advisor for further details.
Appendix A.

SEQUENCE OF EDUCATION EXPERIENCES

Fall Semester Year I

CER-SLP-5000-AA (3) Neuroscience
CER-SLP-5001-AA (2) Counseling Foundations in Communication Sciences & Disorders
CER-SLP-5100-AA (3) Articulation and Phonological Disorders
CER-SLP-5130-AA (2) Prevention, Assessment & Treatment of Communication Disorders in the Children: Zero to Five
CER-SLP-5230-AA (2) Adult Language Disorders 1: Aphasia and Right Hemisphere Damage
CER-SLP-5555-AA (1) Interprofessional Evidence Based Practice Course
CER-SLP-6000-AA (2) Clinical Foundations

Spring Semester Year I

CER-SLP-5002-AA (2) Applied Integrative Anatomy for Speech-Language Pathology
CER-SLP-5005-AA (1) Cleft Palate and Craniofacial Anomalies
CER-SLP-5131-AA (2) Prevention, Assessment, & Treatment of Communication Disorders in School-Aged Children: Six to Twenty-One
CER-SLP-5231-AA (3) Adult Language Disorders 2: Traumatic Brain Injury and the Dementias
CER-SLP-5400-AA (2) Research Design and Application of Evidence Based Practice in Speech-Language Pathology (includes students identifying Capstone Project Topic)
CER-SLP-5401-AA (3) Dysphagia
CER-SLP-6030-AA (2) Clinical Management and Practicum 1

Summer Semester Year I

CER-SLP-5003-AA (2) Communication Disorders in Culturally and Linguistically Diverse Populations
CER-SLP-5300-AA (2) Motor Speech Disorders
CER-SLP-5301-AA (2) Autism Spectrum Disorders
CER-SLP-5302-AA (2) Fluency Disorders
CER-SLP-5303-AA (2) Voice Disorders
CER-SLP-6031-AA (2) Clinical Management and Practicum 2

Fall Semester Year II

CER-SLP-5030-AA (2) Special Topics Seminar 1
CER-SLP-5304-AA (2) Technology in Speech-Language Pathology: Augmentative and Alternative Communication and Computer Applications
CER-SLP-5500-AA (2) Aural Habilitation/Rehabilitation
CER-SLP-6031-AA (3) Clinical Management and Practicum 3

Spring Semester Year II

CER-SLP-5004-AA (2) Professional Issues and Ethics in Speech-Language Pathology
CER-SLP-5031-AA (2) Special Topics Seminar 2
CER-SLP-5402-AA (2) Capstone Project in Speech-Language Pathology
CER-SLP-6033-AA (3) Clinical Management and Practicum 4
Appendix B.

COURSE DESCRIPTIONS

CER-SLP-5000-AA  Neuroscience  
(3 credits)

An overview of the anatomy and physiology (structure and function) of the central nervous system (CNS) and the peripheral nervous system (PNS). Special emphasis is placed on how these structures support the production of speech, language, cognition, voice and swallowing. Communication and swallowing disorders associated with pathophysiology of the CNS and PNS are also presented.

CER-SLP-5001-AA  Counseling Foundations in Communication Disorders  
(2 credits)

An introduction to counseling skills needed by speech-language pathologists in their daily interactions with clients/patients and their families. A broad overview of counseling theories and techniques will be provided, with an emphasis throughout the course on “positive psychology” and a mind-body wellness perspective. Discussion and practice of effective communication techniques, including verbal, nonverbal, and interpersonal communication is presented. Students will understand the emotional needs of individuals with communication disorders and their families, and how communication disorders affect the family system. Counseling needs of individuals with specific communication disorders will be discussed, including those with fluency disorders, autism spectrum disorders, hearing loss, acquired/adult language and cognitive disorders, dysphagia and congenital disorders.

CER-SLP-5002-AA  Applied Integrative Anatomy for SLP  
(2 credits)

Lecture and lab provide students with a background in gross human anatomy using body parts of cadavers. Emphasis is on body structures supporting the speech, voice and swallowing mechanisms, including anatomical structures associated with respiration, phonation, articulation/resonance and mechanics of swallowing using upper and lower digestive systems.

CER-SLP-5003-AA  Communication Disorders in Culturally and Linguistically Diverse Populations  
(2 credits)

Foundational issues involved in serving culturally and linguistically diverse populations with a focus on developing and exhibiting cultural competence when conducting interviews, patient/family education and counseling. Investigates how to collect data on relevant cultural and linguistic background and incorporate this information into the therapeutic process. Consideration is given to reliability and validity of standardized assessment tools based on those culturally distinct populations that were used by authors of the examinations to obtain normative data. Treatment approaches that respect and incorporate the cultural-linguistic background of the patient and family members will also be discussed.
CER-SLP-5004-AA  Professional Issues and Ethics in Speech-Language Pathology
(2 credits)

Issues related to employment settings, job exploration/preparation, credentialing and licensure application and acquisition, trends in service delivery, ethics, legal considerations and professional advocacy including state, national and international politics and laws associated with speech-language pathology. Course content parallels guidelines associated with the American Speech-Language-Hearing Association (ASHA) Scope of Practice, Code of Ethics, Preferred Practice Patterns and credentialing guidelines established by the ASHA Council for Clinical Certification. Professional leadership, ASHA, state associations and community volunteerism, including patient/client advocacy will be discussed and encouraged.

CER-SLP-5005-AA  Cleft Palate and Craniofacial Anomalies
(1 credit)

A comprehensive study of the definitions, characteristics, classifications, epidemiology, pathophysiology, etiologies, and differential diagnosis of cleft palate and other craniofacial anomalies. Formal and informal assessment tools and intervention strategies will be presented.

CER-SLP-5030-AA  Special Topics Seminar 1
(2 credits)

Topics of current interest to the profession of speech-language pathology. Guest lecturers and research literature related to speech, language, voice, swallowing and contemporary professional issues will be incorporated. The intent of this seminar is to expand upon the overall understanding of the discipline of speech-language pathology by presenting topics not routinely covered in a standard speech-language pathology curriculum. Topics may vary from year-to-year depending on the current state-of-the art or ‘hot topics’ being discussed at the state, national and international levels.

CER-SLP-5031-AA  Special Topics Seminar 2
(2 credits)

Continuation of topics of current interest to the profession of speech-language pathology using guest lecturers and research literature to discuss speech, language, voice, swallowing and contemporary professional issues.

CER-SLP-5100-AA  Articulation and Phonological Disorders
(3 credits)

Articulatory phonetics, phonological processes and backward and forward co-articulation are presented. Contemporary assessment and intervention tools for articulatory and phonological delays and disorders, including specific remediation procedures are demonstrated.

CER-SLP-5130-AA  Prevention, Assessment and Treatment of Communication Disorders in Children: Zero to Five
(2 credits)

Etiologies, risk factors, inter-disciplinary assessment and analysis of language disorders in infants, toddlers, and preschool aged children using formal and informal measures. Language facilitation and intervention strategies are presented. Includes practice in the self-directed hand based and computerized analysis of child speech and language samples.
CER-SLP-5131-AA  Prevention, Assessment and Treatment of Communication Disorders in School-Aged Children: 6-21  
(2 credits)

A comprehensive study of children's phonologic, morphemic, syntactic, semantic, pragmatic and emerging literacy impairments with focus on etiologies, characteristics, and associated risk factors. Formal and informal assessment methods, service delivery models (i.e., classroom interactions between the teacher and speech-language pathologist) and intervention strategies in our culturally and linguistically diverse population are presented. The role of the speech-language pathologist in assisting with the development of Individualized Education Plans (IEPs) is discussed.

CER-SLP-5230-AA  Adult Language Disorders 1: Aphasia and Right Hemisphere Damage  
(2 credits)

Definitions, characteristics, classifications, epidemiology, pathophysiology, etiologies, differential diagnosis of aphasia and cognitive-linguistic disorders associated with right brain hemisphere syndrome. Formal and informal assessment tools and intervention strategies will be presented.

CER-SLP-5231-AA  Adult Language Disorders 2: Traumatic Brain Injury and the Dementias  
(3 credits)

CER-SLP-5300-AA  Motor Speech Disorders  
(2 credits)

An overview of pathophysiology and the symptomatology of the dysarthrias and apraxia of speech. Assessment, differential diagnosis and treatment of developmental and acquired apraxia of speech and the dysarthrias are discussed. Classification schemes will be presented as will diagnostic and intervention strategies using evidence-based practice research. Both perceptual and objective measures of dysarthric and apraxic speech will be examined.

CER-SLP-5301-AA  Autism Spectrum Disorders  
(2 credits)

Current research on the epidemiology, etiologies and characteristics associated with various clients along the autism continuum. Assessment and clinical management strategies for pediatric and adult populations with autism are discussed. Client and family education and community intervention approaches and supportive resources are presented.

CER-SLP-5302-AA  Fluency Disorders  
(2 credits)

Etiologies, epidemiology characteristics and classifications of persons with fluency disorders are presented. Diagnosis and therapeutic intervention for both pediatric and adult populations who exhibit stuttering and cluttering behaviors are discussed.
CER-SLP-5303-AA  Voice Disorders  
(2 credits)

Study of normal laryngeal physiology, vocal hyperfunction and vocal pathophysiology ranging from vocal nodules and polyps to vocal cord paralysis and cancer of the larynx are presented, including functional/behavioral, organic and neurogenic etiologies of voice disorders. Perceptual and objective diagnostic measures and specific intervention techniques are presented. Research studies examining evidence-based practice, care of the professional voice and prevention of voice disorders will also be incorporated as part of the course.

CER-SLP-5304-AA  Technology in Speech-Language Pathology:  Augmentative and Alternative Communication and Computer Applications  
(2 credits)

Assessment strategies and AAC systems ranging from simple communication picture and alphanumeric boards to highly technical and sophisticated electronic speaking boards using artificial voices to improve the communication skills of individuals with limited or nonfunctional speech-language production will be discussed, demonstrated and used. Students will also be introduced to hardware and software computer applications in speech-language pathology that can be incorporated in the diagnostic and therapeutic process.

CER-SLP-5400-AA  Research Design and Application of Evidenced Based Practice in Speech-Language Pathology  
(2 credits)

Strategies and methodology in the design and analysis of research in communication sciences and disorders. Includes a module on how to find and identify the most efficacious and efficient evidence for clinical application in the diagnosis and treatment of communication disorders. Students will also identify a research topic that will be used throughout the remainder of their studies as their Capstone Project topic.

CER-SLP-5401-AA  Dysphagia  
(3 credits)

Normal anatomy and physiology of mastication and deglutition (chewing and swallowing) as well as disrupted stages of feeding and swallow are presented for pediatric, adult and elderly patients. Discussion of etiologies and characteristics of swallowing disorders are presented. Interprofessional education and inter-collaborative service models are described in the diagnosis and treatment of dysphagia along with current research indicative of best practices.

CER-SLP-5402-AA  Capstone Project in Speech-Language Pathology  
(2 credits)

Culmination of a research, special clinical service delivery and/or community education and service project that is student directed. Projects are mentored into fruition by faculty in the Department of Speech-Language Pathology. Student presentations (poster and oral) to the faculty, student peers within the department and fellow students and faculty across the university.
CER-SLP-5500-AA  Aural Habilitation/Rehabilitation  
(2 credits)

Application of methods and procedures for management of the individual with a hearing 
impairment and the role of the speech-language pathologist. Includes language, speech, auditory 
training, speech-reading, and subject-matter tutoring.

CER-SLP-5555-AA  Interprofessional Evidence Based Practice Course  
(1 credit)

A highly interactive, interprofessional course taught across all of the health sciences academic 
programs at the University. Helps students understand how evidence based practice tools are 
applied to clinical training, clinical problem solving and most importantly, clinical practice.

CER-SLP-6000-AA  Clinical Foundations  
(2 credits)

An introduction to clinical policies, procedures and processes including: development and 
recording a case history; conducting patient and family/caregiver interviews; basic principles of 
assessment; differential diagnosis; report writing including long- and short-term goals; 
development of clinical lesson plans; generating patient progress notations (e.g., SOAP notes, 
computerized progress checklists, narrative notes), and use of effective communication strategies 
(verbal, non-verbal and interpersonal ‘soft’ skills) when interacting with the patient and family 
members. Clinical problem solving cases using SimuCase and/or actors who mimic various 
communication disorders are included for individual and small group analysis. Also includes 
actively engaged student observations and analysis of diagnostic and therapeutic techniques and 
settings (videotaped and/or real-time) by trained, certified (CCC-SLP) speech-language 
pathologists.

CER-SLP-6030-AA  Clinical Management and Practicum 1  
(2 credits)

Development of clinical decision-making skills and applying those skills to evaluate and treat 
pediatric, adult and elderly clients with various communication disorders. Includes the use of 
appropriate interview and counseling techniques with clients and family members from various 
cultural and linguistic backgrounds. Student-generated long- and short-term goal setting, 
diagnostic and treatment lesson planning, clinical session preparation of materials and 
reinforcement award systems for patient motivation and active participation; establishing 
measureable outcome data and incorporating clinical techniques used and resulting outcome data 
measures for progress notation and report writing under the close supervision of on-campus 
clinical educators. Clinical session planning and implementation will involve students working in 
pairs and individually at the Salus University on-campus clinic.

CER-SLP-6031-AA  Clinical Management and Practicum 2  
(2 credits)

Self-directed student-generated evaluation and treatment of children, adults and the elderly with 
communication disorders at the Salus University on-campus clinic under the supervision of ASHA 
certified faculty and clinical educators. Real-life application of clinic foundational knowledge, skills 
and materials while earning clinic hours under the supervision of ASHA-certified (CCC-SLP) and 
Pennsylvania state-licensed speech-language pathologists. More independent student clinicians 
who demonstrate expected didactic knowledge and clinical competencies at this stage will be
placed in their first off-campus external placement site under certified and licensed speech-language pathologists who will serve as externship clinical supervisors.

CER-SLP-6032-AA  Clinical Management and Practicum 3
(3 credits)

External clinical placement site involving hospital, rehabilitation, private and public schools, preschools, skilled nursing facilities, home-based and private practice clinical settings. Students are supervised by a certified and licensed external placement site speech-language pathologist. Adaptation of time-schedule for service delivery, workload requirements as well as the particulars involving report writing, individual education plans (IEPs) progress notation, billing procedures, interprofessional team patient care management using a case manager (usually a nurse or social worker), work related policies and procedures and other duties as assigned are experienced by the student clinician.

CER-SLP-6033-AA  Clinical Management and Practicum 4
(3 credits)

Full-time evaluation and treatment of pediatric, adult and/or elderly patients with communication disorders or dysphagia in an external clinical setting under supervision of an external site certified and licensed speech-language pathologist.
Appendix C.

Standards for Accreditation of Graduate Education Programs in Audiology and Speech-Language Pathology

Approved February 2016 | Last Updated October 2017
Effective August 1, 2017

Introduction
The Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association (ASHA) accredits graduate programs that prepare individuals to enter professional practice in audiology or speech-language pathology. The CAA and its predecessors were established by ASHA, which authorized the CAA to function autonomously in setting and implementing standards and awarding accreditation. The CAA is recognized by the Council for Higher Education Accreditation (CHEA) and by the U.S. Secretary of Education as the accrediting body for the accreditation and pre-accreditation (accreditation candidate) of education programs leading to the first professional or clinical degree at the master's or doctoral level and for the accreditation of these programs offered via distance education, throughout the United States.

Accreditation by the CAA indicates that a program is committed to excellence and ongoing quality improvement so that students and the public are assured that graduates are prepared to meet the challenges they will face when entering the workforce.

The accreditation standards have been written to address six essential components. The standards are designed to ensure that, when programs are in full compliance, their graduate students are prepared to function in the complex and ever-changing service provision (or delivery) arenas.

Professional Practice Competencies (3.1.1B)
The program must provide content and opportunities for students to learn so that each student can demonstrate the following attributes and abilities and demonstrate those attributes and abilities in the manners identified.

Accountability
- Practice in a manner that is consistent with the professional code of ethics and the scope of practice documents for the profession of speech-language pathology.
- Adhere to federal, state, and institutional regulations and policies that are related to services provided by speech-language pathologists.
- Understand the fiduciary responsibility for each individual served.
- Understand the various models of delivery of speech-language pathology services (e.g., hospital, private practice, education, etc.).
- Use self-reflection to understand the effects of his/her actions and makes changes accordingly.
- Understand the health care and education landscape and how to facilitate access to services.
- Understand how to work on interprofessional teams to maintain a climate of mutual respect and shared values.
Integrity

- Use the highest level of clinical integrity with each individual served, family members, caregivers, other service providers, students, other consumers, and payers; and
- Understand and use best professional practices related to maintenance of confidentiality for all individuals in accordance with HIPAA and FERPA requirements.

Effective Communication Skills

- Use all forms of expressive communication—including written, spoken, and nonverbal communication—with individuals served, family members, caregivers, and any others involved in the interaction to ensure the highest quality of care that is delivered in a culturally competent manner.
- Communicate—with patients, families, communities, and interprofessional team colleagues and other professionals caring for individuals in a responsive and responsible manner that supports a team approach to maximize care outcomes.

Clinical Reasoning

- Use valid scientific and clinical evidence in decision-making regarding assessment and intervention.
- Apply current knowledge, theory, and sound professional judgment in approaches to intervention and management of individuals served.
- Use clinical judgment and self-reflection to enhance clinical reasoning.

Evidence-Based Practice

- Access sources of information to support clinical decisions regarding assessment and intervention/management,
- Critically evaluate information sources and applies that information to appropriate populations, and
- Integrate evidence in provision of speech-language pathology services.

Concern for Individuals Served

- Show evidence of care, compassion, and appropriate empathy during interactions with each individual served, family members, caregivers, and any others involved in care; and
- Encourage active involvement of the individual served in his or her own care.

Cultural Competence

- Understand the impact of his or her own set of cultural and linguistic variables on delivery of effective care. These include, but are not limited to, variables such as age, ethnicity, linguistic background, national origin, race, religion, gender, and sexual orientation.
- Understand the impact of the cultural and linguistic variables of the individuals served on delivery of care. These include but are not limited to variables such as age, ethnicity, linguistic background, national origin, race, religion, gender, and sexual orientation.
- Understand the interaction of cultural and linguistic variables between the caregivers and the individuals served in order to maximize service delivery.
- Understand the characteristics of the individuals served (e.g., age, demographics, cultural and linguistic diversity, educational history and status, medical history and status, cognitive status, and physical and sensory abilities) and how these characteristics relate to clinical services.
Professional Duty

- Engage in self-assessment to improve his or her effectiveness in the delivery of services.
- Understand the roles and importance of professional organizations in advocating for rights to access to speech-language pathology services.
- Understand the role of clinical teaching and clinical modeling as well as supervision of students and other support personnel.
- Understand the roles and importance of interdisciplinary/interprofessional assessment and intervention and be able to interact and coordinate care effectively with other disciplines and community resources.
- Understand and practice the principles of universal precautions to prevent the spread of infectious and contagious diseases.
- Understand and use the knowledge of one’s own role and those of other professions to appropriately assess and address the needs of the individuals and populations served.

Collaborative Practice

- Understand how to apply values and principles of interprofessional team dynamics.
- Understand how to perform effectively in different interprofessional team roles to plan and deliver care centered on the individual served that is safe, timely, efficient, effective, and equitable.

Foundations of Speech-Language Pathology Practice (3.1.2B)

The program must include content and opportunities to learn so that each student can demonstrate knowledge of the:

- discipline of human communication sciences and disorders;
- basic human communication and swallowing processes, including the appropriate biological, neurological, acoustic, psychological, developmental, and linguistic and cultural bases;
- ability to integrate information pertaining to normal and abnormal human development across the life span;
- nature of communication and swallowing processes
  - elements
    - articulation;
    - fluency;
    - voice and resonance, including respiration and phonation;
    - receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities;
    - hearing, including the impact on speech and language;
    - swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology);
    - cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning);
    - social aspects of communication (e.g., behavioral and social skills affecting communication);
    - augmentative and alternative communication.
  - knowledge of the above elements includes each of the following:
    - etiology of the disorders or differences,
    - characteristics of the disorders or differences,
• underlying anatomical and physiological characteristics of the disorders or differences,
• acoustic characteristics of the disorders or differences (where applicable),
• psychological characteristics associated with the disorders or differences,
• developmental nature of the disorders or differences,
• linguistic characteristics of the disorders or differences (where applicable),
• cultural characteristics of the disorders or differences.

Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences (3.1.3B)
The program must include content and opportunities to learn so that each student can demonstrate knowledge of

• principles and methods of identification of communication and swallowing disorders and differences,
• principles and methods of prevention of communication and swallowing disorders.

Evaluation of Speech, Language, and Swallowing Disorders and Differences (3.1.4B)
The program must include content and opportunities to learn so that each student can demonstrate knowledge and skills in assessment across the lifespan for disorders and differences associated with

• articulation;
• fluency;
• voice and resonance, including respiration and phonation;
• receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities;
• hearing, including the impact on speech and language;
• swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology);
• cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning);
• social aspects of communication (e.g., behavioral and social skills affecting communication); and
• augmentative and alternative communication needs.

Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms (3.1.5B)
The program must include content and opportunities to learn so that each student can demonstrate knowledge and skills in

• intervention for communication and swallowing differences with individuals across the lifespan to minimize the effect of those disorders and differences on the ability to participate as fully as possible in the environment.
• intervention for disorders and differences of
  • articulation;
  • fluency;
• voice and resonance, including respiration and phonation;
• receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities;
• hearing, including the impact on speech and language;
• swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology);
• cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning);
• social aspects of communication (e.g., behavioral and social skills affecting communication);
• augmentative and alternative communication needs.

General Knowledge and Skills Applicable to Professional Practice (3.1.6B)
The program must include content and opportunities to learn so that each student acquires knowledge and skills in working with individuals with the aforementioned communication and swallowing disorders across the lifespan and by demonstration of

• ethical conduct;
• integration and application of knowledge of the interdependence of speech, language, and hearing;
• engagement in contemporary professional issues and advocacy;
• processes of clinical education and supervision;
• professionalism and professional behavior in keeping with the expectations for a speech-language pathologist;
• interaction skills and personal qualities, including counseling and collaboration;
• self-evaluation of effectiveness of practice.

Introduction

The Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) is a semi-autonomous credentialing body of the American Speech-Language-Hearing Association. The charges to the CFCC are: to define the standards for clinical certification; to apply those standards in granting certification to individuals; to have final authority to withdraw certification in cases where certification has been granted on the basis of inaccurate information; and to administer the certification maintenance program.

A Practice and Curriculum Analysis of the Profession of Speech-Language Pathology was conducted in 2009 under the auspices of the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) and the CFCC. The survey analysis was reviewed by the CFCC, and the following standards were developed to better fit current practice models.

The 2014 standards and implementation procedures for the Certificate of Clinical Competence in Speech-Language Pathology are now in effect as of September 1, 2014. View the SLP Standards Crosswalk [PDF] for more specific information on how the standards have changed.

Citation

Standard I: Degree

The applicant for certification must have a master's, doctoral, or other recognized post-baccalaureate degree.

Implementation: The Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) has the authority to determine eligibility of all applicants for certification.

Standard II: Education Program

All graduate course work and graduate clinical experience required in speech-language pathology must have been initiated and completed in a speech-language pathology program accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA).

Implementation: If the graduate program of study is initiated and completed in a CAA-accredited program or in a program that held candidacy status for CAA accreditation, and if the program director or official designee verifies that all knowledge and skills required at the time of application have been met, approval of academic course work and practicum is automatic. Applicants eligible for automatic approval must submit an official graduate transcript or a letter from the registrar that
verify the date the graduate degree was awarded. The official graduate transcript or letter from the registrar must be received by the National Office no later than 1 year from the date the application was received. Verification of the graduate degree is required of the applicant before the certificate is awarded.

Individuals educated outside the United States or its territories must submit documentation that course work was completed in an institution of higher education that is regionally accredited or recognized by the appropriate regulatory authority for that country. In addition, applicants outside the United States or its territories must meet each of the standards that follow.

**Standard III: Program of Study**

The applicant for certification must have completed a program of study (a minimum of 36 semester credit hours at the graduate level) that includes academic course work and supervised clinical experience sufficient in depth and breadth to achieve the specified knowledge and skills outcomes stipulated in Standard IV-A through IV-G and Standard V-A through V-C.

*Implementation:* The minimum of 36 graduate semester credit hours must have been earned in a program that addresses the knowledge and skills pertinent to the ASHA Scope of Practice in Speech-Language Pathology.

**Standard IV: Knowledge Outcomes**

**Standard IV-A**

The applicant must have demonstrated knowledge of the biological sciences, physical sciences, statistics, and the social/behavioral sciences.

*Implementation:* Acceptable courses in biological sciences should emphasize a content area related to human or animal sciences (e.g., biology, human anatomy and physiology, neuroanatomy and neurophysiology, human genetics, veterinary science). Acceptable courses in physical sciences should include physics or chemistry. Acceptable courses in social/behavioral sciences should include psychology, sociology, anthropology, or public health. A stand-alone course in statistics is required. Research methodology courses in communication sciences and disorders (CSD) may not be used to satisfy the statistics requirement. A course in biological and physical sciences specifically related to CSD may not be applied for certification purposes to this category unless the course fulfills a university requirement in one of these areas.

Academic advisors are strongly encouraged to enroll students in courses in the biological, physical, and the social/behavioral sciences in content areas that will assist students in acquiring the basic principles in social, cultural, cognitive, behavioral, physical, physiological, and anatomical areas useful to understanding the communication/linguistic sciences and disorders.

**Standard IV-B**

The applicant must have demonstrated knowledge of basic human communication and swallowing processes, including the appropriate biological, neurological, acoustic, psychological, developmental, and linguistic and cultural bases. The applicant must have demonstrated the ability to integrate information pertaining to normal and abnormal human development across the life span.
Standard IV-C

The applicant must have demonstrated knowledge of communication and swallowing disorders and differences, including the appropriate etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates in the following areas:

- articulation;
- fluency;
- voice and resonance, including respiration and phonation;
- receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication and paralinguistic communication) in speaking, listening, reading, writing;
- hearing, including the impact on speech and language;
- swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding, orofacial myology);
- cognitive aspects of communication (attention, memory, sequencing, problem-solving, executive functioning);
- social aspects of communication (including challenging behavior, ineffective social skills, and lack of communication opportunities);
- augmentative and alternative communication modalities.

Implementation: It is expected that course work addressing the professional knowledge specified in Standard IV-C will occur primarily at the graduate level.

Standard IV-D

For each of the areas specified in Standard IV-C, the applicant must have demonstrated current knowledge of the principles and methods of prevention, assessment, and intervention for people with communication and swallowing disorders, including consideration of anatomical/physiological, psychological, developmental, and linguistic and cultural correlates.

Standard IV-E

The applicant must have demonstrated knowledge of standards of ethical conduct.

Implementation: The applicant must have demonstrated knowledge of the principles and rules of the current ASHA Code of Ethics.

Standard IV-F

The applicant must have demonstrated knowledge of processes used in research and of the integration of research principles into evidence-based clinical practice.

Implementation: The applicant must have demonstrated knowledge of the principles of basic and applied research and research design. In addition, the applicant must have demonstrated knowledge of how to access sources of research information and have demonstrated the ability to relate research to clinical practice.

Standard IV-G

The applicant must have demonstrated knowledge of contemporary professional issues.
Implementation: The applicant must have demonstrated knowledge of professional issues that affect speech-language pathology. Issues typically include trends in professional practice, academic program accreditation standards, ASHA practice policies and guidelines, and reimbursement procedures.

Standard IV-H

The applicant must have demonstrated knowledge of entry level and advanced certifications, licensure, and other relevant professional credentials, as well as local, state, and national regulations and policies relevant to professional practice.

Standard V: Skills Outcomes

Standard V-A

The applicant must have demonstrated skills in oral and written or other forms of communication sufficient for entry into professional practice.

Implementation: Individuals are eligible to apply for certification once they have completed all graduate-level academic course work and clinical practicum and been judged by the graduate program as having acquired all of the knowledge and skills mandated by the current standards.

The applicant must have demonstrated communication skills sufficient to achieve effective clinical and professional interaction with clients/patients and relevant others. For oral communication, the applicant must have demonstrated speech and language skills in English, which, at a minimum, are consistent with ASHA's current position statement on students and professionals who speak English with accents and nonstandard dialects. In addition, the applicant must have demonstrated the ability to write and comprehend technical reports, diagnostic and treatment reports, treatment plans, and professional correspondence in English.

Standard V-B

The applicant for certification must have completed a program of study that included experiences sufficient in breadth and depth to achieve the following skills outcomes:

1. Evaluation
   a. Conduct screening and prevention procedures (including prevention activities).
   b. Collect case history information and integrate information from clients/patients, family, caregivers, teachers, and relevant others, including other professionals.
   c. Select and administer appropriate evaluation procedures, such as behavioral observations, nonstandardized and standardized tests, and instrumental procedures.
   d. Adapt evaluation procedures to meet client/patient needs.
   e. Interpret, integrate, and synthesize all information to develop diagnoses and make appropriate recommendations for intervention.
   f. Complete administrative and reporting functions necessary to support evaluation.
   g. Refer clients/patients for appropriate services.

2. Intervention
   a. Develop setting-appropriate intervention plans with measurable and achievable goals that meet clients'/patients' needs. Collaborate with clients/patients and relevant others in the planning process.
   b. Implement intervention plans (involve clients/patients and relevant others in the
c. Select or develop and use appropriate materials and instrumentation for prevention and intervention.
d. Measure and evaluate clients'/patients' performance and progress.
e. Modify intervention plans, strategies, materials, or instrumentation as appropriate to meet the needs of clients/patients.
f. Complete administrative and reporting functions necessary to support intervention.
g. Identify and refer clients/patients for services as appropriate.

3. Interaction and Personal Qualities
   a. Communicate effectively, recognizing the needs, values, preferred mode of communication, and cultural/linguistic background of the client/patient, family, caregivers, and relevant others.
b. Collaborate with other professionals in case management.
c. Provide counseling regarding communication and swallowing disorders to clients/patients, family, caregivers, and relevant others.
d. Adhere to the ASHA Code of Ethics and behave professionally.

Implementation: The applicant must have acquired the skills referred to in this standard applicable across the nine major areas listed in Standard IV-C. Skills may be developed and demonstrated by direct client/patient contact in clinical experiences, academic course work, labs, simulations, examinations, and completion of independent projects.

The applicant must have obtained a sufficient variety of supervised clinical experiences in different work settings and with different populations so that he or she can demonstrate skills across the ASHA Scope of Practice in Speech-Language Pathology. Supervised clinical experience is defined as clinical services (i.e., assessment/diagnosis/evaluation, screening, treatment, report writing, family/client consultation, and/or counseling) related to the management of populations that fit within the ASHA Scope of Practice in Speech-Language Pathology.

These experiences should allow students to:

- interpret, integrate, and synthesize core concepts and knowledge;
- demonstrate appropriate professional and clinical skills; and
- incorporate critical thinking and decision-making skills while engaged in identification, evaluation, diagnosis, planning, implementation, and/or intervention.

Alternative clinical experiences may include the use of standardized patients and simulation technologies (e.g., standardized patients, virtual patients, digitized mannequins, immersive reality, task trainers, computer-based interactive).

Supervisors of clinical experiences must hold a current ASHA Certificate of Clinical Competence in the appropriate area of practice during the time of supervision. The supervised activities must be within the ASHA Scope of Practice in Speech-Language Pathology to count toward certification.

Standard V-C

The applicant for certification in speech-language pathology must complete a minimum of 400 clock hours of supervised clinical experience in the practice of speech-language pathology. Twenty-five hours must be spent in clinical observation, and 375 hours must be spent in direct client/patient contact.

Implementation: Guided observation hours generally precede direct contact with clients/patients. The observation and direct client/patient contact hours must be within the ASHA Scope of Practice in Speech-Language Pathology and must be under the supervision of a qualified professional who
holds current ASHA certification in the appropriate practice area. Such supervision may occur simultaneously with the student's observation or afterwards through review and approval of written reports or summaries submitted by the student. Students may use video recordings of client services for observation purposes.

Applicants should be assigned practicum only after they have acquired sufficient knowledge bases to qualify for such experience. Only direct contact with the client or the client's family in assessment, intervention, and/or counseling can be counted toward practicum. Up to 20% (i.e., 75 hours) of direct contact hours may be obtained through clinical simulation (CS) methods. Only the time spent in active engagement with the CS may be counted. CS may include the use of standardized patients and simulation technologies (e.g., standardized patients, virtual patients, digitized mannequins, immersive reality, task trainers, computer-based interactive). Debriefing activities may not be included. Although several students may observe a clinical session at one time, clinical practicum hours should be assigned only to the student who provides direct services to the client or client's family. Typically, only one student should be working with a given client at a time in order to count the practicum hours. It is possible for several students working as a team to receive credit for the same session, depending on the specific responsibilities each student is assigned. The applicant must maintain documentation of time spent in supervised practicum, verified by the program in accordance with Standards III and IV.

**Standard V-D**

At least 325 of the 400 clock hours must be completed while the applicant is engaged in graduate study in a program accredited in speech-language pathology by the Council on Academic Accreditation in Audiology and Speech-Language Pathology.

*Implementation:* A minimum of 325 clock hours of clinical practicum must be completed at the graduate level. At the discretion of the graduate program, hours obtained at the undergraduate level may be used to satisfy the remainder of the requirement.

**Standard V-E**

Supervision must be provided by individuals who hold the Certificate of Clinical Competence in the appropriate profession. The amount of direct supervision must be commensurate with the student's knowledge, skills, and experience, must not be less than 25% of the student's total contact with each client/patient, and must take place periodically throughout the practicum. Supervision must be sufficient to ensure the welfare of the client/patient.

*Implementation:* Direct supervision must be in real time. A supervisor must be available to consult with a student providing clinical services to the supervisor's client. Supervision of clinical practicum is intended to provide guidance and feedback and to facilitate the student's acquisition of essential clinical skills. The amount of direct supervision must be commensurate with the student's knowledge, skills, and experience, must not be less than 25% of the student's total contact with each client/patient, and must take place periodically throughout the practicum. Supervision must be sufficient to ensure the welfare of the client/patient.

**Standard V-F**

Supervised practicum must include experience with client/patient populations across the life span and from culturally/linguistically diverse backgrounds. Practicum must include experience with client/patient populations with various types and severities of communication and/or related disorders, differences, and disabilities.
Implementation: The applicant must demonstrate direct client/patient clinical experiences in both assessment and intervention with both children and adults from the range of disorders and differences named in Standard IV-C.

Standard VI: Assessment

The applicant must have passed the national examination adopted by ASHA for purposes of certification in speech-language pathology.

Implementation: Results of the Praxis Examination in Speech-Language Pathology must be submitted directly to ASHA from ETS. The certification standards require that a passing exam score must be earned no earlier than 5 years prior to the submission of the application and no later than 2 years following receipt of the application. If the exam is not successfully passed and reported within the 2-year application period, the applicant's certification file will be closed. If the exam is passed or reported at a later date, the individual will be required to reapply for certification under the standards in effect at that time.

Standard VII: Speech-Language Pathology Clinical Fellowship

The applicant must successfully complete a Speech-Language Pathology Clinical Fellowship (CF).

Implementation: The CF may be initiated only after completion of all academic course work and clinical experiences required to meet the knowledge and skills delineated in Standards IV and V. The CF experience must be initiated within 24 months of the date the application is received. Once the CF has been initiated, it must be completed within 48 months. For applicants completing multiple CFs, all CF experiences related to the application must be completed within 48 months of the date the first CF was initiated. Applications will be closed for a CF/CFs that is/are not completed within the 48-month timeframe or that is/are not reported to ASHA within 90 days after the 48-month timeframe. The Clinical Fellow will be required to reapply for certification and must meet the Standards in effect at the time of re-application. CF experiences older than 5 years at the time of application will not be accepted.

The CF must have been completed under the mentorship of an individual who held the ASHA Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) throughout the duration of the CF. It is the Clinical Fellow's responsibility to identify a mentoring speech-language pathologist (SLP) who holds an active Certificate of Clinical Competence in Speech-Language Pathology. Should the certification status of the mentoring SLP change during the CF experience, the Clinical Fellow will be awarded credit only for that portion of time during which the mentoring SLP held certification. It, therefore, is incumbent on the CF to verify the mentoring SLP's status periodically throughout the CF experience. A family member or individual related in any way to the Clinical Fellow may not serve as a mentoring SLP.

Standard VII-A: Clinical Fellowship Experience

The Clinical Fellowship must have consisted of clinical service activities that foster the continued growth and integration of knowledge, skills, and tasks of clinical practice in speech-language pathology consistent with ASHA's current Scope of Practice in Speech-Language Pathology. The Clinical Fellowship must have consisted of no less than 36 weeks of full-time professional experience or its part-time equivalent.

Implementation: No less than 80% of the Fellow's major responsibilities during the CF experience must have been in direct client/patient contact (e.g., assessment, diagnosis, evaluation, screening, treatment, clinical research activities, family/client consultations, recordkeeping, report writing,
and/or counseling) related to the management process for individuals who exhibit communication and/or swallowing disabilities.

Full-time professional experience is defined as 35 hours per week, culminating in a minimum of 1,260 hours. Part-time experience of less than 5 hours per week will not meet the CF requirement and will not be counted toward completion of the experience. Similarly, work in excess of the 35 hours per week cannot be used to shorten the CF to less than 36 weeks.

**Standard VII-B: Clinical Fellowship Mentorship**

The Clinical Fellow must have received ongoing mentoring and formal evaluations by the CF mentor.

*Implementation:* Mentoring must have included on-site observations and other monitoring activities. These activities may have been executed by correspondence, review of video and/or audio recordings, evaluation of written reports, telephone conferences with the Fellow, and evaluations by professional colleagues with whom the Fellow works. The CF mentor and Clinical Fellow must have participated in regularly scheduled formal evaluations of the Fellow's progress during the CF experience. The Clinical Fellow must receive ongoing mentoring and formal evaluations by the CF Mentor.

The mentoring SLP must engage in no fewer than 36 supervisory activities during the clinical fellowship experience. This supervision must include 18 on-site observations of direct client contact at the Clinical Fellow's work site (1 hour = 1 on-site observation; a maximum of six on-site observations may be accrued in 1 day). At least six on-site observations must be conducted during each third of the CF experience. On-site observations must consist of the Clinical Fellow engaged in screening, evaluation, assessment, and/or habilitation/rehabilitation activities. Use of real-time, interactive video and audio conferencing technology is permitted as a form of on-site observation, for which pre-approval must be obtained.

Additionally, supervision must also include 18 other monitoring activities. At least six other monitoring activities must be conducted during each third of the CF experience. Other monitoring activities are defined as evaluation of reports written by the Clinical Fellow, conferences between the mentoring SLP and the Clinical Fellow, discussions with professional colleagues of the Fellow, etc., and may be executed by correspondence, telephone, or reviewing of video and/or audio tapes.

On rare occasions, the CFCC may allow the supervisory process to be conducted in other ways. However, a request for other supervisory mechanisms must be submitted in written form to the CFCC, and co-signed by the CF mentor, before the CF is initiated. The request must include the reason for the alternative supervision and a description of the supervision that would be provided. At a minimum, such a request must outline the type, length, and frequency of the supervision that would be provided.

A CF mentor intending to supervise a Clinical Fellow located in another state may be required to also hold licensure in that state; it is up to the CF mentor and the Clinical Fellow to make this determination before proceeding with a supervision arrangement.

**Standard VII-C: Clinical Fellowship Outcomes**

The Clinical Fellow must have demonstrated knowledge and skills consistent with the ability to practice independently.
Implementation: At the completion of the CF experience, the applicant will have acquired and demonstrated the ability to

- integrate and apply theoretical knowledge,
- evaluate his or her strengths and identify his or her limitations,
- refine clinical skills within the Scope of Practice in Speech-Language Pathology,
- apply the ASHA Code of Ethics to independent professional practice.

In addition, upon completion of the CF, the applicant must have demonstrated the ability to perform clinical activities accurately, consistently, and independently and to seek guidance as necessary.

The CF mentor must submit the Clinical Fellowship Report and Rating Form, which includes the Clinical Fellowship Skills Inventory (CFSI), as soon as the CF successfully completes the CF experience. This report must be signed by both the Clinical Fellow and mentoring SLP.

Standard VIII: Maintenance of Certification

Certificate holders must demonstrate continued professional development for maintenance of the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP).

Implementation: Individuals who hold the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) must accumulate 30 certification maintenance hours of professional development during every 3-year maintenance interval. Intervals are continuous and begin January 1 of the year following award of initial certification or reinstatement of certification. A random audit of compliance will be conducted.

Accrual of professional development hours, adherence to the ASHA Code of Ethics, submission of certification maintenance compliance documentation, and payment of annual dues and/or certification fees are required for maintenance of certification.

If renewal of certification is not accomplished within the 3-year period, certification will expire. Individuals wishing to regain certification must submit a reinstatement application and meet the standards in effect at the time the reinstatement application is submitted.
Appendix E.

ASHA Scope of Practice in Speech-Language Pathology

Introduction

The *Scope of Practice in Speech-Language Pathology* of the American Speech-Language-Hearing Association (ASHA) includes the following: a statement of purpose, definitions of *speech-language pathologist* and *speech-language pathology*, a framework for speech-language pathology practice, a description of the domains of speech-language pathology service delivery, delineation of speech-language pathology service delivery areas, domains of professional practice, references, and resources.

The *speech-language pathologist* (SLP) is defined as the professional who engages in professional practice in the areas of communication and swallowing across the life span. *Communication* and *swallowing* are broad terms encompassing many facets of function. *Communication* includes speech production and fluency, language, cognition, voice, resonance, and hearing. *Swallowing* includes all aspects of swallowing, including related feeding behaviors. Throughout this document, the terms *communication* and *swallowing* are used to reflect all areas. This document is a guide for SLPs across all clinical and educational settings to promote best practice. The term *individuals* is used throughout the document to refer to students, clients, and patients who are served by the SLP.

As part of the review process for updating the *Scope of Practice in Speech-Language Pathology*, the committee revised the previous scope of practice document to reflect recent advances in knowledge and research in the discipline. One of the biggest changes to the document includes the delineation of practice areas in the context of eight domains of speech-language pathology service delivery: collaboration; counseling; prevention and wellness; screening; assessment; treatment; modalities, technology, and instrumentation; and population and systems. In addition, five domains of professional practice are delineated: advocacy and outreach, supervision, education, research and administration/leadership.

Service delivery areas include all aspects of communication and swallowing and related areas that impact communication and swallowing: speech production, fluency, language, cognition, voice, resonance, feeding, swallowing, and hearing. The practice of speech-language pathology continually evolves. SLPs play critical roles in health literacy; screening, diagnosis, and treatment of autism spectrum disorder; and use of the *International Classification of Functioning, Disability and Health* (ICF; World Health Organization [WHO], 2014) to develop functional goals and collaborative practice. As technology and science advance, the areas of assessment and intervention related to communication and swallowing disorders grow accordingly. Clinicians should stay current with advances in speech-language pathology practice by regularly reviewing the research literature, consulting the Practice Management section of the ASHA website, including the Practice Portal, and regularly participating in continuing education to supplement advances in the profession and information in the scope of practice.

Statement of Purpose

The purpose of the *Scope of Practice in Speech-Language Pathology* is to:

1. delineate areas of professional practice;
2. inform others (e.g., health care providers, educators, consumers, payers, regulators, and the general public) about professional roles and responsibilities of qualified providers;
3. support SLPs in the provision of high-quality, evidence-based services to individuals with communication, feeding, and/or swallowing concerns;
4. support SLPs in the conduct and dissemination of research; and
5. guide the educational preparation and professional development of SLPs to provide safe and effective services.

The scope of practice outlines the breadth of professional services offered within the profession of speech-language pathology. Levels of education, experience, skill, and proficiency in each practice area identified within this scope will vary among providers. An SLP typically does not practice in all areas of clinical service delivery across the life cycle. As the ASHA Code of Ethics specifies, professionals may practice only in areas in which they are competent, based on their education, training, and experience.

This scope of practice document describes evolving areas of practice. These include interdisciplinary work in both health care and educational settings, collaborative service delivery wherever appropriate and telehealth/telepractice that are effective for the general public.

Speech-language pathology is a dynamic profession, and the overlapping of scopes of practice is a reality in rapidly changing health care, education, and other environments. Hence, SLPs in various settings work collaboratively with other school or health care professionals to make sound decisions for the benefit of individuals with communication and swallowing disorders. This interprofessional collaborative practice is defined as "members or students of two or more professions associated with health or social care, engaged in learning with, from and about each other" (Craddock, O'Halloran, Borthwick, & McPherson, 2006, p. 237). Similarly, "interprofessional education provides an ability to share skills and knowledge between professions and allows for a better understanding, shared values, and respect for the roles of other healthcare professionals" (Bridges et al., 2011, para. 5).

This scope of practice does not supersede existing state licensure laws or affect the interpretation or implementation of such laws. However, it may serve as a model for the development or modification of licensure laws. Finally, in addition to this scope of practice document, other ASHA professional resources outline practice areas and address issues related to public protection (e.g., A guide to disability rights law and the Practice Portal). The highest standards of integrity and ethical conduct are held paramount in this profession.

**Definitions of Speech-Language Pathologist and Speech-Language Pathology**

**Speech-language pathologists**, as defined by ASHA, are professionals who hold the ASHA Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP), which requires a master’s, doctoral, or other recognized post baccalaureate degree. ASHA-certified SLPs complete a supervised postgraduate professional experience and pass a national examination as described in the ASHA certification standards, (2014). Demonstration of continued professional development is mandated for the maintenance of the CCC-SLP. SLPs hold other required credentials where applicable (e.g., state licensure, teaching certification, specialty certification).

Each practitioner evaluates his or her own experiences with preservice education, practice, mentorship and supervision, and continuing professional development. As a whole, these experiences define the scope of competence for each individual. The SLP should engage in only those aspects of the profession that are within her or his professional competence.

SLPs are autonomous professionals who are the primary care providers of speech-language pathology services. Speech-language pathology services are not prescribed or supervised by another professional. Additional requirements may dictate that speech-language pathology
services are prescribed and required to meet specific eligibility criteria in certain work settings, or as required by certain payers. SLPs use professional judgment to determine if additional requirements are indicated. Individuals with communication and/or swallowing disorders benefit from services that include collaboration by SLPs with other professionals.

The profession of speech-language pathology contains a broad area of speech-language pathology practice that includes both speech-language pathology service delivery and professional practice domains. These domains are defined in subsequent sections of this document and are represented schematically in Figure 1.

**Figure 1.** Schematic representation of speech-language pathology practice, including both service delivery and professional domains.

**Framework for Speech-Language Pathology Practice**

The overall objective of speech-language pathology services is to optimize individuals' abilities to communicate and to swallow, thereby improving quality of life. As the population of the United States continues to become increasingly diverse, SLPs are committed to the provision of culturally and linguistically appropriate services and to the consideration of diversity in scientific investigations of human communication and swallowing.

An important characteristic of the practice of speech-language pathology is that, to the extent possible, decisions are based on best available evidence. ASHA defines *evidence-based practice* in speech-language pathology as an approach in which current, high-quality research evidence is integrated with practitioner expertise, along with the client's values and preferences (ASHA, 2005). A high-quality basic and applied research base in communication sciences and disorders and related disciplines is essential to providing evidence-based practice and high-quality
services. Increased national and international interchange of professional knowledge, information, and education in communication sciences and disorders is a means to strengthen research collaboration and improve services. ASHA has provided a resource for evidence-based research via the Practice Portal.

The scope of practice in speech-language pathology comprises five domains of professional practice and eight domains of service delivery.

Professional practice domains:
- advocacy and outreach
- supervision
- education
- administration/leadership
- research

Service delivery domains:
- Collaboration
- Counseling
- Prevention and Wellness
- Screening
- Assessment
- Treatment
- Modalities, Technology, and Instrumentation
- Population and Systems

SLPs provide services to individuals with a wide variety of speech, language, and swallowing differences and disorders within the above-mentioned domains that range in function from completely intact to completely compromised. The diagnostic categories in the speech-language pathology scope of practice are consistent with relevant diagnostic categories under the WHO’s (2014) ICF, the American Psychiatric Association’s (2013) Diagnostic and Statistical Manual of Mental Disorders, the categories of disability under the Individuals with Disabilities Education Act of 2004 (see also U.S. Department of Education, 2004), and those defined by two semiautonomous bodies of ASHA: the Council on Academic Accreditation in Audiology and Speech-Language Pathology and the Council for Clinical Certification in Audiology and Speech-Language Pathology.

The domains of speech-language pathology service delivery complement the ICF, the WHO’s multipurpose health classification system (WHO, 2014). The classification system provides a standard language and framework for the description of functioning and health. The ICF framework is useful in describing the breadth of the role of the SLP in the prevention, assessment, and habilitation/rehabilitation of communication and swallowing disorders and the enhancement and scientific investigation of those functions. The framework consists of two components: health conditions and contextual factors.

Health Conditions

Body Functions and Structures: These involve the anatomy and physiology of the human body. Relevant examples in speech-language pathology include craniofacial anomaly, vocal fold paralysis, cerebral palsy, stuttering, and language impairment.

Activity and Participation: Activity refers to the execution of a task or action. Participation is the involvement in a life situation. Relevant examples in speech-language pathology include difficulties
with swallowing safely for independent feeding, participating actively in class, understanding a medical prescription, and accessing the general education curriculum.

**Contextual Factors**

**Environmental Factors:** These make up the physical, social, and attitudinal environments in which people live and conduct their lives. Relevant examples in speech-language pathology include the role of the communication partner in augmentative and alternative communication (AAC), the influence of classroom acoustics on communication, and the impact of institutional dining environments on individuals' ability to safely maintain nutrition and hydration.

**Personal Factors:** These are the internal influences on an individual's functioning and disability and are not part of the health condition. Personal factors may include, but are not limited to, age, gender, ethnicity, educational level, social background, and profession. Relevant examples in speech-language pathology might include an individual's background or culture, if one or both influence his or her reaction to communication or swallowing.

The framework in speech-language pathology encompasses these health conditions and contextual factors across individuals and populations. **Figure 2** illustrates the interaction of the various components of the ICF. The health condition component is expressed on a continuum of functioning. On one end of the continuum is intact functioning; at the opposite end of the continuum is completely compromised function. The contextual factors interact with each other and with the health conditions and may serve as facilitators or barriers to functioning. SLPs influence contextual factors through education and advocacy efforts at local, state, and national levels.
Domains of Speech-Language Pathology Service Delivery

The eight domains of speech-language pathology service delivery are collaboration; counseling; prevention and wellness; screening; assessment; treatment; modalities, technology, and instrumentation; and population and systems.

Collaboration

SLPs share responsibility with other professionals for creating a collaborative culture. Collaboration requires joint communication and shared decision making among all members of the team, including the individual and family, to accomplish improved service delivery and functional outcomes for the individuals served. When discussing specific roles of team members, professionals are ethically and legally obligated to determine whether they have the knowledge and skills necessary to perform such services. Collaboration occurs across all speech-language pathology practice domains.

As our global society is becoming more connected, integrated, and interdependent, SLPs have access to a variety of resources, information technology, diverse perspectives and influences (see, e.g., Lipinsky, Lombardo, Dominy, & Feeney, 1997). Increased national and international interchange of professional knowledge, information, and education in communication sciences and disorders is a means to strengthen research collaboration and improve services. SLPs:
- educate stakeholders regarding interprofessional education (IPE) and interprofessional practice (IPP) (ASHA, 2014) principles and competencies;
- partner with other professions/organizations to enhance the value of speech-language pathology services;
- share responsibilities to achieve functional outcomes;
- consult with other professionals to meet the needs of individuals with communication and swallowing disorders;
- serve as case managers, service delivery coordinators, members of collaborative and patient care conference teams; and
- serve on early intervention and school pre-referral and intervention teams to assist with the development and implementation of individualized family service plans (IFSPs) and individualized education programs (IEPs).

Counseling

SLPs counsel by providing education, guidance, and support. Individuals, their families and their caregivers are counseled regarding acceptance, adaptation, and decision making about communication, feeding and swallowing, and related disorders. The role of the SLP in the counseling process includes interactions related to emotional reactions, thoughts, feelings, and behaviors that result from living with the communication disorder, feeding and swallowing disorder, or related disorders.

SLPs engage in the following activities in counseling persons with communication and feeding and swallowing disorders and their families:
- empower the individual and family to make informed decisions related to communication or feeding and swallowing issues.
- educate the individual, family, and related community members about communication or feeding and swallowing disorders.
• provide support and/or peer-to-peer groups for individuals with disorders and their families.
• provide individuals and families with skills that enable them to become self-advocates.
• discuss, evaluate, and address negative emotions and thoughts related to communication or feeding and swallowing disorders.
• refer individuals with disorders to other professionals when counseling needs fall outside of those related to (a) communication and (b) feeding and swallowing.

Prevention and Wellness

SLPs are involved in prevention and wellness activities that are geared toward reducing the incidence of a new disorder or disease, identifying disorders at an early stage, and decreasing the severity or impact of a disability associated with an existing disorder or disease. Involvement is directed toward individuals who are vulnerable or at risk for limited participation in communication, hearing, feeding and swallowing, and related abilities. Activities are directed toward enhancing or improving general well-being and quality of life. Education efforts focus on identifying and increasing awareness of risk behaviors that lead to communication disorders and feeding and swallowing problems. SLPs promote programs to increase public awareness, which are aimed at positively changing behaviors or attitudes.

Effective prevention programs are often community based and enable the SLP to help reduce the incidence of spoken and written communication and swallowing disorders as a public health and public education concern.

Examples of prevention and wellness programs include, but are not limited to, the following:

- **Language impairment**: Educate parents, teachers and other school-based professionals about the clinical markers of language impairment and the ways in which these impairments can impact a student's reading and writing skills to facilitate early referral for evaluation and assessment services.
- **Language-based literacy disorders**: Educate parents, school personnel, and health care providers about the SLP's role in addressing the semantic, syntactic, morphological, and phonological aspects of literacy disorders across the lifespan.
- **Feeding**: Educate parents of infants at risk for feeding problems about techniques to minimize long-term feeding challenges.
- **Stroke prevention**: Educate individuals about risk factors associated with stroke
- **Serve on teams**: Participate on multitiered systems of support (MTSS)/response to intervention (RTI) teams to help students successfully communicate within academic, classroom, and social settings.
- **Fluency**: Educate parents about risk factors associated with early stuttering.
- **Early childhood**: Encourage parents to participate in early screening and to collaborate with physicians, educators, child care providers, and others to recognize warning signs of developmental disorders during routine wellness checks and to promote healthy communication development practices.
- **Prenatal care**: Educate parents to decrease the incidence of speech, hearing, feeding and swallowing, and related disorders due to problems during pregnancy.
- **Genetic counseling**: Refer individuals to appropriate professionals and professional services if there is a concern or need for genetic counseling.
- **Environmental change**: Modify environments to decrease the risk of occurrence (e.g., decrease noise exposure).
- **Vocal hygiene**: Target prevention of voice disorders (e.g., encourage activities that minimize phonotrauma and the development of benign vocal fold pathology and that curb the use of smoking and smokeless tobacco products).
• **Hearing:** Educate individuals about risk factors associated with noise-induced hearing loss and preventive measures that may help to decrease the risk.

• **Concussion /traumatic brain injury awareness:** Educate parents of children involved in contact sports about the risk of concussion.

• **Accent/dialect modification:** Address sound pronunciation, stress, rhythm, and intonation of speech to enhance effective communication.

• **Transgender (TG) and transsexual (TS) voice and communication:** Educate and treat individuals about appropriate verbal, nonverbal, and voice characteristics (feminization or masculinization) that are congruent with their targeted gender identity.

• **Business communication:** Educate individuals about the importance of effective business communication, including oral, written, and interpersonal communication.

• **Swallowing:** Educate individuals who are at risk for aspiration about oral hygiene techniques.

### Screening

SLPs are experts at screening individuals for possible communication, hearing, and/or feeding and swallowing disorders. SLPs have the knowledge of-and skills to treat-these disorders; they can design and implement effective screening programs and make appropriate referrals. These screenings facilitate referral for appropriate follow-up in a timely and cost-effective manner. SLPs:

- select and use appropriate screening instrumentation;
- develop screening procedures and tools based on existing evidence;
- coordinate and conduct screening programs in a wide variety of educational, community, and health care settings;
- participate in public school MTSS/RTI team meetings to review data and recommend interventions to satisfy federal and state requirements (e.g., Individuals with Disabilities Education Improvement Act of 2004 [IDEIA] and Section 504 of the Rehabilitation Act of 1973);
- review and analyze records (e.g., educational, medical);
- review, analyze, and make appropriate referrals based on results of screenings;
- consult with others about the results of screenings conducted by other professionals; and
- utilize data to inform decisions about the health of populations.

### Assessment

Speech-language pathologists have expertise in the differential diagnosis of disorders of communication and swallowing. Communication, speech, language, and swallowing disorders can occur developmentally, as part of a medical condition, or in isolation, without an apparent underlying medical condition. Competent SLPs can diagnose communication and swallowing disorders but do not differentially diagnose medical conditions. The assessment process utilizes the ICF framework, which includes evaluation of body function, structure, activity and participation, within the context of environmental and personal factors. The assessment process can include, but is not limited to, culturally and linguistically appropriate behavioral observation and standardized and/or criterion-referenced tools; use of instrumentation; review of records, case history, and prior test results; and interview of the individual and/or family to guide decision making. The assessment process can be carried out in collaboration with other professionals. SLPs:

- administer standardized and/or criterion-referenced tools to compare individuals with their peers;
- review medical records to determine relevant health, medical, and pharmacological information;
• interview individuals and/or family to obtain case history to determine specific concerns;
• utilize culturally and linguistically appropriate assessment protocols;
• engage in behavioral observation to determine the individual's skills in a naturalistic setting/context;
• diagnose communication and swallowing disorders;
• use endoscopy, videofluoroscopy, and other instrumentation to assess aspects of voice, resonance, velopharyngeal function and swallowing;
• document assessment and trial results for selecting AAC interventions and technology, including speech-generating devices (SGDs);
• participate in meetings adhering to required federal and state laws and regulations (e.g., IDEA [2004] and Section 504 of the Rehabilitation Act of 1973).
• document assessment results, including discharge planning;
• formulate impressions to develop a plan of treatment and recommendations; and
• discuss eligibility and criteria for dismissal from early intervention and school-based services.

Treatment

Speech-language services are designed to optimize individuals’ ability to communicate and swallow, thereby improving quality of life. SLPs develop and implement treatment to address the presenting symptoms or concerns of a communication or swallowing problem or related functional issue. Treatment establishes a new skill or ability or remediates or restores an impaired skill or ability. The ultimate goal of therapy is to improve an individual's functional outcomes. To this end, SLPs:

• design, implement, and document delivery of service in accordance with best available practice appropriate to the practice setting;
• provide culturally and linguistically appropriate services;
• integrate the highest quality available research evidence with practitioner expertise and individual preferences and values in establishing treatment goals;
• utilize treatment data to guide decisions and determine effectiveness of services;
• integrate academic materials and goals into treatment;
• deliver the appropriate frequency and intensity of treatment utilizing best available practice;
• engage in treatment activities that are within the scope of the professional's competence;
• utilize AAC performance data to guide clinical decisions and determine the effectiveness of treatment; and
• collaborate with other professionals in the delivery of services.

Modalities, Technology, and Instrumentation

SLPs use advanced instrumentation and technologies in the evaluation, management, and care of individuals with communication, feeding and swallowing, and related disorders. SLPs are also involved in the research and development of emerging technologies and apply their knowledge in the use of advanced instrumentation and technologies to enhance the quality of the services provided. Some examples of services that SLPs offer in this domain include, but are not limited to, the use of:

• the full range of AAC technologies to help individuals who have impaired ability to communicate verbally on a consistent basis-AAC devices make it possible for many individuals to successfully communicate within their environment and community;
• endoscopy, videofluoroscopy, fiber-optic evaluation of swallowing (voice, velopharyngeal function, swallowing) and other instrumentation to assess aspects of voice, resonance, and swallowing;
Population and Systems

In addition to direct care responsibilities, SLPs have a role in (a) managing populations to improve overall health and education, (b) improving the experience of the individuals served, and, in some circumstances, (c) reducing the cost of care. SLPs also have a role in improving the efficiency and effectiveness of service delivery. SLPs serve in roles designed to meet the demands and expectations of a changing work environment. SLPs:

- use plain language to facilitate clear communication for improved health and educationally relevant outcomes;
- collaborate with other professionals about improving communication with individuals who have communication challenges;
- improve the experience of care by analyzing and improving communication environments;
- reduce the cost of care by designing and implementing case management strategies that focus on function and by helping individuals reach their goals through a combination of direct intervention, supervision of and collaboration with other service providers, and engagement of the individual and family in self-management strategies;
- serve in roles designed to meet the demands and expectations of a changing work environment;
- contribute to the management of specific populations by enhancing communication between professionals and individuals served;
- coach families and early intervention providers about strategies and supports for facilitating prelinguistic and linguistic communication skills of infants and toddlers; and
- support and collaborate with classroom teachers to implement strategies for supporting student access to the curriculum.

Speech-Language Pathology Service Delivery Areas

This list of practice areas and the bulleted examples are not comprehensive. Current areas of practice, such as literacy, have continued to evolve, whereas other new areas of practice are emerging. Please refer to the ASHA Practice Portal for a more extensive list of practice areas.

Fluency

- Stuttering
- Cluttering

Speech Production

- Motor planning and execution
- Articulation
- Phonological

Language- Spoken and written language (listening, processing, speaking, reading, writing, pragmatics)

- Phonology
- Morphology
- Syntax
- Semantics
• Pragmatics (language use and social aspects of communication)
• Prelinguistic communication (e.g., joint attention, intentionality, communicative signaling)
• Paralinguistic communication (e.g., gestures, signs, body language)
• Literacy (reading, writing, spelling)

Cognition
• Attention
• Memory
• Problem solving
• Executive functioning

Voice
• Phonation quality
• Pitch
• Loudness
• Alaryngeal voice

Resonance
• Hypernasality
• Hyponasality
• Cul-de-sac resonance
• Forward focus

Feeding and Swallowing
• Oral phase
• Pharyngeal phase
• Esophageal phase
• Atypical eating (e.g., food selectivity/refusal, negative physiologic response)

Auditory Habilitation/Rehabilitation
• Speech, language, communication, and listening skills impacted by hearing loss, deafness
• Auditory processing

Potential etiologies of communication and swallowing disorders include
• neonatal problems (e.g., prematurity, low birth weight, substance exposure);
• developmental disabilities (e.g., specific language impairment, autism spectrum disorder, dyslexia, learning disabilities, attention-deficit disorder, intellectual disabilities, unspecified neurodevelopmental disorders);
• disorders of aerodigestive tract function (e.g., irritable larynx, chronic cough, abnormal respiratory patterns or airway protection, paradoxical vocal fold motion, tracheostomy);
• oral anomalies (e.g., cleft lip/palate, dental malocclusion, macroglossia, oral motor dysfunction);
• respiratory patterns and compromise (e.g., bronchopulmonary dysplasia, chronic obstructive pulmonary disease);
• pharyngeal anomalies (e.g., upper airway obstruction, velopharyngeal insufficiency/incompetence);
• laryngeal anomalies (e.g., vocal fold pathology, tracheal stenosis);
• neurological disease/dysfunction (e.g., traumatic brain injury, cerebral palsy, cerebrovascular accident, dementia, Parkinson's disease, and amyotrophic lateral sclerosis);
• psychiatric disorder (e.g., psychosis, schizophrenia);
• genetic disorders (e.g., Down syndrome, fragile X syndrome, Rett syndrome, velocardiofacial syndrome); and
Orofacial myofunctional disorders (e.g., habitual open-mouth posture/nasal breathing, orofacial habits, tethered oral tissues, chewing and chewing muscles, lips and tongue resting position).

This list of etiologies is not comprehensive.

Elective services include

- Transgender communication (e.g., voice, verbal and nonverbal communication);
- Preventive vocal hygiene;
- Business communication;
- Accent/dialect modification; and
- Professional voice use.

This list of elective services is not comprehensive.

Domains of Professional Practice

This section delineates the domains of professional practice—that is, a set of skills and knowledge that goes beyond clinical practice. The domains of professional practice include advocacy and outreach, supervision, education, research, and administration and leadership.

Advocacy and Outreach

SLPs advocate for the discipline and for individuals through a variety of mechanisms, including community awareness, prevention activities, health literacy, academic literacy, education, political action, and training programs. Advocacy promotes and facilitates access to communication, including the reduction of societal, cultural, and linguistic barriers. SLPs perform a variety of activities, including the following:

- Advise regulatory and legislative agencies about the continuum of care. Examples of service delivery options across the continuum of care include telehealth/telepractice, the use of technology, the use of support personnel, and practicing at the top of the license.
- Engage decision makers at the local, state, and national levels for improved administrative and governmental policies affecting access to services and funding for communication and swallowing issues.
- Advocate at the local, state, and national levels for funding for services, education, and research.
- Participate in associations and organizations to advance the speech-language pathology profession.
- Promote and market professional services.
- Help to recruit and retain SLPs with diverse backgrounds and interests.
- Collaborate on advocacy objectives with other professionals/colleagues regarding mutual goals.
- Serve as expert witnesses, when appropriate.
- Educate consumers about communication disorders and speech-language pathology services.
- Advocate for fair and equitable services for all individuals, especially the most vulnerable.
- Inform state education agencies and local school districts about the various roles and responsibilities of school-based SLPs, including direct service, IEP development, Medicaid billing, planning and delivery of assessment and therapy, consultation with other team members, and attendance at required meetings.
Supervision

Supervision is a distinct area of practice; is the responsibility of SLPs; and crosses clinical, administrative, and technical spheres. SLPs are responsible for supervising Clinical Fellows, graduate externs, trainees, speech-language pathology assistants, and other personnel (e.g., clerical, technical, and other administrative support staff). SLPs may also supervise colleagues and peers. SLPs acknowledge that supervision is integral in the delivery of communication and swallowing services and advances the discipline. Supervision involves education, mentorship, encouragement, counseling, and support across all supervisory roles. SLPs:

• possess service delivery and professional practice skills necessary to guide the supervisee;
• apply the art and science of supervision to all stakeholders (i.e., those supervising and being supervised), recognizing that supervision contributes to efficiency in the workplace;
• seek advanced knowledge in the practice of effective supervision;
• establish supervisory relationships that are collegial in nature;
• support supervisees as they learn to handle emotional reactions that may affect the therapeutic process; and
• establish a supervisory relationship that promotes growth and independence while providing support and guidance.

Education

SLPs serve as educators, teaching students in academic institutions and teaching professionals through continuing education in professional development formats. This more formal teaching is in addition to the education that SLPs provide to individuals, families, caregivers, decision makers, and policy makers, which is described in other domains. SLPs:

• serve as faculty at institutions of higher education, teaching courses at the undergraduate, graduate, and postgraduate levels;
• mentor students who are completing academic programs at all levels;
• provide academic training to students in related disciplines and students who are training to become speech-language pathology assistants; and
• provide continuing professional education to SLPs and to professionals in related disciplines.

Research

SLPs conduct and participate in basic and applied/translational research related to cognition, verbal and nonverbal communication, pragmatics, literacy (reading, writing and spelling), and feeding and swallowing. This research may be undertaken as a facility-specific effort or may be coordinated across multiple settings. SLPs engage in activities to ensure compliance with Institutional Review Boards and international laws pertaining to research. SLPs also collaborate with other researchers and may pursue research funding through grants.

Administration and Leadership

SLPs administer programs in education, higher education, schools, health care, private practice, and other settings. In this capacity, they are responsible for making administrative decisions related to fiscal and personnel management; leadership; program design; program growth and innovation; professional development; compliance with laws and regulations; and cooperation with outside agencies in education and healthcare. Their administrative roles are not limited to speech-
language pathology, as they may administer programs across departments and at different levels within an institution. In addition, SLPs promote effective and manageable workloads in school settings, provide appropriate services under IDEIA (2004), and engage in program design and development.

PREAMBLE

The American Speech-Language-Hearing Association (ASHA; hereafter, also known as "The Association") has been committed to a framework of common principles and standards of practice since ASHA's inception in 1925. This commitment was formalized in 1952 as the Association's first Code of Ethics. This Code has been modified and adapted as society and the professions have changed. The Code of Ethics reflects what we value as professionals and establishes expectations for our scientific and clinical practice based on principles of duty, accountability, fairness, and responsibility. The ASHA Code of Ethics is intended to ensure the welfare of the consumer and to protect the reputation and integrity of the professions.

The ASHA Code of Ethics is a framework and focused guide for professionals in support of day-to-day decision making related to professional conduct. The Code is partly obligatory and disciplinary and partly aspirational and descriptive in that it defines the professional's role. The Code educates professionals in the discipline, as well as students, other professionals, and the public, regarding ethical principles and standards that direct professional conduct.

The preservation of the highest standards of integrity and ethical principles is vital to the responsible discharge of obligations by audiologists, speech-language pathologists, and speech, language, and hearing scientists who serve as clinicians, educators, mentors, researchers, supervisors, and administrators. This Code of Ethics sets forth the fundamental principles and rules considered essential to this purpose and is applicable to the following individuals:

- a member of the American Speech-Language-Hearing Association holding the Certificate of Clinical Competence (CCC)
- a member of the Association not holding the Certificate of Clinical Competence (CCC)
- a nonmember of the Association holding the Certificate of Clinical Competence (CCC)
- an applicant for certification, or for membership and certification

By holding ASHA certification or membership, or through application for such, all individuals are automatically subject to the jurisdiction of the Board of Ethics for ethics complaint adjudication. Individuals who provide clinical services and who also desire membership in the Association must hold the CCC.

The fundamentals of ethical conduct are described by Principles of Ethics and by Rules of Ethics. The four Principles of Ethics form the underlying philosophical basis for the Code of Ethics and are reflected in the following areas: (I) responsibility to persons served professionally and to research participants, both human and animal; (II) responsibility for one's professional competence; (III) responsibility to the public; and (IV) responsibility for professional relationships. Individuals shall honor and abide by these Principles as affirmative obligations under all conditions of applicable professional activity. Rules of Ethics are specific statements of minimally acceptable as well as unacceptable professional conduct.

The Code is designed to provide guidance to members, applicants, and certified individuals as they make professional decisions. Because the Code is not intended to address specific situations and is not inclusive of all possible ethical dilemmas, professionals are expected to follow the
written provisions and to uphold the spirit and purpose of the Code. Adherence to the Code of Ethics and its enforcement results in respect for the professions and positive outcomes for individuals who benefit from the work of audiologists, speech-language pathologists, and speech, language, and hearing scientists.

**Terminology**

ASHA Standards and Ethics
The mailing address for self-reporting in writing is American Speech-Language-Hearing Association, Standards and Ethics, 2200 Research Blvd., #313, Rockville, MD 20850.

Advertising
Any form of communication with the public about services, therapies, products, or publications.

Conflict of interest
An opposition between the private interests and the official or professional responsibilities of a person in a position of trust, power, and/or authority.

Crime
Any felony; or any misdemeanor involving dishonesty, physical harm to the person or property of another, or a threat of physical harm to the person or property of another. For more details, see the "Disclosure Information" section of applications for ASHA certification found on www.asha.org/certification/AudCertification/ and www.asha.org/certification/SLPCertification/.

Diminished decision-making ability
Any condition that renders a person unable to form the specific intent necessary to determine a reasonable course of action.

Fraud
Any act, expression, omission, or concealment—the intent of which is either actual or constructive—calculated to deceive others to their disadvantage.

Impaired practitioner
An individual whose professional practice is adversely affected by addiction, substance abuse, or health-related and/or mental health–related conditions.

Individuals
Members and/or certificate holders, including applicants for certification.

Informed consent
May be verbal, unless written consent is required; constitutes consent by persons served, research participants engaged, or parents and/or guardians of persons served to a proposed course of action after the communication of adequate information regarding expected outcomes and potential risks.

Jurisdiction
The "personal jurisdiction" and authority of the ASHA Board of Ethics over an individual holding ASHA certification and/or membership, regardless of the individual's geographic location.

Know, known, or knowingly
Having or reflecting knowledge.

May vs. shall
May denotes an allowance for discretion; shall denotes no discretion.
Misrepresentation
Any statement by words or other conduct that, under the circumstances, amounts to an assertion that is false or erroneous (i.e., not in accordance with the facts); any statement made with conscious ignorance or a reckless disregard for the truth.

Negligence
Breaching of a duty owed to another, which occurs because of a failure to conform to a requirement, and this failure has caused harm to another individual, which led to damages to this person(s); failure to exercise the care toward others that a reasonable or prudent person would take in the circumstances, or taking actions that such a reasonable person would not.

Nolo contendere
No contest.

Plagiarism
False representation of another person’s idea, research, presentation, result, or product as one’s own through irresponsible citation, attribution, or paraphrasing; ethical misconduct does not include honest error or differences of opinion.

Publicly sanctioned
A formal disciplinary action of public record, excluding actions due to insufficient continuing education, checks returned for insufficient funds, or late payment of fees not resulting in unlicensed practice.

Reasonable or reasonably
Supported or justified by fact or circumstance and being in accordance with reason, fairness, duty, or prudence.

Self-report
A professional obligation of self-disclosure that requires (a) notifying ASHA Standards and Ethics and (b) mailing a hard copy of a certified document to ASHA Standards and Ethics (see term above). All self-reports are subject to a separate ASHA Certification review process, which, depending on the seriousness of the self-reported information, takes additional processing time.

Shall vs. may
Shall denotes no discretion; may denotes an allowance for discretion.

Support personnel
Those providing support to audiologists, speech-language pathologists, or speech, language, and hearing scientists (e.g., technician, paraprofessional, aide, or assistant in audiology, speech-language pathology, or communication sciences and disorders). For more information, read the Issues in Ethics Statements on Audiology Assistants and/or Speech-Language Pathology Assistants.

Telepractice, teletherapy
Application of telecommunications technology to the delivery of audiology and speech-language pathology professional services at a distance by linking clinician to client/patient or clinician to clinician for assessment, intervention, and/or consultation. The quality of the service should be equivalent to in-person service. For more information, see the telepractice section on the ASHA Practice Portal.
PRINCIPLE OF ETHICS

Individuals shall honor their responsibility to hold paramount the welfare of persons they serve professionally or who are participants in research and scholarly activities, and they shall treat animals involved in research in a humane manner.

Rules of Ethics:

A. Individuals shall provide all clinical services and scientific activities competently.

B. Individuals shall use every resource, including referral and/or interprofessional collaboration when appropriate, to ensure that quality service is provided.

C. Individuals shall not discriminate in the delivery of professional services or in the conduct of research and scholarly activities on the basis of race, ethnicity, sex, gender identity/gender expression, sexual orientation, age, religion, national origin, disability, culture, language, or dialect.

D. Individuals shall not misrepresent the credentials of aides, assistants, technicians, support personnel, students, research interns, Clinical Fellows, or any others under their supervision, and they shall inform those they serve professionally of the name, role, and professional credentials of persons providing services.

E. Individuals who hold the Certificate of Clinical Competence may delegate tasks related to the provision of clinical services to aides, assistants, technicians, support personnel, or any other persons only if those persons are adequately prepared and are appropriately supervised. The responsibility for the welfare of those being served remains with the certified individual.

F. Individuals who hold the Certificate of Clinical Competence shall not delegate tasks that require the unique skills, knowledge, judgment, or credentials that are within the scope of their profession to aides, assistants, technicians, support personnel, or any nonprofessionals over whom they have supervisory responsibility.

G. Individuals who hold the Certificate of Clinical Competence may delegate to students tasks related to the provision of clinical services that require the unique skills, knowledge, and judgment that are within the scope of practice of their profession only if those students are adequately prepared and are appropriately supervised. The responsibility for the welfare of those being served remains with the certified individual.

H. Individuals shall obtain informed consent from the persons they serve about the nature and possible risks and effects of services provided, technology employed, and products dispensed. This obligation also includes informing persons served about possible effects of not engaging in treatment or not following clinical recommendations. If diminished decision-making ability of persons served is suspected, individuals should seek appropriate authorization for services, such as authorization from a spouse, other family member, or legally authorized/appointed representative.

I. Individuals shall enroll and include persons as participants in research or teaching demonstrations only if participation is voluntary, without coercion, and with informed consent.
J. Individuals shall accurately represent the intended purpose of a service, product, or research endeavor and shall abide by established guidelines for clinical practice and the responsible conduct of research.

K. Individuals who hold the Certificate of Clinical Competence shall evaluate the effectiveness of services provided, technology employed, and products dispensed, and they shall provide services or dispense products only when benefit can reasonably be expected.

L. Individuals may make a reasonable statement of prognosis, but they shall not guarantee—directly or by implication—the results of any treatment or procedure.

M. Individuals who hold the Certificate of Clinical Competence shall use independent and evidence-based clinical judgment, keeping paramount the best interests of those being served.

N. Individuals who hold the Certificate of Clinical Competence shall not provide clinical services solely by correspondence, but may provide services via telepractice consistent with professional standards and state and federal regulations.

O. Individuals shall protect the confidentiality and security of records of professional services provided, research and scholarly activities conducted, and products dispensed. Access to these records shall be allowed only when doing so is necessary to protect the welfare of the person or of the community, is legally authorized, or is otherwise required by law.

P. Individuals shall protect the confidentiality of any professional or personal information about persons served professionally or participants involved in research and scholarly activities and may disclose confidential information only when doing so is necessary to protect the welfare of the person or of the community, is legally authorized, or is otherwise required by law.

Q. Individuals shall maintain timely records and accurately record and bill for services provided and products dispensed and shall not misrepresent services provided, products dispensed, or research and scholarly activities conducted.

R. Individuals whose professional practice is adversely affected by substance abuse, addiction, or other health-related conditions are impaired practitioners and shall seek professional assistance and, where appropriate, withdraw from the affected areas of practice.

S. Individuals who have knowledge that a colleague is unable to provide professional services with reasonable skill and safety shall report this information to the appropriate authority, internally if a mechanism exists and, otherwise, externally.

T. Individuals shall provide reasonable notice and information about alternatives for obtaining care in the event that they can no longer provide professional services.

**PRINCIPLE OF ETHICS II**

Individuals shall honor their responsibility to achieve and maintain the highest level of professional competence and performance.
Rules of Ethics:

A. Individuals who hold the Certificate of Clinical Competence shall engage in only those aspects of the professions that are within the scope of their professional practice and competence, considering their certification status, education, training, and experience.

B. Members who do not hold the Certificate of Clinical Competence may not engage in the provision of clinical services; however, individuals who are in the certification application process may engage in the provision of clinical services consistent with current local and state laws and regulations and with ASHA certification requirements.

C. Individuals who engage in research shall comply with all institutional, state, and federal regulations that address any aspects of research, including those that involve human participants and animals.

D. Individuals shall enhance and refine their professional competence and expertise through engagement in lifelong learning applicable to their professional activities and skills.

E. Individuals in administrative or supervisory roles shall not require or permit their professional staff to provide services or conduct research activities that exceed the staff member's certification status, competence, education, training, and experience.

F. Individuals in administrative or supervisory roles shall not require or permit their professional staff to provide services or conduct clinical activities that compromise the staff member's independent and objective professional judgment.

G. Individuals shall make use of technology and instrumentation consistent with accepted professional guidelines in their areas of practice. When such technology is not available, an appropriate referral may be made.

H. Individuals shall ensure that all technology and instrumentation used to provide services or to conduct research and scholarly activities are in proper working order and are properly calibrated.

PRINCIPLE OF ETHICS III
Individuals shall honor their responsibility to the public when advocating for the unmet communication and swallowing needs of the public and shall provide accurate information involving any aspect of the professions.

Rules of Ethics:

A. Individuals shall not misrepresent their credentials, competence, education, training, experience, and scholarly contributions.

B. Individuals shall avoid engaging in conflicts of interest whereby personal, financial, or other considerations have the potential to influence or compromise professional judgment and objectivity.

C. Individuals shall not misrepresent research and scholarly activities, diagnostic information, services provided, results of services provided, products dispensed, or the effects of products dispensed.

D. Individuals shall not defraud through intent, ignorance, or negligence or engage in any
scheme to defraud in connection with obtaining payment, reimbursement, or grants and contracts for services provided, research conducted, or products dispensed.

E. Individuals' statements to the public shall provide accurate and complete information about the nature and management of communication disorders, about the professions, about professional services, about products for sale, and about research and scholarly activities.

F. Individuals' statements to the public shall adhere to prevailing professional norms and shall not contain misrepresentations when advertising, announcing, and promoting their professional services and products and when reporting research results.

G. Individuals shall not knowingly make false financial or nonfinancial statements and shall complete all materials honestly and without omission.

PRINCIPLE OF ETHICS IV
Individuals shall uphold the dignity and autonomy of the professions, maintain collaborative and harmonious interprofessional and intraprofessional relationships, and accept the professions’ self-imposed standards.

Rules of Ethics:

A. Individuals shall work collaboratively, when appropriate, with members of one’s own profession and/or members of other professions to deliver the highest quality of care.

B. Individuals shall exercise independent professional judgment in recommending and providing professional services when an administrative mandate, referral source, or prescription prevents keeping the welfare of persons served paramount.

C. Individuals' statements to colleagues about professional services, research results, and products shall adhere to prevailing professional standards and shall contain no misrepresentations.

D. Individuals shall not engage in any form of conduct that adversely reflects on the professions or on the individual's fitness to serve persons professionally.

E. Individuals shall not engage in dishonesty, negligence, fraud, deceit, or misrepresentation.

F. Applicants for certification or membership, and individuals making disclosures, shall not knowingly make false statements and shall complete all application and disclosure materials honestly and without omission.

G. Individuals shall not engage in any form of harassment, power abuse, or sexual harassment.

H. Individuals shall not engage in sexual activities with individuals (other than a spouse or other individual with whom a prior consensual relationship exists) over whom they exercise professional authority or power, including persons receiving services, assistants, students, or research participants.

I. Individuals shall not knowingly allow anyone under their supervision to engage in any practice that violates the Code of Ethics.

J. Individuals shall assign credit only to those who have contributed to a publication,
presentation, process, or product. Credit shall be assigned in proportion to the contribution and only with the contributor's consent.

K. Individuals shall reference the source when using other persons' ideas, research, presentations, results, or products in written, oral, or any other media presentation or summary. To do otherwise constitutes plagiarism.

L. Individuals shall not discriminate in their relationships with colleagues, assistants, students, support personnel, and members of other professions and disciplines on the basis of race, ethnicity, sex, gender identity/gender expression, sexual orientation, age, religion, national origin, disability, culture, language, dialect, or socioeconomic status.

M. Individuals with evidence that the Code of Ethics may have been violated have the responsibility to work collaboratively to resolve the situation where possible or to inform the Board of Ethics through its established procedures.

N. Individuals shall report members of other professions who they know have violated standards of care to the appropriate professional licensing authority or board, other professional regulatory body, or professional association when such violation compromises the welfare of persons served and/or research participants.

O. Individuals shall not file or encourage others to file complaints that disregard or ignore facts that would disprove the allegation; the Code of Ethics shall not be used for personal reprisal, as a means of addressing personal animosity, or as a vehicle for retaliation.

P. Individuals making and responding to complaints shall comply fully with the policies of the Board of Ethics in its consideration, adjudication, and resolution of complaints of alleged violations of the Code of Ethics.

Q. Individuals involved in ethics complaints shall not knowingly make false statements of fact or withhold relevant facts necessary to fairly adjudicate the complaints.

R. Individuals shall comply with local, state, and federal laws and regulations applicable to professional practice, research ethics, and the responsible conduct of research.

S. Individuals who have been convicted; been found guilty; or entered a plea of guilty or nolo contendere to (1) any misdemeanor involving dishonesty, physical harm—or the threat of physical harm—to the person or property of another, or (2) any felony, shall self-report by notifying ASHA Standards and Ethics (see Terminology for mailing address) in writing within 30 days of the conviction, plea, or finding of guilt. Individuals shall also provide a certified copy of the conviction, plea, nolo contendere record, or docket entry to ASHA Standards and Ethics within 30 days of self-reporting.

T. Individuals who have been publicly sanctioned or denied a license or a professional credential by any professional association, professional licensing authority or board, or other professional regulatory body shall self-report by notifying ASHA Standards and Ethics (see Terminology for mailing address) in writing within 30 days of the final action or disposition. Individuals shall also provide a certified copy of the final action, sanction, or disposition to ASHA Standards and Ethics within 30 days of self-reporting.

Appendix G.

Clinical Supervision in Speech-Language Pathology and Audiology

Position Statement
Committee on Supervision

About this Document:

The following position paper, developed by the Committee on Supervision, was adopted by the American Speech-Language-Hearing Association through its Legislative Council in November 1984 (LC 8-84). Members of the Committee included Elaine Brown-Grant, Patricia Casey, Bonnie Cleveland, Charles Diggs (ex officio), Richard Forcucci, Noel Matkin, George Purvis, Kathryn Smith, Peggy Williams (ex officio), Edward Wills, and Sandra Ulrich, Chair. Also contributing were the NSSLHA representatives Mary Kawell and Sheran Landis. The committee was under the guidance of Marianna Newton, Vice President for Professional and Governmental Affairs.

Contributions of members of the ASHA Committee on Supervision for the years 1976–1982 are acknowledged. Members of the 1978–1981 Subcommittee on Supervision (Noel Matkin, Chair) of the Council on Professional Standards in Speech-Language Pathology and Audiology are also acknowledged for their work from which the competencies presented herein were adapted.

Resolution:

WHEREAS, the American Speech-Language-Hearing Association (ASHA) needs a clear position on clinical supervision, and

WHEREAS, the necessity for having such a position for use in student training and in professional, legal, and governmental contexts has been recognized, and

WHEREAS, the Committee on Supervision in Speech-Language Pathology and Audiology has been charged to recommend guidelines for the roles and responsibilities of supervisors in various settings (LC 14-74), and

WHEREAS, a position statement on clinical supervision now has been developed, disseminated for both select and widespread peer review, and revised; therefore

RESOLVED, that the American Speech-Language-Hearing Association adopts “Clinical Supervision in Speech-Language Pathology and Audiology” as the recognized position of the Association.
Introduction:

Clinical supervision is a part of the earliest history of the American Speech-Language-Hearing Association (ASHA). It is an integral part of the initial training of speech-language pathologists and audiologists, as well as their continued professional development at all levels and in all work settings.

ASHA has recognized the importance of supervision by specifying certain aspects of supervision in its requirements for the Certificates of Clinical Competence (CCC) and the Clinical Fellowship Year (CFY) (ASHA, 1982). Further, supervisory requirements are specified by the Council on Professional Standards in its standards and guidelines for both educational and professional services programs (Educational Standards Board, ASHA, 1980; Professional Services Board, ASHA, 1983). State laws for licensing and school certification consistently include requirements for supervision of practicum experiences and initial work performance. In addition, other regulatory and accrediting bodies (e.g., Joint Commission on Accreditation of Hospitals, Commission on Accreditation of Rehabilitation Facilities) require a mechanism for ongoing supervision throughout professional careers.

It is important to note that the term clinical supervision, as used in this document, refers to the tasks and skills of clinical teaching related to the interaction between a clinician and client. In its 1978 report, the Committee on Supervision in Speech-Language Pathology and Audiology differentiated between the two major roles of persons identified as supervisors: clinical teaching aspects and program management tasks. The Committee emphasized that although program management tasks relating to administration or coordination of programs may be a part of the person’s job duties, the term supervisor referred to “individuals who engaged in clinical teaching through observation, conferences, review of records, and other procedures, and which is related to the interaction between a clinician and a client and the evaluation or management of communication skills” (ASHA, 1978, p. 479). The Committee continues to recognize this distinction between tasks of administration or program management and those of clinical teaching, which is its central concern.

The importance of supervision to preparation of students and to assurance of quality clinical service has been assumed for some time. It is only recently, however, that the tasks of supervision have been well-defined, and that the special skills and competencies judged to be necessary for their effective application have been identified. This Position Paper addresses the following areas:

- tasks of supervision
- competencies for effective clinical supervision
- preparation of clinical supervisors

Tasks of Supervision:

A central premise of supervision is that effective clinical teaching involves, in a fundamental way, the development of self-analysis, self-evaluation, and problem-solving skills on the part of the individual being supervised. The success of clinical teaching rests largely on the achievement of this goal. Further, the demonstration of quality clinical skills in supervisors is generally accepted as a prerequisite to supervision of students, as well as of those in the Clinical Fellowship Year or employed as certified speech-language pathologists or audiologists.

Outlined in this paper are 13 tasks basic to effective clinical teaching and constituting the distinct area of practice which comprises clinical supervision in communication disorders. The committee stresses that the level of preparation and experience of the supervisee, the particular work setting
of the supervisor and supervisee, and client variables will influence the relative emphasis of each task in actual practice.

The tasks and their supporting competencies which follow are judged to have face validity as established by experts in the area of supervision, and by both select and widespread peer review. The committee recognizes the need for further validation and strongly encourages ongoing investigation. Until such time as more rigorous measures of validity are established, it will be particularly important for the tasks and competencies to be reviewed periodically through quality assurance procedures. Mechanisms such as Patient Care Audit and Child Services Review System appear to offer useful means for quality assurance in the supervisory tasks and competencies. Other procedures appropriate to specific work settings may also be selected.

The tasks of supervision discussed above follow:

1. establishing and maintaining an effective working relationship with the supervisee;
2. assisting the supervisee in developing clinical goals and objectives;
3. assisting the supervisee in developing and refining assessment skills;
4. assisting the supervisee in developing and refining clinical management skills;
5. demonstrating for and participating with the supervisee in the clinical process;
6. assisting the supervisee in observing and analyzing assessment and treatment sessions;
7. assisting the supervisee in the development and maintenance of clinical and supervisory records;
8. interacting with the supervisee in planning, executing, and analyzing supervisory conferences;
9. assisting the supervisee in evaluation of clinical performance;
10. assisting the supervisee in developing skills of verbal reporting, writing, and editing;
11. sharing information regarding ethical, legal, regulatory, and reimbursement aspects of professional practice;
12. modeling and facilitating professional conduct; and
13. demonstrating research skills in the clinical or supervisory processes.

Competencies for Effective Clinical Supervision:

Although the competencies are listed separately according to task, each competency may be needed to perform a number of supervisor tasks.

1.0 Task: Establishing and maintaining an effective working relationship with the supervisee.
Competencies required:

1.1 Ability to facilitate an understanding of the clinical and supervisory processes.
1.2 Ability to organize and provide information regarding the logical sequences of supervisory interaction, that is, joint setting of goals and objectives, data collection and analysis, evaluation.
1.3 Ability to interact from a contemporary perspective with the supervisee in both the clinical and supervisory process.
1.4 Ability to apply learning principles in the supervisory process.
1.5 Ability to apply skills of interpersonal communication in the supervisory process.
1.6 Ability to facilitate independent thinking and problem solving by the supervisee.
1.7 Ability to maintain a professional and supportive relationship that allows supervisor and supervisee growth.
1.8 Ability to interact with the supervisee objectively.
1.9 Ability to establish joint communications regarding expectations and responsibilities in the
clinical and supervisory processes.

1.10 Ability to evaluate, with the supervisee, the effectiveness of the ongoing supervisory relationship.

2.0 Task: Assisting the supervisee in developing clinical goals and objectives.
Competencies required:

2.1 Ability to assist the supervisee in planning effective client goals and objectives.
2.2 Ability to plan, with the supervisee, effective goals and objectives for clinical and professional growth.
2.3 Ability to assist the supervisee in using observation and assessment in preparation of client goals and objectives.
2.4 Ability to assist the supervisee in using self-analysis and previous evaluation in preparation of goals and objectives for professional growth.
2.5 Ability to assist the supervisee in assigning priorities to clinical goals and objectives.
2.6 Ability to assist the supervisee in assigning priorities to goals and objectives for professional growth.

3.0 Task: Assisting the supervisee in developing and refining assessment skills.
Competencies required:

3.1 Ability to share current research findings and evaluation procedures in communication disorders.
3.2 Ability to facilitate an integration of research findings in client assessment.
3.3 Ability to assist the supervisee in providing rationale for assessment procedures.
3.4 Ability to assist supervisee in communicating assessment procedures and rationales.
3.5 Ability to assist the supervisee in integrating findings and observations to make appropriate recommendations.
3.6 Ability to facilitate the supervisee's independent planning of assessment.

4.0 Task: Assisting the supervisee in developing and refining management skills.
Competencies required:

4.1 Ability to share current research findings and management procedures in communication disorders.
4.2 Ability to facilitate an integration of research findings in client management.
4.3 Ability to assist the supervisee in providing rationale for treatment procedures.
4.4 Ability to assist the supervisee in identifying appropriate sequences for client change.
4.5 Ability to assist the supervisee in adjusting steps in the progression toward a goal.
4.6 Ability to assist the supervisee in the description and measurement of client and clinician change.
4.7 Ability to assist the supervisee in documenting client and clinician change.
4.8 Ability to assist the supervisee in integrating documented client and clinician change to evaluate progress and specify future recommendations.

5.0 Task: Demonstrating for and participating with the supervisee in the clinical process.
Competencies required:

5.1 Ability to determine jointly when demonstration is appropriate.
5.2 Ability to demonstrate or participate in an effective client-clinician relationship.
5.3 Ability to demonstrate a variety of clinical techniques and participate with the supervisee in clinical management.
5.4 Ability to demonstrate or use jointly the specific materials and equipment of the profession.
5.5 Ability to demonstrate or participate jointly in counseling of clients or family/guardians of
6.0 Task: Assisting the supervisee in observing and analyzing assessment and treatment sessions.
Competencies required:

6.1 Ability to assist the supervisee in learning a variety of data collection procedures.
6.2 Ability to assist the supervisee in selecting and executing data collection procedures.
6.3 Ability to assist the supervisee in accurately recording data.
6.4 Ability to assist the supervisee in analyzing and interpreting data objectively.
6.5 Ability to assist the supervisee in revising plans for client management based on data obtained.

7.0 Task: Assisting the supervisee in development and maintenance of clinical and supervisory records.
Competencies required:

7.1 Ability to assist the supervisee in applying record-keeping systems to supervisory and clinical processes.
7.2 Ability to assist the supervisee in effectively documenting supervisory and clinically related interactions.
7.3 Ability to assist the supervisee in organizing records to facilitate easy retrieval of information concerning clinical and supervisory interactions.
7.4 Ability to assist the supervisee in establishing and following policies and procedures to protect the confidentiality of clinical and supervisory records.
7.5 Ability to share information regarding documentation requirements of various accrediting and regulatory agencies and third-party funding sources.

8.0 Task: Interacting with the supervisee in planning, executing, and analyzing supervisory conferences.
Competencies required:

8.1 Ability to determine with the supervisee when a conference should be scheduled.
8.2 Ability to assist the supervisee in planning a supervisory conference agenda.
8.3 Ability to involve the supervisee in jointly establishing a conference agenda.
8.4 Ability to involve the supervisee in joint discussion of previously identified clinical or supervisory data or issues.
8.5 Ability to interact with the supervisee in a manner that facilitates the supervisee's self-exploration and problem solving.
8.6 Ability to adjust conference content based on the supervisee's level of training and experience.
8.7 Ability to encourage and maintain supervisee motivation for continuing self-growth.
8.8 Ability to assist the supervisee in making commitments for changes in clinical behavior.
8.9 Ability to involve the supervisee in ongoing analysis of supervisory interactions.

9.0 Task: Assisting the supervisee in evaluation of clinical performance.
Competencies required:

9.1 Ability to assist the supervisee in the use of clinical evaluation tools.
9.2 Ability to assist the supervisee in the description and measurement of his/her progress and achievement.
9.3 Ability to assist the supervisee in developing skills of self-evaluation.
9.4 Ability to evaluate clinical skills with the supervisee for purposes of grade assignment.
10.0 Task: Assisting the supervisee in developing skills of verbal reporting, writing, and editing. Competencies required:

10.1 Ability to assist the supervisee in identifying appropriate information to be included in a verbal or written report.
10.2 Ability to assist the supervisee in presenting information in a logical, concise, and sequential manner.
10.3 Ability to assist the supervisee in using appropriate professional terminology and style in verbal and written reporting.
10.4 Ability to assist the supervisee in adapting verbal and written reports to the work environment and communication situation.
10.5 Ability to alter and edit a report as appropriate while preserving the supervisee's writing style.

11.0 Task: Sharing information regarding ethical, legal, regulatory, and reimbursement aspects of the profession. Competencies required:

11.1 Ability to communicate to the supervisee knowledge of professional codes of ethics (e.g., ASHA, state licensing boards, and so on).
11.2 Ability to communicate to the supervisee an understanding of legal and regulatory documents and their impact on the practice of the profession (licensure, PL 94-142, Medicare, Medicaid, and so on).
11.3 Ability to communicate to the supervisee an understanding of reimbursement policies and procedures of the work setting.
11.4 Ability to communicate knowledge of supervisee rights and appeal procedures specific to the work setting.

12.0 Task: Modeling and facilitating professional conduct. Competencies required:

12.1 Ability to assume responsibility.
12.2 Ability to analyze, evaluate, and modify own behavior.
12.3 Ability to demonstrate ethical and legal conduct.
12.4 Ability to meet and respect deadlines.
12.5 Ability to maintain professional protocols (respect for confidentiality, etc.)
12.6 Ability to provide current information regarding professional standards (PSB, ESB, licensure, teacher certification, etc.).
12.7 Ability to communicate information regarding fees, billing procedures, and third-party reimbursement.
12.8 Ability to demonstrate familiarity with professional issues.
12.9 Ability to demonstrate continued professional growth.

13.0 Task: Demonstrating research skills in the clinical or supervisory processes. Competencies required:

13.1 Ability to read, interprets, and applies clinical and supervisory research.
13.2 Ability to formulate clinical or supervisory research questions.
13.3 Ability to investigate clinical or supervisory research questions.
13.4 Ability to support and refute clinical or supervisory research findings.
13.5 Ability to report results of clinical or supervisory research and disseminate as appropriate.
Preparation of Supervisors:

The special skills and competencies for effective clinical supervision may be acquired through special training which may include, but is not limited to, the following:

- Specific curricular offerings from graduate programs; examples include doctoral programs emphasizing supervision, other postgraduate preparation, and specified graduate courses.
- Continuing educational experiences specific to the supervisory process (e.g., conferences, workshops, self-study).
- Research-directed activities that provide insight in the supervisory process.

The major goal of training in supervision is mastery of the “Competencies for Effective Clinical Supervision.” Since competence in clinical services and work experience sufficient to provide a broad clinical perspective are considered essential to achieving competence in supervision, it is apparent that most preparation in supervision will occur following the preservice level. Even so, positive effects of preservice introduction to supervision preparation have been described by both Anderson (1981) and Rassi (1983). Hence, the presentation of basic material about the supervisory process may enhance students’ performance as supervisees, as well as provide them with a framework for later study.

The steadily increasing numbers of publications concerning supervision and the supervisory process indicate that basic information concerning supervision now is becoming more accessible in print to all speech-language pathologists and audiologists, regardless of geographical location and personal circumstances. In addition, conferences, workshops, and convention presentations concerning supervision in communication disorders are more widely available than ever before, and both coursework and supervisory practicum experiences are emerging in college and university educational programs. Further, although preparation in the supervisory process specific to communication disorders should be the major content, the commonality in principles of supervision across the teaching, counseling, social work, business, and health care professions suggests additional resources for those who desire to increase their supervisory knowledge and skills.

To meet the needs of persons who wish to prepare themselves as clinical supervisors, additional coursework, continuing education opportunities, and other programs in the supervisory process should be developed both within and outside graduate education programs. As noted in an earlier report on the status of supervision (ASHA, 1978), supervisors themselves expressed a strong desire for training in supervision. Further, systematic study and investigation of the supervisory process is seen as necessary to expansion of the data base from which increased knowledge about supervision and the supervisory process will emerge.

The “Tasks of Supervision” and “Competencies for Effective Clinical Supervision” are intended to serve as the basis for content and outcome in preparation of supervisors. The tasks and competencies will be particularly useful to supervisors for self-study and self-evaluation, as well as to the consumers of supervisory activity, that is, supervisees and employers.

A repeated concern by the ASHA membership is that implementation of any suggestions for qualifications of supervisors will lead to additional standards or credentialing. At this time, preparation in supervision is a viable area of specialized study. The competencies for effective supervision can be achieved and implemented by supervisors and employers.
Summary:

Clinical supervision in speech-language pathology and audiology is a distinct area of expertise and practice. This paper defines the area of supervision, outlines the special tasks of which it is comprised, and describes the competencies for each task. The competencies are developed by special preparation, which may take at least three avenues of implementation. Additional coursework, continuing education opportunities and other programs in the supervisory process should be developed both within and outside of graduate education programs. At this time, preparation in supervision is a viable area for specialized study, with competence achieved and implemented by supervisors and employers.

Bibliography:

Essential Functions

The following Essential Functions (EFs) are consistent with the American Speech-Language and Hearing Association (ASHA) didactic and clinical skill performance guidelines expected of or implied for graduate level speech-language pathology students and professionals. Students enrolled in Master of Science degree program in speech-language pathology within the College of Education and Rehabilitation at Salus University are expected to either demonstrate many of these essential functions prior to enrollment, or acquire these EFs by the end of their program of study.

More specifically, the essential functions represent the communication, physical, behavioral/social and cognitive/intellectual skills needed to achieve the knowledge, skills and levels of competency stipulated for graduation from the M.S. Degree Program by the faculty within the Department of Speech-Language Pathology. The EFs are expected traits and characteristics to be exhibited by students enrolled in the M.S. Degree graduate program in Speech-Language Pathology. Many of these traits are identified in educational and credentialing standards established by the Council on Academic Accreditation in Audiology and Speech Language Pathology (CAA) the Council for Clinical Certification (CFCC) of the American Speech-Language-Hearing Association; and the Council on Academic Programs in Communication Sciences and Disorders (CAPCSD).

Here is what the EFs mean for either students seeking admissions to our graduate program in speech-language pathology or those who are currently enrolled in the program.

Students admitted to the SLP Master of Science (M.S.) degree program:

1. Must demonstrate the abilities and skills listed when admitted to the program; or
2. The skills and abilities must be developed, maintained and demonstrated throughout the two-year course of study as a student progresses through the M.S. Degree program in speech-language pathology; or
3. If a student is unable to independently demonstrate or acquire the essential functions listed, the student can be referred to, or has the right to seek out support for reasonable accommodations through the Salus University Office of Academic Success (OAS). The OAS staff will work closely with faculty and administrators within the Department of Speech-Language Pathology and/or the College of Education and Rehabilitation to accommodate student needs based on the policies and procedures associated with federal ADA compliance guidelines.

If a student refuses to acquire the essential functions with or without reasonable accommodations, then the student can be dismissed from the program.

A. Communication Abilities/General:

1. Speak intelligibly and articulately, exhibiting no mispronunciations of Standard English speech sounds (phonemes) nor acquired second languages (i.e. Spanish);
2. Hear sufficiently at a level that includes high and low frequency speech sounds of English;
3. Possess demonstrated reading comprehension and speed at a level sufficient to accomplish curricular requirements and to provide timely and efficient clinical care for patients/clients;
4. Complete appropriate medical records, documentation and plans according to protocol in a thorough and timely manner;
5. Write legibly and cohesively with minimal to no grammatical/spelling errors while providing a logical sequence of information (i.e., introduction/topic sentence, body of content, conclusion, recommendations, SOAP notations);
6. Communicate and interact effectively with people in person, by phone, and in writing by considering the communication needs and cultural values of the listener(s) (e.g. client, family member, professional health colleague). Adapt to the language, speech and non-verbal interactions of the patients/clients and family members accordingly or use an interpreter/translator to do so.

B. Physical Abilities:

1. Participate in professional responsibilities/activities for up to four-hour blocks of time with one or two breaks;
2. Move independently to, from, and in clinics and work settings;
3. Provide for one’s own personal hygiene;
4. Manipulate screening/diagnostic materials, including completion of screening/evaluation protocols;
5. Effectively implement a treatment plan that is appropriate for the client, including use and manipulation of materials/instrumentation and printed or computerized data collection;
6. Provide a safe environment for others in responding quickly to emergency situations including fire, choking, unconsciousness, infection control, etc., and in the application of universal precautions;
7. Engage in education, training, certification and re-certification of Basic Resuscitation and Cardiac skills (including appropriate use of defibrillators) for infant, pediatric and adult clients based on American Heart/Red Cross standards;
8. Monitor client responses to diagnostic and treatment materials and quickly manipulate or alter the use of materials based on client responses (i.e., effective vs. ineffective treatment outcome);
9. Make accurate judgments about speech and/or acoustic signals using perceptual and objective (clinical equipment) data and accurately interpreting data obtained;
10. Drive, transport, engage in a car pool and/or use public transportation (bus, rail train) to assure classroom, on-campus clinic and externship clinical sites attendance that is timely and consistent. Proof of a legal driver’s license, self-auto insurance and reliable, safe transportation is required for speech-language pathology students who drive;
11. Maneuver patients who rely on wheel chairs, walking canes and general support (e.g., walking arm-in-arm or arm-to-waste with client) to transport client to/from waiting area and clinic treatment room;
12. Squat, sit on pediatric furniture; sit on the floor with pediatric clients; or position the pediatric client on a tabletop, desk, lap etc., to gain the attention of the child and engage the child in diagnostic and/or therapeutic interventions.
13. Demonstrate finger/hand dexterity to handle writing instruments, eating/feeding utensils, small and large play objects, iPad and associated computer applications.

C. Behavioral and Social Attributes:

1. Maintain emotional and mental health required for use of intellectual abilities, prompt completion of responsibilities, and development of appropriate relationships with faculty, clinical supervisors (on-campus and external site supervisors) clients, SLP student colleagues and interprofessional, intercollaborative student and professional team members;
2. Maintain composure and emotional stability in demanding or challenging situations;
3. Exhibit flexibility and adaptation to changing environments and situations;
4. Fully honor and engage in cultural competency development through exposure to a variety of school and medical clinical placement settings and learn about the history of various traditionally recognized and newer cultural groups gaining recognition in the U.S. that reflect the pluralistic society of Philadelphia, the commonwealth of Pennsylvania and the nation at large. In addition, continuously self-assess perceptions of the role of the speech-language pathologist as a culturally competent, global citizen;
5. Understand and respect faculty and clinical supervisory authority. Maintain a ‘teachable spirit’ that is respectful of those in leadership positions at the Department, College, University and External Clinical Site levels;
6. Maintain appropriate professional behavior, including punctuality, appropriate professional dress attire, regular attendance and adherence to timelines for engaging in diagnostic and therapeutic sessions, report submissions, lesson planning and preparation, portfolio documentation, and the timely preparation of clinical session materials prior to client arriving for these sessions.
7. Demonstrate compassion, integrity, interest, motivation, confidentiality (HIPPA) and general humane practices, when delivering professional services to other individuals;
8. Familiarize oneself and abide by the ASHA code of ethics and scopes of practice when delivering clinical service as a student and future professional in speech-language pathology.

D. Intellectual Abilities:

1. Demonstrate the mental capacity to read, listen to, learn, assimilate and use didactic and clinical information, including the ability to read and comprehend, interpret and orally present or write up professional literature and clinical reports;
2. Solve clinical problems through critical thinking, analysis synthesis, and evidence-based practice;
3. Seek relevant case information, synthesize, and apply concepts and information from various sources and disciplines;
4. Write discipline-specific papers and clinical reports using spelling, phonetics, grammar (syntax) and content (semantics) characteristics of Standard English and adhering to the latest version of APA style documentation and referencing;
5. Speak Standard American English intelligibly, including the ability to model all English phonemes in isolation, phrases, sentences and conversational speech.
6. Demonstrate ability to depict when speech-language-swallowing patterns of clients are disordered requiring further assessment and intervention;
7. Analyze, synthesize, and interpret ideas and concepts in academic and diagnostic/treatment settings;
8. Maintain attention and concentration for sufficient time to complete didactic and clinical activities for up to 4-hour blocks of time with one or two breaks;
9. Schedule and prioritize activities, and provide documentation in a timely manner;
10. Comply with administrative, legal, ethical, and regulatory policies set forth by the Department of Speech-Language Pathology, the College of Education and Rehabilitation, Salus University, the state of Pennsylvania and other states across the U.S. as a future SLP practitioner;

By signing this form, I am acknowledging receipt of the Notice of Privacy Practices of Salus University. I have the right to review the Notice of Privacy Practices prior to signing this form. If I do not sign this form, Salus University may decline to provide treatment to me (or my child). Salus University reserves the right to revise its Notice of Privacy Practices at any time. A copy of such revisions will be available upon request.

Patient Name:______________________________________________

Patient Date of Birth:_______________________________________

Signature:_______________________________________ Date:_________

Printed Name (if signing on behalf of the patient):__________________________

Relation to Patient:____________________________________
CONSENT FOR EVALUATION AND TREATMENT

I consent to evaluation and treatment services (or, for my child, __________________) by the students and clinical educators of the Speech-Language Institute (SLI) at Salus University.

I understand that services will be provided by speech-language pathologists licensed in the Commonwealth of Pennsylvania and certified by the American Speech-Language Hearing Association and graduate students, working under the direct supervision of licensed and certified speech-language pathologists. I acknowledge that no guarantee has been made as to evaluation or treatment outcomes for me (or for my child) and that I may terminate services with SLI at any time.

ATTENDANCE

Consistent attendance is the foundation of helping a client make progress in therapy. I understand that it is my responsibility to ensure that I (or my child) miss therapy sessions as infrequently as possible.

If I (or my child) miss 3 or more appointments without notice in a 3-month period, SLI reserves the right to discontinue treatment.

CANCELLATIONS & NO SHOWS

Appointments with SLI must be cancelled no later than 8:00 a.m. the day of the session by calling the clinic.

With the exception of emergency situations, all appointments that are not cancelled by 8:00 a.m. the day of the scheduled session may be subject to a $25.00 late cancellation fee.

Appointments that are missed without advance notice to the Speech-Language Institute at Salus University are considered a “no show” and may be charged a $50.00 no show fee.

By signing this form, I acknowledge that I have read, understand and agree to its contents and that I have had the opportunity to ask questions and request clarifications.

Client (or Parent/Caregiver) Signature: ___________________________ Date: ___________
CONSENT FOR AUDIO/VIDEO RECORDING AND PICTURE IMAGES

I give consent to SLI to take audio/video recordings and/or picture images of me (or my child) to aid in the evaluation/treatment process.

I understand that all audio/video recordings and images collected during my (or my child’s) sessions are used solely for clinical purposes and will remain confidential. SLI will not use the audio/video recordings or images for any other purposes (i.e., education and training) without my written consent.

I authorize the use and disclosure of the audio/video recording and images of my (or my child’s) diagnostic and/or therapy sessions which may include health information for each purpose I have checked below. I also understand that these audio/video recordings and images will contain identifiable information such as voice and full facial images.

☐ Review by only clinical educator(s) of SLI and any student(s) involved in administering my (or my child’s) evaluation and therapy sessions. These recordings will be used for assessing the student for quality of care.

☐ Review and use by the SLI staff, faculty and students for educational and professional training purposes.

☐ Use outside of SLI for educational and professional training purposes. I understand that such purposes may include, but are not limited to, the compilation of recordings to be used within professional training manuals and DVDs, the presentation of recordings as part of lectures, seminars, presentations, or similar professional and/or educational sessions to speech-language pathologists and other professionals. I understand that such purposes shall not include commercial use.

By signing this form, I acknowledge that I have read, understand and agree to its contents and that I have had the opportunity to ask questions and request clarifications.

Client (or Parent/Caregiver) Signature: ________________________________ Date: __________
INSURANCE REIMBURSEMENT

I understand that the Speech-Language Institute at Salus University is not billing my (or my child’s) insurance, including Medicare and Medicaid, for services rendered.

PARTICIPATION IN RESEARCH PROJECTS

Clients may be asked by students and/or researchers at Salus University if they would be interested in participating in a research study pertaining to their condition. When contacted, clients will be given an opportunity to review information about the study in order to decide whether or not they wish to participate. Participation in any research study is always optional and will not affect the clinical care delivered to the client. Clients who do not wish to be contacted regarding opportunities to participate in research may opt out at any time by contacting the clinic or by checking the statement below.

☐ Please do NOT contact me with opportunities to participate in research

OBSERVATIONS

Occasionally, the Speech-Language Institute may have prospective students, graduate students from other Salus University programs, and other professionals observe therapy sessions. Please check this box if you do not wish to participate.

☐ Please do not let observers from outside the Salus University Speech-Language Pathology Department observe my/my child’s therapy sessions

By signing this form, I acknowledge that I have read, understand and agree to its contents and that I have had the opportunity to ask questions and request clarifications.

Client (or Parent/Caregiver) Signature: ___________________________ Date: ____________
EXCHANGE OF INFORMATION

I give permission to the Speech-Language Institute at Salus University to exchange information about my (or my child’s) services via the following methods:

Email: ______________________________________________________________

Mobile Phone: __________________________________________________________

Home Phone: ___________________________________________________________

Mail: __________________________________________________________________

RELEASE OF INFORMATION

I give the Speech-Language Institute at Salus University permission to consult and provide information about my (or my child’s) evaluation results, treatment plan and ongoing progress in therapy with the following professional:

Pediatrician/Physician: ___________________________________________________

Director of School/Program: ______________________________________________

Teacher(s): __________________________________________________________________

Educational Specialist/Speech-Language Pathologist: ____________________________

Other: ____________________________________________________________________

I understand that this release is valid for the length of time that I (or my child) is receiving services at the Speech-Language Institute at Salus University, unless a written request for termination of this agreement is made.

By signing this form, I acknowledge that I have read, understand and agree to its contents and that I have had the opportunity to ask questions and request clarifications.

Client (or Parent/Caregiver) Signature: ____________________________ Date: __________

CHILD CASE HISTORY FORM

Please answer the following questions as best you can and return the form to the clinic prior to the scheduled evaluation. If there are some questions which you cannot answer, leave them blank. Your answers will help us save time in understanding your child’s problem.

I. ROUTINE INFORMATION

Name of your child: __________________________________________________________

DOB: __________ Age: __________ Gender ________

Name of parent(s)/guardian: __________________________________________________

Address: __________________________________________________________________

Home phone: __________________________________________________________________

Work phone: __________________________________________________________________

Cell phone: __________________________________________________________________

E-mail address: __________________________________________________________________

Name of person giving information: ______________________________________________

Relationship: __________________________________________________________________

Health Insurance: __________________________________________________________________

Name of Policy Holder: __________________________________________________________________

Policy Number: __________________________________________________________________

Race of the child* __________________________________________________________

0 = Not reported  1= American Indian/Alaska Native  2 = Black/African American  3 = Asian/
Pacific Islander  4 = Hispanic  5 = White/ Caucasian

* This information is requested to be used solely for the purpose of describing caseload diversity.
Your response will not affect consideration of your child’s application.
Why are you requesting a speech-language evaluation? ____________________________________________
_____________________________________________________________________________________
_____________________________________________________________________________________

II. PRESENT SPEECH AND LANGUAGE STATUS

Does your child understand what you say to her/him? _______ If not, describe her/ his reactions:
_____________________________________________________________________________________
_____________________________________________________________________________________

Does your child have trouble understanding other people’s speech? _______ Give examples:
_____________________________________________________________________________________
_____________________________________________________________________________________

Do you know why your child does not understand? _______ Please explain: __________________________
_____________________________________________________________________________________
_____________________________________________________________________________________

Does your child respond consistently to sounds in the home (doorbell, phone, etc.)? ________
Explain: _____________________________________________________________________________
_____________________________________________________________________________________

Do you suspect a hearing loss? _______ Why? ________________________________________________
_____________________________________________________________________________________

Has your child’s hearing ever been evaluation? ______________________________________________

Does your child attempt to talk? _______ Is the child’s speech understood by parents? ______ Siblings? ___________ Strangers?___________

What is your child’s reaction when his/her speech is not understood? __________________________
____________________________________________________________________________________
____________________________________________________________________________________

What does your child do to express himself when his/her speech is not understood by others? __
____________________________________________________________________________________

Does your child say as much as most children of the same age?__________ Give an example of a sentence your child might say: ________________________________
Does your child pronounce words well? ________ List sounds or words that your child pronounces incorrectly: ________________________________________________________________

Select the skill(s) that best describes your child:
__responds to only loud sounds   __makes no vocal sounds
__responds only to sounds in the home   __babbles only
__understands single words   __says single words
__understands simple sentences   __speaks in simple sentences
__understands complex directions and sentences   __uses complex sentences
__uses only gestures

Does your child hesitate and/or repeat sounds or words?_______ How often does it happen? ____

When did you first notice this behavior? __________________________________________________________

Describe any struggle behaviors that accompany the hesitations/repetitions: ____________________________

What, if anything, have you done about it? __________________________________________________________

Is your child’s voice too high-pitched? ______ too low-pitched?_______ too weak or quiet?_______ Is your child’s voice quality unusual? ______ If so, describe: ____________________________

Is your child’s speech too fast? ________ too slow?______________

Are there any physical causes for any of the above answers?__________ If yes. Please explain: ____________________________

III. DEVELOPMENTAL HISTORY

A. Birth History

Mother’s condition during pregnancy? _____________________________________________________________

Full term? ________If premature, how many weeks gestation? ________________________________
Birth weight? ___________________ Birth length? ___________________

Any evidence of injury at birth? _______ If so, please describe: ______________________
__________________________________________
__________________________________________

Indications of weakness or poor health at birth? _______ Explain: ______________________
__________________________________________
__________________________________________

Any difficulty in initiating breathing? ____________________________________________

B. Growth

During infancy, did your child demonstrate any feeding or swallowing problems? _______
Please describe: ______________________
__________________________________________
__________________________________________

Has your child increased in height and weight normally? _______ If not, please describe: ___
__________________________________________
__________________________________________

C. Motor

Age of sitting up _________ Age of crawling _________ Age of walking _________

Does your child seem to have normal coordination for his/her age?_______ If not, please
describe: ________________________________________________________________
__________________________________________

Which hand does your child use? _________

D. Speech Development

Did your child babble and coo during the first ten months? _______________

At what age did your child use single words meaningfully? _______________

At what age did your child use short phrases/sentences? _______________
E. General Development

Does your child have opportunities to play with other children? ________

What ages are the children? ________ How many times per week? ________

Does your child like to play with other children or would your child prefer to play alone? ________

At what age did your child start feeding himself/herself? ________

Dressing himself/herself? ________ Become toilet-trained? ________

Does your child present any special behavior problems? ________ If so, please describe: ________

IV. MEDICAL HISTORY

A. List diseases/conditions and their effects and severity: ____________________________
   ____________________________
   ____________________________

B. List significant injuries, ages and effects: ____________________________
   ____________________________
   ____________________________

C. List operations and ages for each operation: ____________________________
   ____________________________
   ____________________________

D. Name of child’s current pediatrician ____________________________

   Address ____________________________

   Phone ____________________________

Evaluation Outline

Client Name:     Date of Evaluation:
Address:       Date of Birth:
Telephone:       Age:
Parent(s)/Caregiver:

Student Clinician:    Clinical Educator:

Statement of Problem: The statement will include the referral source, reason for referral, and a physical/social informal description made by the client or the parent/caregiver.

History: History includes the Medical/Health/Developmental History, pertinent Family History and related Education/Social/Employment History

Results of Evaluation: An overview of the skills presented by the client, documentation will be related to the testing preformed and should focus on the client’s presentation of speech (including voice, and fluency), language, cognition, hearing and swallowing, as applicable. All clients should have an oral-peripheral exam also.

Formal Tests Administered: Examiner should briefly summarize the test provided and the data obtained from administration of the protocol.

Behavioral Observations: As applicable

Language Sampling: As applicable

Impressions: The impressions should focus on the educational, social, vocational, therapeutic and/or remedial implications of deficits indicated during assessment. (This section should justify all the recommendations to follow.) A severity and prognostic statement should be included.

Recommendations: Following the completion of the evaluation, clinician should make recommendation for the initial focus of therapy, when follow-up is indicated. Stated hierarchy of Long-Term and Short-Term goals are to be provided.

Education: Provide documentation summary of information shared with the client and/or parents/caregiver during the assessment.

Evaluation Summary

Date: __________________________

Client’s Name: _____________________________ DOB: _____________________________

Speech/Language Diagnosis: _____________________________

Recommendations:

1. Recommend re-evaluation in _____________________________ # of months

2. No treatment recommend at this time.

   • Number of sessions per week: _____________________________

4. Recommend additional testing: _____________________________

Diagnostic Supervisor’s Signature: _____________________________

Student Clinician(s) Signature(s): _____________________________

For Clinic Use Only:

Supervisor assigned to: _____________________________

Student clinician: _____________________________

Session days/time: _____________________________

Start date: _____________________________
Treatment Note (SOAP Format) Outline

Client Name: Date of Treatment:
Address: Date of Birth:
Telephone: Age:
Parent(s)/Caregiver:

Student Clinician: Clinical Educator:

S: (Subjective Information): Impressions of the client’s behavior. These impressions can be the client’s, clinician’s or the parents. Indicate the time period covered by the note and the number of sessions the client was seen. If sessions were missed, comment as to why.

O: (Objective Data): Measurable information is reported in this section of the note. Include accuracy of client performance as recorded on the therapy plan. Ranges should not be included, only highest percentage achieved. If applicable, compare the client’s performance with that reported in the previous SOAP Note. Data from any additional testing administered for screening or re-evaluation purposes should be included.

A: (Assessment/Analysis): The remaining diagnosis should precede the overall progression of goals. Goals met and increases noted should be listed. Review of information with client or client’s family, and whether they are in agreement with results and recommendations should also be included in this section. Lastly, a prognostic statement regarding anticipated improvements should be included.

P: (Plan): State the overall therapy goals for the next treatment period (1 month). Specific behavioral objectives should be listed for what will be completed within four weeks.

Progress Note / Discharge Summary Outline

Client Name: Date(s) of Services: 
Address: Date of Birth: 
Telephone: Age: 
Parent(s)/Caregiver: 

Student Clinician: Clinical Educator: 

Diagnosis: Reason(s) for treatment 

History: Documentation should include: (1) history of the problem, (2) previous therapy and (3) and test results (including pre-test results pertinent to the stated problem/diagnosis). 

Objectives: Therapeutic objectives will include long term therapy plan, semester goals, and short term objectives stated in behavioral terms. 

Therapy Summary: The summary of therapy has a brief description of the type of therapy presented since the beginning of this session, e.g., specific approach used, activities or materials, and report progress toward each short term objective. 

Outcomes: Briefly summarize progress. Include a prognosis statement as well as additional documentation regarding client’s behavior, attitudes towards speech, parental information, etc.) 

Recommendations: Indicate whether or not continued therapy is recommended, when therapy will be continued (if applicable), and the number of days per week and length of session. Also include a recommendation for the therapy focus, if therapy is to be continued and any modification of goals. Note if additional testing or follow-up/re-assessment may also be warranted.

A. Notifier: Department of Speech-Language Pathology at Salus University
B. Patient Name: ____________________________ C. Identification Number: ____________

Advance Beneficiary Notice of Noncoverage (ABN)

NOTE: If Medicare doesn’t pay for the Speech-Language Pathology (SLP) services below, you may have to pay. Medicare does not pay for everything, even some care that you or your health care provider have good reason to think you need. We expect Medicare may not pay for the Speech-Language Pathology services below.

D. Reason Medicare May Not Pay:

- [ ] Speech-Language Pathology Evaluation
- [ ] Speech-Language Pathology Treatment

E. Estimated Cost

Services rendered by student clinician(s) supervised by state licensed and nationally certified Speech-Language Pathologist(s)

WHAT YOU NEED TO DO NOW:

- Read this notice, so you can make an informed decision about your care.
- Ask us any questions that you may have after you finish reading.
- Choose an option below about whether to receive the SLP services listed above.

Note: If you choose Option 1 or 2, we may help you to use any other insurance that you might have, but Medicare cannot require us to do this.

G. OPTIONS: Check only one box. We cannot choose a box for you.

- [ ] OPTION 1. I want the SLP services listed above. You may ask to be paid now, but I also want Medicare billed for an official decision on payment, which is sent to me on a Medicare Summary Notice (MSN). I understand that if Medicare doesn’t pay, I am responsible for payment, but I can appeal to Medicare by following the directions on the MSN. If Medicare does pay, you will refund any payments I made to you, less co-pays or deductibles.
- [ ] OPTION 2. I want the SLP services listed above, but do not bill Medicare. You may ask to be paid now as I am responsible for payment. I cannot appeal if Medicare is not billed.
- [ ] OPTION 3. I don’t want the SLP services listed above. I understand with this choice I am not responsible for payment, and I cannot appeal to see if Medicare would pay.

H. Additional Information:

This notice gives our opinion, not an official Medicare decision. If you have other questions on this notice or Medicare billing, call 1-800-MEDICARE (1-800-633-4227/TTY: 1-877-486-2048).

Signing below means that you have received and understand this notice. You also receive a copy.

Thank you for your time and consideration!

*Salus University Health also offers comprehensive vision, hearing and balance care services.*

*If interested in more information, please check the box below*

☐ The Eye Institute of Salus University’s services include: pediatric and adult eye care, low vision and rehabilitation services, specialty contact lens, designer eyewear and more.

☐ The Pennsylvania Ear Institute of Salus University’s services include: pediatric and adult hearing evaluations, vestibular and balance treatment, hearing aid fitting and repair and more.
# THERAPY PLAN

**Client:** 
**Clinician:** 
**Session Date:** 
**Time:**

**Short-term objective(s) to be addressed:**

---

**The client will:**

**Materials/reinforcements to be used:**

**Data:**

---

**The clinician will (behavioral change goal for the clinician):**

---

**Home Program/Homework:**

---

**Rationale (Include consideration of the 3 legs of EBP: Research Support, Clinician/(Supervisor) expertise, Client’s Values/Preferences):**

---

Are the intervention procedures commensurate with the prevailing research literature?  
In planning this intervention, has the student clinician taken into account the unique characteristics and communication needs, values, and/or preferences of the client?  
Does the student clinician demonstrate sound clinical judgment? Does the student clinician consult the supervising clinician (as needed) and make use of the supervisor's clinical expertise?

FERPA MEMORANDUM

According to the Family Educational Rights and Privacy Act (FERPA), information on student coursework and/or performance may not be shared with individuals other than faculty members with a legitimate educational interest.

When you are placed at off-campus externship sites, the supervisors often ask for information related to coursework and clinical performance. The intent is for the supervisor to determine if a student has the pre-requisite knowledge, skills, and abilities to succeed at the placement site. The information also gives the supervisor some information about your needs as a developing clinician.

Please indicate below whether or not you will offer permission to the Clinical Director, to share information from written documentation pertaining to your coursework and/or performance with externship supervisors. If you do offer permission, that permission will remain in force until one year after the date on this signed form unless you formally request to change that and deny permission.

______ I do permit the Clinical Director to share information with externship supervisors from written documentation pertaining to my coursework, clinical activities, and/or performance in any area that is requested.

______ I do not permit the Clinical Director to share information from written documentation pertaining to my coursework, clinical activities, and/or performance in any area that is requested.

Date
Communication Proficiency Screener

The Communication Proficiency Screener is administered to all matriculated graduate students in the program, during the week of orientation, by a state licensed and ASHA certified speech-language pathologist from the Department of Speech-Language Pathology. The specific results of each component of the screener will be discussed with the student via their academic advisor.

Students who require follow-up in one or more areas of the screening tool will be counseled about their options to seek further assistance, including:

1. Self-correction/monitoring activities;
2. Seeking assistance for the communication disorder via private consultation with an external speech-language pathologist;
3. Participating in additional diagnostic and treatment activities through the Department of Speech-Language Pathology on-campus clinic.

SLP Student Handbook

Acknowledgement Statement

I have read the SLP Student Handbook. I understand that I must abide by the policies set herein. I certify that I have had ample time to discuss the Handbook and its contents with the Clinical Director and I fully understand its contents.

With this knowledge, I accept the policies outlined herein as a condition of my enrollment in the graduate program.

Student’s Name (printed)

Student’s Signature Date

Program Participant Agreement Statement

As a current student in the Department of Speech-Language Pathology at Salus University, I attest that I have read all pages of the Eligibility Requirements and Essential Functions documents, that I understand its content, that I am committed to the policies expressed therein, and that I may be eligible for dismissal from the program, via faculty vote, should I fail to demonstrate all of the Essential Functions despite reasonable accommodations and reasonable levels of support from the academic and clinical faculty.

Faculty’s Signature Date
The Oath to Professionalism in the Health Sciences

With full deliberation I freely and solemnly pledge that:

I will practice the art and science of my chosen profession faithfully and conscientiously, and to the fullest scope of my competence.

I will uphold and honorably promote by example and action the highest standards, ethics and ideals of my chosen profession.

I will provide professional care for those who seek my services, with concern, with compassion and with due regard for their human rights and dignity and I will promote justice in the health care system by the elimination of discrimination.

I will place the treatment of those who seek my care above personal gain and strive to see that none shall lack for proper care with patient welfare my utmost concern.

I will hold as privileged and inviolable all information entrusted to me in confidence by those who seek my services and promote the principles of their individual autonomy.

I will advise my patients and clients fully and honestly of all which may serve to restore, maintain or enhance their health and well-being.

I will strive continuously to broaden my knowledge and skills to deliver all new and efficacious means to enhance my services.

I will share information cordially and unselfishly with colleagues and other professionals for the benefit of patients and the advancement of human knowledge and welfare.

I will do my utmost to serve my community, my country and humankind.

I hereby commit myself to be steadfast in the performance of this, my solemn oath and obligation.

Salus University, 2013
